Luft- und Raumfahrt - Zylinderschrauben, Sechsbogenzahn, langes Gewinde, aus Titanlegierung TI-P64001, anodisiert, MoS2 beschichtet - Festigkeitsklasse: 1 100 MPa (bei Raumtemperatur)

This European Standard was approved by CEN on 11 September 2003.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

## Foreword

This document (EN 3725:2004) has been prepared by the European Association of Aerospace Manufacturers - Standardization (AECMA-STAN).

After enquiries and votes carried out in accordance with the rules of this Association, this Standard has received the approval of the National Associations and the Official Services of the member countries of AECMA, prior to its presentation to CEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by May 2005, and conflicting national standards shall be withdrawn at the latest by May 2005.

This document supersedes EN 3725:2003.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

## EN 3725:2004 (E)

**1 Scope**

This standard specifies the characteristics of pan head screws with six lobe recess, threaded to head, in TI-P64001, anodized, MoS<sub>2</sub> coated, for aerospace applications.

Strength class: 1 100 MPa <sup>1)</sup>

NOTE Taking account of the recess geometry, the strength class to be used for the seating torque calculation shall not be greater than 900 MPa.

**2 Normative references**

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 3353-1, *Aerospace – Lead and runout threads – Part 1: Rolled external threads*

ISO 5855-2, *Aerospace – MJ threads – Part 2: Limit dimensions for bolts and nuts*

EN 2424, *Aerospace series – Marking of aerospace products*

EN 2491, *Aerospace series – Molybdenum disulphide dry lubricants – Coating methods*

EN 3813, *Aerospace series – Titanium alloy TI-P64001 – Annealed – Bar and wire for forged fasteners –  $D_e \leq 25 \text{ mm}^2$*

EN 3818, *Aerospace series – Bolts, MJ threads, in titanium alloy TI-P64001 – Strength class: 1 100 MPa (at ambient temperature) – Technical specification*

EN 3905, *Aerospace series – Six lobe recesses for bolts – Technical specification* <sup>2)</sup>

EN 3911, *Aerospace series – Six lobe recess – Geometrical definition*

**3 Required characteristics****3.1 Configuration – Dimensions – Tolerances – Masses**

See Figure 1 and Tables 1 and 2.

Dimensions and tolerances are in millimetres. They apply after anodizing but before MoS<sub>2</sub> coating.

**3.2 Materials**

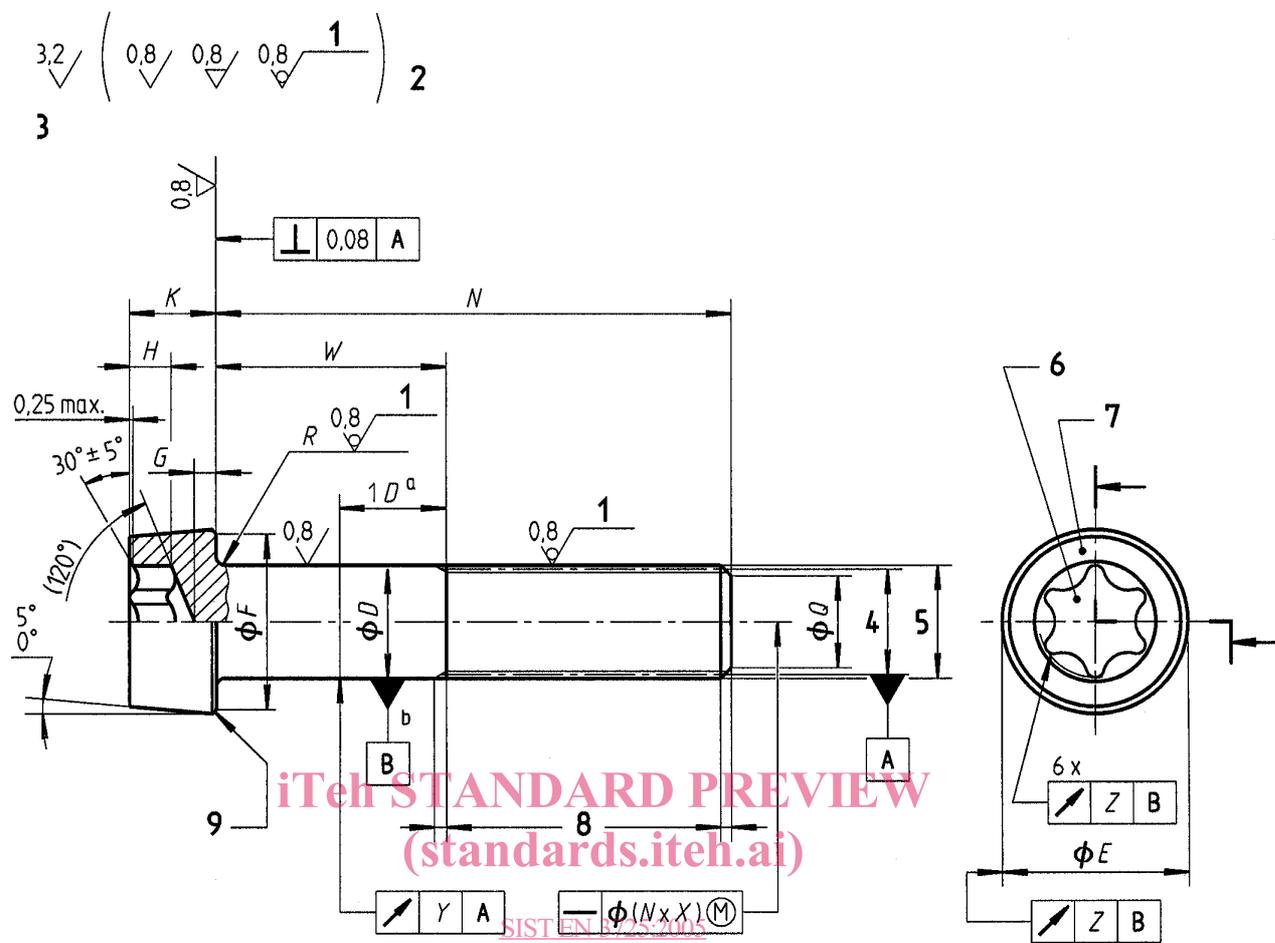

EN 3813

**3.3 Surface treatment**

EN 2491

1) Minimum tensile strength of the material at ambient temperature

2) Published as AECMA Prestandard at the date of publication of this standard

<https://standards.itech.ai/catalog/standards/sist/5cfc4b27-db9f-4b75-b38c-43e32f4cd456/sist-en-3725-2005>

**Key**

- 1 rolled
- 2 values apply before MoS<sub>2</sub> coating
- 3 remove sharp edges 0,1 to 0,4
- 4 pitch diameter

- 5 thread
- 6 six lobe recess to EN 3911
- 7 marking
- 8 conforms to ISO 3353-1
- 9 shape in this area at manufacturer's option

<sup>a</sup> When the length of the shank is less than one times the nominal value of the shank diameter  $D$ , the run-out is measured at a distance equal to half the actual shank length.

<sup>b</sup> For bolts having a shank length less than one times the nominal value of the shank diameter  $D$ , and for those threaded to head, the pitch diameter axis shall be used as the datum.
