### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

#### IEC Catalogue - [webstore.iec.ch/catalogue](http://webstore.iec.ch/catalogue)

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary of electronic and electrical terms containing 20 000 terms and definitions in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

#### IEC publications search - [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Glossary - [std.iec.ch/glossary](http://std.iec.ch/glossary)

65 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [csc@iec.ch](mailto:csc@iec.ch).

### A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

### A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

#### Catalogue IEC - [webstore.iec.ch/catalogue](http://webstore.iec.ch/catalogue)

Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalelement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

#### Recherche de publications IEC - [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

#### Glossaire IEC - [std.iec.ch/glossary](http://std.iec.ch/glossary)

65 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

#### Service Clients - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: [csc@iec.ch](mailto:csc@iec.ch).

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**SPECIFICATIONS FOR PARTICULAR TYPES OF WINDING WIRES –****Part 56: Solderable fully insulated (FIW) zero-defect  
polyurethane enamelled round copper wire, class 180****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible <https://standards.iec.ch/catalog/standards/ssi/IEC60317-56-2017/bb28c3992667/iec-60317-56-2017>. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60317-56 has been prepared by IEC technical committee 55: Winding wires.

This second edition cancels and replaces the first edition published in 2012. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) Clause 1: revision of the scope, reducing the number of grades of FIW from 3 through 9 to 4, 6 and 8 only;
- b) Clause 1: revision of the scope, reducing the wire diameter range from (0,040 to 1,600) mm to (0,090 to 0,900) mm;
- c) addition of an informative annex for abrasion resistance requirements for grades FIW 3 to 9.

The text of this standard is based on the following documents:

FDIS	Report on voting
55/1616/FDIS	55/1622/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

This International standard is to be read in conjunction with IEC 60317-0-7:–1.

The numbering of clauses in this standard is not continuous from Clauses 20 and 30 in order to reserve space for possible future wire requirements prior to those for wire packaging.

A list of all the parts in the IEC 60317 series, published under the general title *Specifications for particular types of winding wires* can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "http://webstore.iec.ch" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

## iTeh STANDARD PREVIEW (standards.iteh.ai)

[IEC 60317-56:2017](#)

<https://standards.iteh.ai/catalog/standards/sist/9f16bff8-fb00-4020-ae17-bb28c3992667/iec-60317-56-2017>

<sup>1</sup> Under preparation. Stage at the time of publication: IEC/FDIS 60317-0-7:2017.

## INTRODUCTION

The IEC 60317 series is part of a group of International Standards which define insulated wires used for windings in electrical equipment:

- 1) IEC 60851 (all parts), *Winding wires – Test methods*;
- 2) IEC 60317 (all parts), *Specifications for particular types of winding wires*;
- 3) IEC 60264 (all parts), *Packaging of winding wires*.

## iTeh STANDARD PREVIEW (standards.iteh.ai)

[IEC 60317-56:2017](#)

<https://standards.iteh.ai/catalog/standards/sist/9f16bff8-fb00-4020-ae17-bb28c3992667/iec-60317-56-2017>

## SPECIFICATIONS FOR PARTICULAR TYPES OF WINDING WIRES –

### Part 56: Solderable fully insulated (FIW) zero-defect polyurethane enamelled round copper wire, class 180

#### 1 Scope

This part of IEC 60317 specifies the requirements of solderable fully insulated (FIW) zero-defect enamelled round copper wire, class 180, with a single coating based on polyurethane resin, which may be modified providing it retains its chemical identity and satisfies all the required technical specifications.

The range of nominal conductor diameters of the wires covered by this standard is as follows:

- Grade of FIW 4, 6, 8: 0,090 mm up to and including 0,900 mm.

Nominal conductor diameters are specified in IEC 60317-0-7–.

#### 2 Normative references

#### iTeh STANDARD PREVIEW

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

[IEC 60317-56:2017](#)

<https://standards.iteh.ai/catalog/standards/sist/9f16bf8-fb00-4020-ae17-1bb28e399266/iec-60317-56-2017>

#### 3 Terms and definitions, general notes and appearance

##### 3.1 Terms and definitions

Subclause 3.1 of IEC 60317-0-7– applies.

##### 3.2 General notes

###### 3.2.1 Methods of test

Subclause 3.2 of IEC 60317-0-7– applies.

In case of inconsistencies between IEC 60317-0-7 and this document, the latter shall prevail.

###### 3.2.2 Winding wire

A modified resin is one that has undergone a chemical change or contains one or more additives to enhance certain performance or application characteristics.

Class 180 is a thermal class requiring a temperature index of at least 180 °C and a heat shock temperature of at least 200 °C.

The temperature in °C corresponding to the temperature index is not necessarily the temperature recommended as the wire's temperature in use, since this temperature depends on many factors, including the type of electrical equipment involved.

### 3.3 Appearance

Subclause 3.3 of IEC 60317-0-7:– applies.

## 4 Dimensions

Clause 4 of IEC 60317-0-7:– applies.

## 5 Electrical resistance

Clause 5 of IEC 60317-0-7:– applies.

## 6 Elongation

Clause 6 of IEC 60317-0-7:– applies.

## 7 Springiness

Clause 7 of IEC 60317-0-7:– applies.

## 8 Flexibility and adherence *iTeh STANDARD PREVIEW (standards.iteh.ai)*

Clause 8 of IEC 60317-0-7:– applies.  
**9 Heat shock** [IEC 60317-56:2017  
https://standards.iteh.ai/catalog/standards/sist/9f16bff8-fb00-4020-ae17-  
bb28c3992667/iec-60317-56-2017](https://standards.iteh.ai/catalog/standards/sist/9f16bff8-fb00-4020-ae17-bb28c3992667/iec-60317-56-2017)  
Clause 9 of IEC 60317-0-7:– applies. The minimum heat shock temperature shall be 200 °C.

## 10 Cut-through

No failure shall occur within 2 min at 245 °C.

## 11 Resistance to abrasion (for nominal diameters of 0,250 mm up to and including 0,900 mm)

The wire shall satisfy the requirements in Table 1. For intermediate nominal diameters, the amount of resistance to abrasion for the next larger nominal diameter shall apply.

For grades of FIW 3, 5, 7 and 9 and a nominal diameter of 1,000 mm, see Annex A.

**Table 1 – Resistance to abrasion**

Nominal conductor diameter mm	Resistance to abrasion	
	Grades of FIW 4, 6 and 8	
	Minimum of average value N	Minimum N
0,250	4,10	3,50
0,280	4,40	3,70
0,315	4,75	4,00
0,355	5,10	4,30
0,400	5,45	4,60
0,450	5,80	4,90
0,500	6,20	5,25
0,560	6,65	5,60
0,630	7,10	6,00
0,710	7,60	6,45
0,800	8,10	6,90
0,900	8,70	7,40

## iTeh STANDARD PREVIEW

### **12 Resistance to solvents (standards.iteh.ai)**

Clause 12 of IEC 60317-0-7:– applies.

[IEC 60317-56:2017](#)

<https://standards.iteh.ai/catalog/standards/sist/9f16bff8-fb00-4020-ae17-bb28c3992667/iec-60317-56-2017>

### **13 Breakdown voltage**

[bb28c3992667/iec-60317-56-2017](#)

Clause 13 of IEC 60317-0-7: – applies. The elevated temperature shall be 180 °C.

### **14 Continuity of insulation**

Clause 14 of IEC 60317-0-7: – applies.

### **15 Temperature index**

Clause 15 of IEC 60317-0-7: – applies. The minimum temperature index shall be 180 °C.

### **16 Resistance to refrigerants**

Test inappropriate.

### **17 Solderability**

The temperature of the solder bath shall be  $(390 \pm 5)$  °C. The maximum immersion time (in seconds) shall be the following multiple of the nominal conductor diameter (in millimetres) with a minimum of 4 s:

All grades of FIW
18 s/mm

The surface of the tinned wire shall be smooth and free of holes and enamel residue.

## **18 Heat or solvent bonding**

Test inappropriate.

## **19 Dielectric dissipation factor**

A test method shall be agreed between the user and the supplier.

## **20 Resistance to transformer oil**

Test inappropriate.

## **21 Loss of mass**

Test inappropriate.

**iTeh STANDARD PREVIEW  
(standards.iteh.ai)**

## **23 Pin-hole test**

[IEC 60317-56:2017](#)

Clause 23 of IEC 60317-0-7:— applies.
