This European Standard was approved by CENELEC on 2012-11-19. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## Contents

<b>Foreword</b> .....	<b>17</b>
<b>0 Introduction</b> .....	<b>18</b>
<b>0.1 Detailed structure of the standard</b> .....	<b>18</b>
<b>0.2 Part 1: General requirements - Common specifications</b> .....	<b>18</b>
<b>0.3 Part 2: National Normative Aspects</b> .....	<b>18</b>
<b>0.4 A-deviations</b> .....	<b>18</b>
<b>0.5 Special national conditions (snc)</b> .....	<b>18</b>
<b>0.6 National complements (NCPTs)</b> .....	<b>18</b>
<b>0.7 Language</b> .....	<b>18</b>
<b>1 Scope</b> .....	<b>19</b>
<b>1.1 General</b> .....	<b>19</b>
<b>1.2 Field of application</b> .....	<b>19</b>
<b>1.3 Structure of the European Standard EN 50341-1</b> .....	<b>19</b>
<b>2 Normative references, definitions and symbols</b> .....	<b>20</b>
<b>2.1 Normative references</b> .....	<b>20</b>
<b>2.2 Definitions</b> .....	<b>26</b>
<b>2.3 Symbols</b> .....	<b>35</b>
<b>3 Basis of design</b> .....	<b>43</b>
<b>3.1 Introduction</b> .....	<b>43</b>
<b>3.2 Requirements of overhead lines</b> .....	<b>44</b>
3.2.1 Basic requirements .....	44
3.2.2 Reliability requirements .....	45
3.2.3 Security requirements.....	46
3.2.4 Safety requirements.....	47
3.2.5 Strength coordination.....	47
3.2.6 Additional considerations.....	47
3.2.7 Design working life.....	47
3.2.8 Durability .....	47
3.2.9 Quality assurance .....	47
<b>3.3 Limit states</b> .....	<b>47</b>
3.3.1 General .....	47
3.3.2 Ultimate limit states.....	47
3.3.3 Serviceability limit states.....	48
<b>3.4 Actions</b> .....	<b>48</b>
3.4.1 Principal classifications.....	48
3.4.2 Classification of actions by their variation in time.....	48

3.4.3	Classification of actions by their nature and/or the structural response .....	49
<b>3.5</b>	<b>Characteristic values .....</b>	<b>49</b>
3.5.1	Characteristic value of an action .....	49
3.5.1.1	Action (F) .....	49
3.5.1.2	Permanent action (G) .....	49
3.5.1.3	Variable action (Q) .....	49
3.5.1.4	Accidental action (A) .....	49
3.5.2	Characteristic value of a material property .....	49
<b>3.6</b>	<b>Design values .....</b>	<b>49</b>
3.6.1	General .....	49
3.6.2	Design value of an action .....	49
3.6.3	Design value of a material property .....	50
3.6.4	Combination value of a variable action .....	50
<b>3.7</b>	<b>Partial factor method and design formula .....</b>	<b>50</b>
3.7.1	Partial factor method .....	50
3.7.2	Basic design formula .....	51
3.7.3	Total design value of the effect of combined actions .....	51
3.7.3.1	General .....	51
3.7.3.2	Design situations related to permanent and variable actions .....	51
3.7.3.3	Design situations related to permanent, variable and accidental actions .....	51
3.7.4	Structural design resistance .....	52
<b>4</b>	<b>Actions on lines .....</b>	<b>53</b>
<b>4.1</b>	<b>Introduction .....</b>	<b>53</b>
<b>4.2</b>	<b>Permanent loads .....</b>	<b>55</b>
<b>4.3</b>	<b>Wind loads .....</b>	<b>55</b>
4.3.1	Field of application and basic wind velocity .....	55
4.3.2	Mean wind velocity .....	55
4.3.3	Mean wind pressure .....	56
4.3.4	Turbulence intensity and peak wind pressure .....	57
4.3.5	Wind forces on any overhead line component .....	57
<b>4.4</b>	<b>Wind forces on overhead line components .....</b>	<b>58</b>
4.4.1	Wind forces on conductors .....	58
4.4.1.1	General .....	58
4.4.1.2	Structural factor .....	60
4.4.1.3	Drag factor .....	63

4.4.2	Wind forces on insulator sets .....	63
4.4.3	Wind forces on lattice towers.....	64
4.4.3.1	General .....	64
4.4.3.2	Method 1 .....	64
4.4.3.3	Method 2 .....	67
4.4.4	Wind forces on poles .....	68
<b>4.5</b>	<b>Ice loads .....</b>	<b>69</b>
4.5.1	General .....	69
4.5.2	Ice forces on conductors.....	69
<b>4.6</b>	<b>Combined wind and ice loads .....</b>	<b>70</b>
4.6.1	Combined probabilities .....	70
4.6.2	Drag factors and ice densities .....	71
4.6.3	Mean wind pressure and peak wind pressure .....	72
4.6.4	Equivalent diameter D of ice covered conductor.....	72
4.6.5	Wind forces on support for ice covered conductors .....	72
4.6.6	Combination of wind velocities and ice loads .....	73
4.6.6.1	Extreme ice load $I_T$ combined with a high probability wind velocity $V_{IH}$ .....	73
4.6.6.2	Nominal ice load $I_0$ combined with a low probability wind velocity $V_{IL}$ .....	73
<b>4.7</b>	<b>Temperature effects .....</b>	<b>74</b>
<b>4.8</b>	<b>Security loads.....</b>	<b>74</b>
4.8.1	General .....	74
4.8.2	Torsional loads .....	74
4.8.3	Longitudinal loads.....	75
4.8.4	Mechanical conditions of application .....	75
<b>4.9</b>	<b>Safety Loads .....</b>	<b>75</b>
4.9.1	Construction and maintenance loads .....	75
4.9.2	Loads related to the weight of line men .....	75
<b>4.10</b>	<b>Forces due to short-circuit currents .....</b>	<b>76</b>
<b>4.11</b>	<b>Other special forces.....</b>	<b>76</b>
4.11.1	Avalanches, creeping snow .....	76
4.11.2	Earthquakes.....	76
<b>4.12</b>	<b>Load cases.....</b>	<b>76</b>
4.12.1	General .....	76
4.12.2	Standard load cases .....	77
<b>4.13</b>	<b>Partial factors for actions.....</b>	<b>80</b>

<b>5</b>	<b>Electrical requirements</b> .....	<b>81</b>
<b>5.1</b>	<b>Introduction</b> .....	<b>81</b>
<b>5.2</b>	<b>Currents</b> .....	<b>82</b>
5.2.1	Normal current .....	82
5.2.2	Short-circuit current .....	82
<b>5.3</b>	<b>Insulation co-ordination</b> .....	<b>83</b>
<b>5.4</b>	<b>Classification of voltages and overvoltages</b> .....	<b>83</b>
5.4.1	General .....	83
5.4.2	Representative power frequency voltages .....	83
5.4.3	Representative temporary overvoltages .....	84
5.4.4	Representative slow-front overvoltages .....	84
5.4.5	Representative fast-front overvoltages .....	85
<b>5.5</b>	<b>Minimum air clearance distances to avoid flashover</b> .....	<b>85</b>
5.5.1	General .....	85
5.5.2	Application of the theoretical method in Annex E .....	86
5.5.3	Empirical method based on European experience .....	89
<b>5.6</b>	<b>Load cases for calculation of clearances</b> .....	<b>90</b>
5.6.1	Load conditions .....	90
5.6.2	Maximum conductor temperature .....	90
5.6.3	Wind loads for determination of electric clearances .....	90
5.6.3.1	Wind load cases .....	90
5.6.3.2	Nominal wind loads for determination of internal and external clearances .....	91
5.6.3.3	Extreme wind loads for determination of internal clearances .....	91
5.6.4	Ice loads for determination of electric clearances .....	91
5.6.5	Combined wind and ice loads .....	91
<b>5.7</b>	<b>Coordination of conductor positions and electrical stresses</b> .....	<b>91</b>
<b>5.8</b>	<b>Internal clearances within the span and at the top of support</b> .....	<b>92</b>
<b>5.9</b>	<b>External clearances</b> .....	<b>96</b>
5.9.1	General .....	96
5.9.2	External clearances to ground in areas remote from buildings, roads, etc. ....	97
5.9.3	External clearances to residential and other buildings .....	98
5.9.4	External clearances to crossing traffic routes .....	99
5.9.5	External clearances to adjacent traffic routes .....	100
5.9.6	External clearances to other power lines or overhead telecommunication lines .....	101
5.9.7	External clearances to recreational areas (playgrounds, sports areas, etc.) .....	102
<b>5.10</b>	<b>Corona effect</b> .....	<b>103</b>

5.10.1	Radio noise .....	103
5.10.1.1	General .....	103
5.10.1.2	Design influences .....	103
5.10.1.3	Noise limits.....	103
5.10.2	Audible noise .....	103
5.10.2.1	General .....	103
5.10.2.2	Design influences .....	104
5.10.2.3	Noise limit .....	104
5.10.3	Corona loss.....	104
<b>5.11</b>	<b>Electric and magnetic fields .....</b>	<b>104</b>
5.11.1	Electric and magnetic fields under a line .....	104
5.11.2	Electric and magnetic field induction .....	105
5.11.3	Interference with telecommunication circuits.....	105
<b>6</b>	<b>Earthing systems .....</b>	<b>106</b>
<b>6.1</b>	<b>Introduction .....</b>	<b>106</b>
6.1.1	Purpose.....	106
6.1.2	Requirements for dimensioning of earthing systems .....	106
6.1.3	Earthing measures against lightning effects.....	107
6.1.4	Transferred potentials.....	107
<b>6.2</b>	<b>Ratings with regard to corrosion and mechanical strength.....</b>	<b>107</b>
6.2.1	Earth electrodes.....	107
6.2.2	Earthing and bonding conductors.....	107
<b>6.3</b>	<b>Dimensioning with regard to thermal strength.....</b>	<b>107</b>
6.3.1	General .....	107
6.3.2	Current rating calculation.....	108
<b>6.4</b>	<b>Dimensioning with regard to human safety .....</b>	<b>108</b>
6.4.1	Permissible values for touch voltages .....	108
6.4.2	Touch voltage limits at different locations.....	108
6.4.3	Basic design of earthing systems with regard to permissible touch voltage .....	110
6.4.4	Measures in systems with isolated neutral or resonant earthing .....	112
<b>6.5</b>	<b>Site inspection and documentation of earthing systems .....</b>	<b>112</b>
<b>7</b>	<b>Supports.....</b>	<b>113</b>
<b>7.1</b>	<b>Initial design considerations .....</b>	<b>113</b>
7.1.1	Introduction .....	113
7.1.2	Structural design resistance of a pole .....	113

7.1.3	Buckling Resistance .....	113
<b>7.2</b>	<b>Materials.....</b>	<b>113</b>
7.2.1	Steel materials, bolts, nuts and washers, welding consumables .....	113
7.2.2	Cold formed steel.....	113
7.2.3	Requirements for steel grades subject to galvanising .....	113
7.2.4	Holding-down bolts .....	113
7.2.5	Concrete and reinforcing steel.....	114
7.2.6	Wood.....	114
7.2.7	Guy materials.....	114
7.2.8	Other materials .....	114
<b>7.3</b>	<b>Lattice steel towers.....</b>	<b>114</b>
7.3.1	General .....	114
7.3.2	Basis of design .....	114
7.3.3	Materials .....	114
7.3.4	Durability.....	114
7.3.5	Structural analysis.....	114
7.3.6	Ultimate limit states.....	115
7.3.6.1	General.....	115
7.3.6.2	Resistance of cross section areas.....	116
7.3.6.3	Tension, bending and compression resistance of members.....	116
7.3.6.4	Buckling resistance of members in compression .....	117
7.3.6.5	Buckling resistance of members in bending .....	117
7.3.7	Serviceability limit states.....	117
7.3.8	Resistance of connections.....	117
7.3.9	Design assisted by testing .....	117
7.3.10	Fatigue.....	117
<b>7.4</b>	<b>Steel poles .....</b>	<b>118</b>
7.4.1	General .....	118
7.4.2	Basis of design (EN 1993-1-1:2005 – Chapter 2) .....	118
7.4.3	Materials (EN 1993-1-1:2005 – Chapter 3) .....	118
7.4.4	Durability (EN 1993-1-1:2005 – Chapter 4).....	118
7.4.5	Structural analysis (EN 1993-1-1:2005 – Chapter 5) .....	118
7.4.6	Ultimate limit states (EN 1993-1-1:2005 – Chapter 6).....	118
7.4.6.1	General .....	118

7.4.6.2	Resistance of cross section areas .....	119
7.4.7	Serviceability limit states (EN 1993-1-1:2005 – Chapter 7).....	119
7.4.8	Resistance of connections .....	119
7.4.8.1	Basis .....	119
7.4.8.2	Bolts (other than holding-down bolts).....	119
7.4.8.3	Slip joint connections .....	119
7.4.8.4	Flanged bolted connections.....	120
7.4.8.5	Welded connections .....	120
7.4.8.6	Direct embedding into the concrete.....	120
7.4.8.7	Base plate and holding-down bolts.....	120
7.4.9	Design assisted by testing .....	121
<b>7.5</b>	<b>Wood poles.....</b>	<b>121</b>
7.5.1	General .....	121
7.5.2	Basis of design .....	121
7.5.3	Materials .....	121
7.5.4	Durability.....	121
7.5.5	Ultimate limit states.....	121
7.5.5.1	Basis.....	121
7.5.5.2	Calculation of internal forces and moments .....	121
7.5.5.3	Resistance of wood elements.....	122
7.5.5.4	Decay conditions .....	122
7.5.6	Serviceability limit states.....	123
7.5.7	Resistance of connections.....	123
7.5.8	Design assisted by testing .....	123
<b>7.6</b>	<b>Concrete poles .....</b>	<b>123</b>
7.6.1	General .....	123
7.6.2	Basis of design .....	123
7.6.2.1	General rules .....	123
7.6.2.2	Design load .....	123
7.6.2.3	Lateral reinforcement.....	124
7.6.3	Materials .....	124
7.6.4	Ultimate limit states.....	124
7.6.5	Serviceability limit states.....	124
7.6.6	Design assisted by testing .....	124

<b>7.7</b>	<b>Guyed structures .....</b>	<b>125</b>

<b>11.7</b>	<b>Durability requirements</b> .....	<b>146</b>
<b>11.8</b>	<b>Material selection and specification</b> .....	<b>146</b>
<b>11.9</b>	<b>Characteristics and dimensions of fittings</b> .....	<b>146</b>
<b>11.10</b>	<b>Type test requirements</b> .....	<b>146</b>
	11.10.1 Standard type tests.....	146
	11.10.2 Optional type tests .....	147
<b>11.11</b>	<b>Sample test requirements</b> .....	<b>147</b>
<b>11.12</b>	<b>Routine test requirements</b> .....	<b>147</b>
<b>11.13</b>	<b>Test reports and certificates</b> .....	<b>147</b>
<b>11.14</b>	<b>Selection, delivery and installation of fittings</b> .....	<b>147</b>

<b>12</b>	<b>Quality assurance, checks and taking-over</b> .....	<b>148</b>
<b>12.1</b>	<b>Quality assurance</b> .....	<b>148</b>
<b>12.2</b>	<b>Checks and taking-over</b> .....	<b>148</b>
<b>Annex A (informative)</b>	<b>Strength coordination</b> .....	<b>149</b>
<b>A.1</b>	<b>Recommended design criteria</b> .....	<b>149</b>
<b>A.2</b>	<b>Proposed strength coordination</b> .....	<b>149</b>
<b>Annex B (informative)</b>	<b>Conversion of wind velocities and ice loads</b> .....	<b>151</b>
<b>B.1</b>	<b>Definition of symbols used in this annex B</b> .....	<b>151</b>
<b>B.2</b>	<b>Evaluation of extreme wind velocity data</b> .....	<b>151</b>
<b>B.3</b>	<b>Evaluation of extreme ice load data</b> .....	<b>152</b>
<b>B.4</b>	<b>Statistical ice parameters</b> .....	<b>153</b>
B.4.1	Basic ice load, $I_B$ .....	153
B.4.2	Yearly maximum ice load, $I_m$ .....	153
B.4.3	Maximum ice load over several years, $I_{max}$ .....	153
B.4.4	Mean value, $I_{mm}$ of yearly maximum ice loads .....	153
B.4.5	Coefficient of variation, $v_i$ for yearly maximum ice loads.....	153
<b>B.5</b>	<b>Extreme ice load evaluation based on various data sources</b> .....	<b>153</b>
B.5.1	Data sources for statistical evaluation .....	153
B.5.2	Yearly maxima ice loads, $I_m$ during periods of at least 10 years are available .....	154
B.5.3	Maximum ice load, $I_{max}$ is known only for a limited number of years.....	154
B.5.4	Yearly maximum ice load, $I_m$ , based on meteorological analyses.....	154
<b>Annex C (informative)</b>	<b>Application examples of wind loads - Special forces</b> .....	<b>155</b>
<b>C.1</b>	<b>Application examples of the calculation of wind loads as defined in 4.3 and 4.4</b> .....	<b>155</b>
C.1.1	Example 1 : Typical 24 kV wood pole tangent support .....	155
C.1.2	Example 2 : Typical 225 kV suspension lattice tower .....	157
<b>C.2</b>	<b>Special forces</b> .....	<b>159</b>
C.2.1	Definition of symbols used in this annex C.2 .....	159
C.2.2	Forces due to short-circuit currents.....	159
C.2.3	Avalanches, creeping snow.....	160
C.2.4	Earthquakes .....	160
<b>Annex D (informative)</b>	<b>Statistical data for the Gumbel distribution of extremes</b> .....	<b>161</b>
<b>D.1</b>	<b>Definition of symbols used in this annex</b> .....	<b>161</b>
<b>D.2</b>	<b>The Gumbel distribution</b> .....	<b>161</b>
<b>D.3</b>	<b>Example of using <math>C_1</math> and <math>C_2</math></b> .....	<b>164</b>
<b>D.4</b>	<b>Calculation of <math>C_1</math> and <math>C_2</math></b> .....	<b>165</b>
<b>Annex E (normative)</b>	<b>Theoretical method for calculating minimum air clearances</b> .....	<b>169</b>
<b>E.1</b>	<b>Definition of symbols used in this annex</b> .....	<b>169</b>

<b>E.2 Insulation co-ordination</b> .....	<b>170</b>
E.2.1 Development of theoretical formulae for calculating electrical distances.....	170
E.2.2 Representative voltages and overvoltages $U_{rp}$ .....	171
E.2.3 Co-ordination withstand voltage $U_{cw}$ .....	173
E.2.4 Required withstand voltage of the air gap, $U_{rw}$ .....	173
E.2.5 Relationship with the clearance distance of the air gap .....	174
E.2.5.1 Statistical approach .....	174
E.2.5.2 Deviation factors.....	174
E.2.5.3 Gap factors .....	175
E.2.5.4 Insulation response to overvoltages .....	176
<b>E.3 Calculation formulae for the minimum air clearances</b> .....	<b>177</b>
<b>E.4 Examples of calculation of <math>D_{el}</math>, <math>D_{pp}</math> and <math>D_{50\text{ Hz}}</math> for different <math>U_s</math> voltages (informative) ....</b>	<b>179</b>
E.4.1 Range I: 90 kV system equipped with insulator strings composed of 6 units .....	179
E.4.2 Range I: 90 kV system equipped with insulator strings composed of 9 units .....	180
E.4.3 Range II : 400 kV system .....	181
<b>Annex F (informative) Empirical method for calculating mid span clearances</b> .....	<b>183</b>
<b>F.1 Empirical method for the determination of clearances within the span</b> .....	<b>183</b>
<b>F.2 Approximate method for conductors with different cross-sections, materials or sags</b> .....	<b>184</b>
<b>F.3 Contribution of the insulator set to the determination of clearances at supports</b> .....	<b>184</b>
<b>Annex G (normative) Calculation methods for earthing systems</b> .....	<b>186</b>
<b>G.1 Definition of symbols used in this annex</b> .....	<b>186</b>
<b>G.2 Minimum dimensions of earth electrodes</b> .....	<b>187</b>
<b>G.3 Current rating calculation</b> .....	<b>187</b>
<b>G.4 Touch voltage and body current</b> .....	<b>190</b>
G.4.1 Equivalence between touch voltage and body current .....	190
G.4.2 Calculation taking into account additional resistances .....	192
<b>Annex H (informative) Installation and measurements of earthing systems</b> .....	<b>194</b>
<b>H.1 Definition of symbols used in this annex</b> .....	<b>194</b>
<b>H.2 Basis for the verification</b> .....	<b>194</b>
H.2.1 Soil resistivity.....	194
H.2.2 Resistance to earth .....	195
<b>H.3 Installation of earth electrodes and earthing conductors</b> .....	<b>197</b>
H.3.1 Installation of earth electrodes .....	197
H.3.1.1 Earth electrodes .....	197
H.3.1.2 Horizontal earth electrodes .....	197
H.3.1.3 Vertical or inclined driven rods .....	197
H.3.1.4 Jointing the earth electrodes .....	197
