## Intellectual Property Rights

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: *"Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards"*, which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<http://webapp.etsi.org/IPR/home.asp>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

---

## Foreword

This Technical Specification (TS) has been produced by ETSI Technical Committee Telecommunications and Internet converged Services and Protocols for Advanced Networking (TISPAN).

The present document is part 3 of a multi-part deliverable covering Telecommunications and Internet converged Services and Protocols for Advanced Networking (TISPAN) Network and Service Management; Network Resource Model, as identified below:

- Part 1: "Requirements";
- Part 2: "Information Service";
- Part 3: "eXtensible Markup Language (XML) Schema definition";**

2008-03

---

## 1 Scope

The present document identifies an XML schema definition for the manageable resources in the NGN Transport and Service Layers.

The present document is related to TS 188 005-2 [2].

---

## 2 References

References are either specific (identified by date of publication and/or edition number or version number) or non-specific.

- For a specific reference, subsequent revisions do not apply.
- Non-specific reference may be made only to a complete document or a part thereof and only in the following cases:
  - if it is accepted that it will be possible to use all future changes of the referenced document for the purposes of the referring document;
  - for informative references.

Referenced documents which are not found to be publicly available in the expected location might be found at <http://docbox.etsi.org/Reference>.

For online referenced documents, information sufficient to identify and locate the source shall be provided. Preferably, the primary source of the referenced document should be cited, in order to ensure traceability. Furthermore, the reference should, as far as possible, remain valid for the expected life of the document. The reference shall include the method of access to the referenced document and the full network address, with the same punctuation and use of upper case and lower case letters.

NOTE: While any hyperlinks included in this clause were valid at the time of publication ETSI cannot guarantee their long term validity.

### 2.1 Normative references

The following referenced documents are indispensable for the application of the present document. For dated references, only the edition cited applies. For non-specific references, the latest edition of the referenced document (including any amendments) applies.

- [1] ETSI TS 188 005-1: "Telecommunications and Internet converged Services and Protocols for Advanced Networking (TISPAN); NGN Management; Network Resource Model (NRM); Part 1: Requirements".
- [2] ETSI TS 188 005-2: "Telecommunications and Internet converged Services and Protocols for Advanced Networking (TISPAN); Network and Service Management; Network Resource Model; Part 2: Information Service".

### 2.2 Informative references

Not applicable.

---

### 3 Abbreviations

For the purposes of the present document, the following abbreviations apply:

IMS	IP Multimedia Subsystem
IS	Information Service
NRM	Network Resource Model
XML	eXtensible Markup Language

---

### 4 Structure and content of XML files

Annex A of the present document defines the NRM-specific XML schema ( `ngnNrm.xsd` ) for the NGN Network Resource Model (NRM) defined in TS 188 005-2 [2].

XML schema `ngnNrm.xsd` explicitly declares NRM-specific XML element types for the related NRM.

---

## Annex A (normative): Configuration data file NRM-specific XML schema (file name "ngnNrm.xsd")

The following XML schema ngnNrm.xsd is the NRM-specific schema for the NGN NRM IRP IS defined in TS 188 005-2 [2] and is contained in archive ts\_18800503v020000p0.zip which accompanies the present document.:
