Foreword

This European Telecommunication Standard (ETS) was produced by the Signalling Protocols and Switching (SPS) Technical Committee of the European Telecommunications Standards Institute (ETSI).

This ETS defines the tests to be run on an implementation of Transaction Capabilities (TC) (based on CCITT Recommendations Q.771 to Q.774, Blue Book 1988), as clarified and amended in ETS 300 134 (1992), to ensure conformance and compatibility.
