About the IEC
The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications
The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue
The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - www.iec.ch/searchpub
The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,…). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished
Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org
The world's leading online dictionary of electronic and electrical terms containing 20 000 terms and definitions in English and French, with equivalent terms in 15 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary
65 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Customer Service Centre - webstore.iec.ch/csc
If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: csc@iec.ch.

A propos de l'IEC
La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC
Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Catalogue IEC - webstore.iec.ch/catalogue
Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

Recherche de publications IEC - www.iec.ch/searchpub
La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,…). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished
Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - www.electropedia.org
Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 15 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Glossaire IEC - std.iec.ch/glossary
65 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

Service Clients - webstore.iec.ch/csc
Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: csc@iec.ch.

CONTENTS

FOREWORD 10
INTRODUCTION 12
1 Scope 13
2 Normative references 13
3 Terms and definitions 14
4 Document contextual model and message assembly model basic concepts 15
4.1 Overview 15
4.2 European style market package structure (ESMP) 16
4.3 From the European style market profile to the document contextual model 18
4.4 From the document contextual model to the message assembly model 18
4.5 From the assembly model to the XML schema 18
5 The market information publication business process 18
5.1 General 18
5.2 The market information aggregator role 19
5.3 Market information publication business process 19
5.4 The use cases 20
5.4.1 General overview 20
5.4.2 Provide configuration information 21
5.4.3 Provide generation and load information 21
5.4.4 Provide actual availability and planned unavailability information 21
5.4.5 Provide balancing information 21
5.4.6 Provide network transmission related information 21
5.5 Sequence diagram 21
5.6 Electronic documents used 22
5.6.1 Configuration_MarketDocument 22
5.6.2 GenerationLoad_MarketDocument 22
5.6.3 Outage_MarketDocument 23
5.6.4 Balancing_MarketDocument 23
5.6.5 TransmissionNetwork_MarketDocument 23
5.6.6 Publication_MarketDocument 23
5.7 Generic business rules for documents 24
5.7.1 General 24
5.7.2 Document instance implementation 24
5.7.3 Rules governing the GenerationLoad_MarketDocument 25
5.7.4 Rules governing the Outage_MarketDocument 26
5.7.5 Rules governing the Balancing_MarketDocument 27
5.7.6 Rules governing the TransmissionNetwork_MarketDocument 27
5.7.7 Rules governing the Configuration_MarketDocument 27
5.7.8 Rules governing the Publication_MarketDocument 27
5.7.9 Rules governing the ProblemStatement_MarketDocument 27
6 Contextual and assembly models 28
6.1 GenerationLoad contextual model 28
6.1.1 Overview of the model 28
6.1.2 IsBasedOn relationships from the European style market profile 28
6.1.3 Detailed GenerationLoad contextual model 29
6.2 GenerationLoad assembly model 37

6.2.1 Overview of the model 37
6.2.2 IsBasedOn relationships from the European style market profile 38
6.2.3 Detailed GenerationLoad assembly model 39
6.2.4 Enumerations 44
6.3 Outage contextual model 44
6.3.1 Overview of the model 44
6.3.2 IsBasedOn relationships from the European style market profile 45
6.3.3 Detailed Outage contextual model 46
6.4 Outage assembly model 56
6.4.1 Overview of the model 56
6.4.2 IsBasedOn relationships from the European style market profile 57
6.4.3 Detailed Outage assembly model 58
6.4.4 Enumerations 64
6.5 Balancing contextual model 64
6.5.1 Overview of the model 64
6.5.2 IsBasedOn relationships from the European style market profile 65
6.5.3 Detailed Balancing contextual model 66
6.6 Balancing assembly model 75
6.6.1 Overview of the model 75
6.6.2 IsBasedOn relationships from the European style market profile 75
6.6.3 Detailed Balancing assembly model 76
6.6.4 Enumerations 82
6.7 TransmissionNetwork contextual model 82
6.7.1 Overview of the model 82
6.7.2 IsBasedOn relationships from the European style market profile 84
6.7.3 Detailed TransmissionNetwork contextual model 84
6.8 TransmissionNetwork assembly model 93
6.8.1 Overview of the model 93
6.8.2 IsBasedOn relationships from the European style market profile 94
6.8.3 Detailed TransmissionNetwork assembly model 95
6.8.4 Enumerations 100
6.9 Configuration contextual model 101
6.9.1 Overview of the model 101
6.9.2 IsBasedOn relationships from the European style market profile 101
6.9.3 Detailed Configuration contextual model 102
6.10 Configuration assembly model 111
6.10.1 Overview of the model 111
6.10.2 IsBasedOn relationships from the European style market profile 112
6.10.3 Detailed Configuration assembly model 112
6.10.4 Enumerations 117
7 XML schema 118
7.1 XML schema URN namespace rules 118
7.2 Code list URN namespace rules 118
7.3 URI rules for model documentation 118
7.3.1 Datatype 118
7.3.2 Class 119
7.3.3 Attribute 119
7.3.4 Association end role name 119
7.4 GenerationLoad_MarketDocument schema 120

INTERNATIONAL ELECTROTECHNICAL COMMISSION

_____

FRAMEWORK FOR ENERGY MARKET COMMUNICATIONS –

Part 451-6: Publication of information on market, contextual and assembly models for European style market

FOREWORD

1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
6) All users should ensure that they have the latest edition of this publication.
7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62325-451-6 has been prepared by IEC technical committee 57: Power systems management and associated information exchange.

The text of this standard is based on the following documents:

FDIS	Report on voting
57/1689/FDIS	57/1720/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 62325 series, published under the general title *Framework for energy market communications*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC website under "http://webstore.iec.ch" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

This part of IEC 62325 is one of the IEC 62325-451-x series for deregulated energy market data exchanges based on the European style market profile. This part of IEC 62325 defines the document contextual models, the message assembly models as well as the XML schemas to be used for the market information publication process, also called the transparency process.

The principal objective of the IEC 62325 series is to produce standards which facilitate the integration of market application software developed independently by different vendors into a market management system, between market management systems and market participant systems. This is accomplished by defining message exchanges to allow these applications or systems access to public data and exchange information independent of how such information is represented internally.

The common information model (CIM), i.e. IEC 62325-301, IEC 61970-301 and IEC 61968-11, specifies the basis for the semantics for message exchange.

This European style market profile is based on different parts of the CIM IEC standards and specifies the content of the messages exchanged.

This part of IEC 62325 provides, for the European style market profile, the publication (or transparency) information exchanges to submit either to a data aggregator or to an electronic publication platform the necessary information to be published about the electricity market. These market processes are based on the European regulations (No. 1227/2011 and No. 543/2013), and on the concepts of third party access and zonal markets. This part of IEC 62325 was originally based upon the work of the European Network of Transmission System Operators (ENTSO-E) Working Group EDI.
