## Resilient floor coverings - Classification

Revêtements de sol résilients - Classification

Elastische Bodenbeläge - Klassifizierung

This amendment A1 modifies the European Standard EN 685:1995; it was approved by CEN on 17 January 2003.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for inclusion of this amendment into the relevant national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

This amendment exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Slovakia, Spain, Sweden, Switzerland and United Kingdom.

**EN 685:1995/A1:2003 (E)****Foreword**

This document (EN 685:1995/A1:2003) has been prepared by Technical Committee CEN /TC 134 "Resilient, textile and laminate floor coverings", the secretariat of which is held by BSI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by October 2003, and conflicting national standards shall be withdrawn at the latest by October 2003.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Slovakia, Spain, Sweden, Switzerland and the United Kingdom.

*Replace the existing title of this European Standard by the following:*

"Resilient and laminate floor coverings — Classification"

*Replace the existing clause "1 Scope" by the following:*

## **1 Scope**

"This European Standard establishes a classification system for resilient and laminate floor coverings. The classification is based on practical requirements for areas of use and intensity of use and is linked to the requirements specified in the European Standard for each type of resilient or laminate floor covering.

The standard is also intended to give guidance to manufacturers, specifiers and consumers to enable them to choose the appropriate class of resilient or laminate floor covering for any given area of use or specific room.

NOTE The wear and appearance of resilient and laminate floor coverings are influenced by standards of installation and maintenance, the condition of the subfloor and the kind of use (type of footwear, high concentrations of localized traffic, etc.). These factors should be taken into account when using this classification system."
