This European Standard was approved by CENELEC on 2013-08-19. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.¹⁻²⁻²⁰¹⁴

<https://standards.iteh.ai/catalog/standards/sist/1225683c-96a7-4907-a58a->

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Foreword

This document (EN 50551-2:2013) has been prepared by CLC/TC 86A "Optical fibres and optical fibre cables".

The following dates are fixed:

- latest date by which this document has (dop) 2014-08-19
to be implemented at national level by publication of an identical national standard or by endorsement
- latest date by which the national (dow) 2016-08-19
standards conflicting with this document have to be withdrawn

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights.
CENELEC [and/or CEN] shall not be held responsible for identifying any or all such patent rights.

EN 50551 is composed with the following parts:

- EN 50551-1, *Simplex and duplex cables to be used for cords — Part 1: Blank Detail Specification and minimum requirements;*
- EN 50551-2, *Simplex and duplex cables to be used for cords — Part 2: Detailed specification and minimum requirements for a 3,0 mm simplex ruggedised single mode fibre cable to be used for patchcords/cords category U.*

iTeh STANDARD PREVIEW

This European Standard was jointly prepared by the Technical Committee CLC/TC 86A "Optical fibres and optical fibre cables", and the Technical Committee CLC/TC 86BXA "Fibre optic interconnect, passive and connectorised components".

SIST EN 50551-2:2014

1 Scope

This European Standard describes the minimum set of requirements that a simplex ruggedised single mode fibre cable shall meet in order to allow termination with a connector for use in category U (Uncontrolled Environment).

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

Buffer	<ul style="list-style-type: none"> - Material - Nominal outer diameter 	
Sheath	<p style="text-align: center;">SIST EN 50551-2:2014</p> <ul style="list-style-type: none"> - Material https://standards.iteh.ai/catalog/standards/sist/1225683c-96a7-4907LSZH (see fire requirements) - Maximum diameter 241832d5e02a/sist-en-50551-2-2014 - Nominal thickness 3,0 mm ± 0,2 mm - Thickness tolerances - Colour Yellow recommended 	
Additional armouring (if required)	<ul style="list-style-type: none"> - Non-metallic armouring - Metallic armouring 	
Marking identification	<ul style="list-style-type: none"> - Customer requirement 	

(8) Application information	
Application (work area cord, equipment cord, patchcord, etc.)	Work area cord, equipment cord, patchcord
Maximum tensile load (short term load for installation)	$\geq 150 \text{ N}$ Max fibre strain 0,45 % at max tensile load
Number of repeated bending	500 cycles
Minimum bending radius for operation	30 mm
Minimum bending radius for installation	60 mm because of bending and tension at the same time (dynamic)
Temperature range :	
- Transport and storage	-45 °C to +70 °C
- Installation	-5 °C to +45 °C
- Operation	-25 °C to +70 °C
Fire performance	IEC 60332-3-25 EN 61034-1/-2 and IEC 60754-1/-2 or according to local regulations
