About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - www.iec.ch/searchpub

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms, containing 20 000 terms and definitions in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

65 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: csc@iec.ch.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Catalogue IEC - webstore.iec.ch/catalogue

Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

Recherche de publications IEC - www.iec.ch/searchpub

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - www.electropedia.org

Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Glossaire IEC - std.iec.ch/glossary

65 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: csc@iec.ch.

FOREWORD	9
INTRODUCTION	11
1 Scope	14
2 Normative references	16
3 Terms and definitions	19
3.1 Transformers	20
3.2 General terms	23
3.3 Operations and protections	24
3.4 Circuits and windings	26
3.5 Ratings	27
3.6 No-load values	29
3.7 Insulation	29
3.8 Touch current and protective earthing conductor current	33
4 General requirements	33
5 General notes on tests	34
6 Ratings	36
7 Classification	36
8 Marking and other information	37
9 Protection against electric shock	43
9.1 General	43
9.2 Protection against contact with hazardous-live-parts	44
9.2.1 Determination of hazardous-live-parts	44
9.2.2 Accessibility to hazardous-live-parts	44
9.2.3 Accessibility to non hazardous-live-part	47
9.3 Protection against hazardous electrical discharge	47
10 Change of input voltage setting	47
11 Output voltage and output current under load	48
12 No-load output voltage	49
13 Short-circuit voltage	49
14 Heating	49
14.1 General requirements	49
14.1.1 Temperature-rise test	49
14.1.2 Alternative temperature-rise test	51
14.1.3 Determination of steady-state conditions	54
14.2 Application of 14.1 or 14.3 according to the insulation system	55
14.3 Accelerated ageing test for undeclared class of insulation system	56
14.3.1 General	56
14.3.2 Heat run	56
14.3.3 Vibration	57
14.3.4 Moisture treatment	57
14.3.5 Measurements	57
15 Short circuit and overload protection	57
15.1 General requirements	57
15.1.1 Short circuit and overload test method	57

15.1.2	Alternative short circuit and overload test method	60
15.2	Inherently short-circuit proof transformers	60
15.3	Non-inherently short-circuit proof transformers	60
15.4	Non-short-circuit proof transformers	61
15.5	Fail-safe transformers	61
16	Mechanical strength	62
16.1	General	62
16.2	Stationary transformers	62
16.3	Portable transformers (except portable transformers with integral pins for introduction in socket-outlet in the fixed wiring)	63
16.4	Portable transformers provided with integral pins for introduction in socket-outlets of the fixed wiring	63
16.4.1	General requirements	63
16.4.2	Portable transformers provided with integral pins according to EN 50075 (IEC plug type C) for introduction in socket-outlets of the fixed wiring	64
16.5	Additional requirements for transformers to be used in vehicles and railway applications	65
16.5.1	Transformers to be used in vehicles and railway applications	65
16.5.2	Test requirements for the transportation of transformers	66
17	Protection against harmful ingress of dust, solid objects and moisture	67
17.1	Degrees of protection provided by enclosures (IP code)	67
17.1.1	General requirements	67
17.1.2	Tests on transformers with enclosure	68
17.2	Humidity treatment	70
18	Insulation resistance, dielectric strength and leakage current	71
18.1	General	71
18.2	Insulation resistance	71
18.3	Dielectric strength test	72
18.4	Insulation between and within windings	74
18.5	Touch current and protective earthing conductor current	74
18.5.1	General	74
18.5.2	Touch current	75
18.5.3	Protective earthing conductor current	76
19	Construction	77
19.1	General construction	77
19.1.1	General	77
19.1.2	Auto-transformers	77
19.1.3	Separating transformers	78
19.1.4	Isolating transformers and safety isolating transformers	79
19.2	Flammability of materials	81
19.3	Short-circuit characteristics of portable transformers	81
19.4	Class II transformer contact prevention of accessible conductive parts	81
19.5	Class II transformer insulation reassembling after service	81
19.6	Loosening of wires, screws or similar parts	82
19.7	Resistor or capacitor connection with accessible conductive parts	82
19.8	Bridging of separated conductive parts by resistors or capacitors	82
19.9	Insulating material separating input and output windings	83
19.10	Accidental contact protection against hazardous-live-parts provided by isolating coating	83

19.11	Insulating material of handles, operating levers, knobs and similar parts.....	84
19.12	Winding construction.....	84
19.13	Fixing of handles, operating levers and similar parts.....	88
19.14	Fixing of covers providing protection against electric shock.....	88
19.15	Strain on fixed socket-outlets caused by pin-transformers connection.....	89
19.16	Portable transformers for use in irregular or harsh conditions.....	89
19.17	Drain hole of transformers protected against ingress of water.....	89
19.18	Plug connected transformers protected against ingress of water.....	89
19.19	Flexible cable or flexible cord connection for class I portable transformers.....	89
19.20	SELV- and PELV-circuit separation of live parts.....	89
19.21	Protection against contact for FELV-circuit.....	90
19.22	Protective earthing regarding class II transformers.....	90
19.23	Protective earthing regarding class III transformers.....	91
20	Components.....	91
21	Internal wiring.....	96
22	Supply connection and other external flexible cables or cords.....	96
23	Terminals for external conductors.....	103
24	Provisions for protective earthing.....	104
25	Screws and connections.....	106
26	Creepage distances, clearances and distances through insulation.....	108
26.1	General.....	108
26.2	Creepage distances and clearances.....	109
26.2.1	General.....	109
26.2.2	Windings covered with adhesive tape.....	109
26.2.3	Uncemented insulating parts.....	109
26.2.4	Cemented insulating parts.....	109
26.2.5	Enclosed parts (e.g. by impregnation or potting).....	110
26.3	Distance through insulation.....	111
27	Resistance to heat, fire and tracking.....	122
27.1	General.....	122
27.2	Resistance to heat.....	122
27.2.1	General.....	122
27.2.2	External accessible parts.....	122
27.2.3	Internal parts.....	123
27.3	Resistance to abnormal heat under fault conditions.....	123
27.4	Resistance to fire.....	124
27.4.1	General.....	124
27.4.2	External accessible parts.....	125
27.4.3	Internal parts.....	125
27.5	Resistance to tracking.....	126
28	Resistance to rusting.....	126

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**SAFETY OF TRANSFORMERS, REACTORS,
POWER SUPPLY UNITS AND COMBINATIONS THEREOF –****Part 1: General requirements and tests****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
<https://standards.iteh.ai/catalog/standards/sist/a9c19052-9ef9-4373-be8d-51ced4f65a0c/iec-61558-1-2017>
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61558-1 has been prepared by IEC technical committee 96: Transformers, reactors, power supply units and combinations thereof.

This third edition cancels and replaces the second edition published in 2005 and Amendment 1:2009. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) fully insulated winding wires (FIW), new tables and aging tests for FIW constructions,
- b) overvoltage categories 1, 2, 3 and 4 for clearances and dielectric strength tests (new tables) are included,
- c) development of new symbols for the different overvoltage categories,
- d) symbol for maximum altitudes, if higher than 2 000 m,
- e) symbol for plug in power supply units, if the pins are damaged (tumbling barrel test),

- f) symbol for minimum temperature (even during the transportation),
- g) alternative temperature measurement, simulated load and back to back method according to IEC 60076-11,
- h) short circuit and overload protection, simulated load and back to back method according to IEC 60076-11,
- i) adjustment of temperatures in Table 2 according to CENELEC Guide 29,
- j) establishing partial discharge test above 750 V for FIW constructions,
- k) requirements for toroidal core constructions, division for basic and for supplementary isolation,
- l) modification of protection indexes for enclosures (IP-code),
- m) dimensioning of rectangular cross section connectors for transformers,
- n) repetition test, 80 % of required dielectric strength test voltage of Table 14,
- o) vibration test for vehicles and railway applications,
- p) two Y1 Capacitors for working voltages above 250 V and not exceeding 500 V with overvoltage category 3.

The text of this International Standard is based on the following documents:

FDIS	Report on voting
96/466/FDIS	96/468/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

It has the status of a group safety publication in accordance with IEC Guide 104.

A list of all parts of the IEC 61558 series, published under the general title *Safety of transformers, reactors, power supply units and combination thereof*, can be found on the IEC website.

Future standards in this series will carry the new general title as cited above. Titles of existing standards in this series will be updated at the time of the next edition.

In this document, the following print types are used:

- proper requirements: in roman type;
- *test specifications: in italic type*;
- explanatory matters: in smaller roman type.

In the text of the document, the words in **bold** are defined in Clause 3.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "http://webstore.iec.ch" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

INTRODUCTION

This document covers safety requirements for **transformers**. Where the term **transformer** is used, it covers **transformers**, **reactors** and **power supply units** where applicable.

During the development of this document, to the extent possible, the requirements of IEC 60364 (all parts) were taken into consideration, so that a **transformer** can be installed in accordance with the wiring rules contained in that document. However, national wiring rules can differ.

This document recognizes the internationally accepted levels of protection against the possible electrical, mechanical, and fire hazards caused by **transformers** operating under normal conditions in accordance with the manufacturer's instructions. It also covers abnormal conditions which can occur in practice.

A **transformer** complying with this document will not necessarily be judged to comply with the safety principles of this document if, when examined and tested, it is found to have other features that impair the level of safety covered by these requirements.

A **transformer** employing materials or having forms of construction differing from those detailed in this document may be examined and tested according to the intent of the requirements and, if found to be substantially equivalent, may be judged to comply with the safety principles of this document.

The document dealing with non-safety aspects of electromagnetic compatibility (EMC) of **transformers** is IEC 62041. However, that document also includes tests that can subject the **transformer** to conditions involving safety aspects.

The objective of IEC 61558-1 is to provide a set of requirements and tests considered to be generally applicable to most types of **transformers**, and which can be called up as required by the relevant part of IEC 61558-2. IEC 61558-1 is thus not to be regarded as a specification by itself for any type of **transformer**, and its provisions apply only to particular types of **transformers** to the extent determined by the appropriate part of IEC 61558-2. IEC 61558-1 also contains normative routine tests.

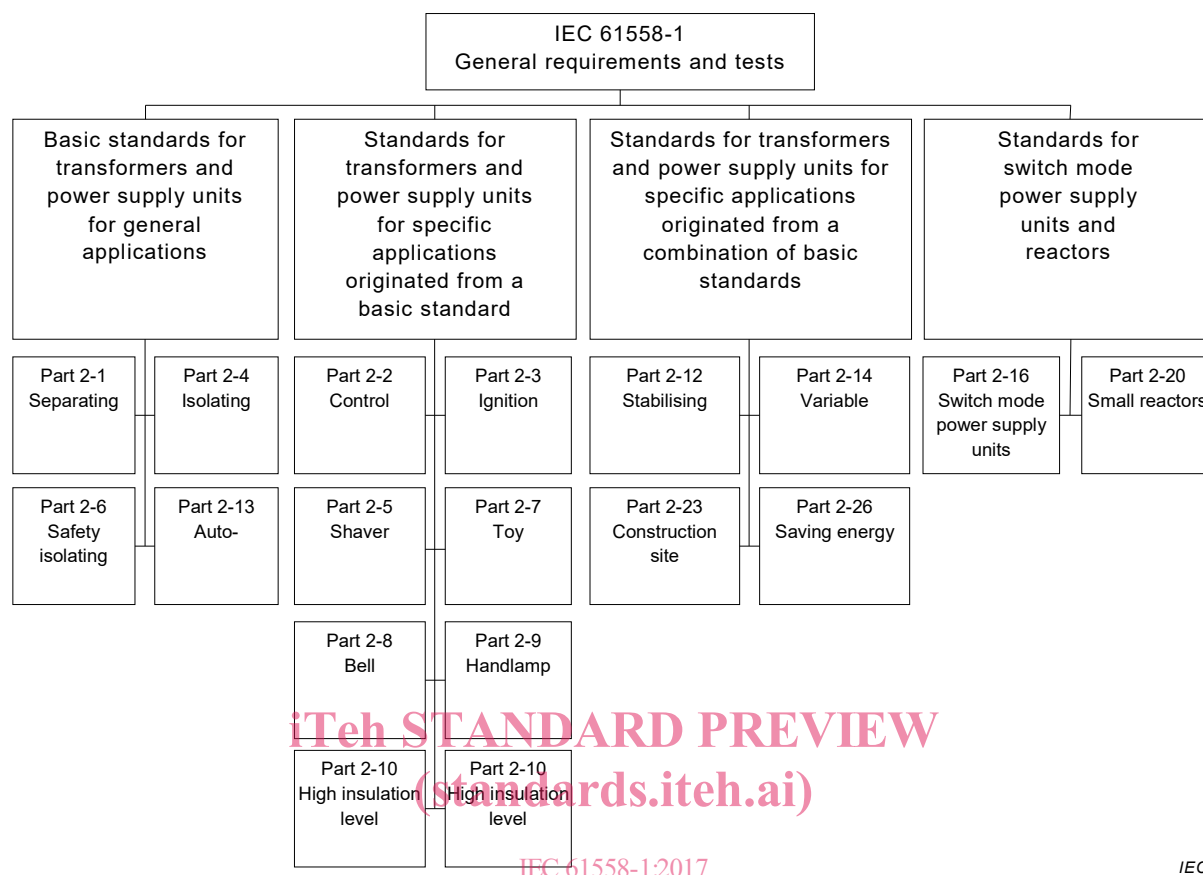

Each part of IEC 61558-2 in conjunction with this document contains all the necessary requirements for the **transformer** being covered and does not contain references to other parts of IEC 61558-2. For **transformers** with a protection index IP00 and associated **transformers**, it is possible to have circuits corresponding to different parts of IEC 61558-2 within the same construction (e.g. SELV output circuit according to IEC 61558-2-6 and a 230 V output circuit according to IEC 61558-2-4). However, if the **transformer** is covered by different parts IEC 61558-2, to the extent reasonable, the relevant part of IEC 61558-2 is applied to each function/application separately. If applicable, the effect of one function on the other is taken into consideration.

If an appropriate part of IEC 61558-2 does not exist for a particular **transformer** or group of **transformers**, the nearest applicable part may be used as a guide to the requirements and tests.

However, individual countries may wish to consider its application, to the extent reasonable, to transformers not mentioned in the IEC 61558-2 series, and to transformers designed on new principles.

Where the requirements of any of the clauses of a part of IEC 61558-2 refer to IEC 61558-1 by the phrase "This clause of Part 1 is applicable", this phrase means that all the requirements of that clause of IEC 61558-1 are applicable, except those requirements that are clearly not applicable to the particular type of **transformer** covered by that part of IEC 61558-2.

The principle for the preparation of the different parts of IEC 61558-2 is as shown in Figure 1.

IEC

Figure 1 – IEC 61558 principle

Relevant clauses of this document (e.g. clauses dealing with thermal endurance test for windings) apply also to **transformers** forming an integral part of an appliance and which cannot be tested separately.

The IEC 61558 series consists of the following parts, under the general title *Safety of transformers, reactors, power supply units and combination thereof*:¹

- Part 1: General requirements and tests
- Part 2-1: Particular requirements and tests for separating transformers for general applications
- Part 2-2: Particular requirements and tests for control transformers
- Part 2-3: Particular requirements and tests for ignition transformers for gas and oil burners
- Part 2-4: Particular requirements and tests for isolating transformers
- Part 2-5: Particular requirements and tests for shaver transformers and shaver supply units
- Part 2-6: Particular requirements and tests for safety isolating transformers
- Part 2-7: Particular requirements and tests for transformers for toys
- Part 2-8: Particular requirements and tests for transformers for bells and chimes
- Part 2-9: Particular requirements and tests for transformers for class III handlamps for tungsten filament lamps

¹ Some of the parts of this series published earlier appeared under the general title *Safety of power transformers, power supplies, reactors and similar products or Safety of power transformers, power supply units and similar or Safety of power transformers, power supply units and similar devices*. Future editions of these parts will be issued under the new general title indicated above.

- Part 2-10: Particular requirements and tests for separating transformers with high insulation level and separating transformers with output voltages exceeding 1 000 V
 - Part 2-12: Particular requirements and tests for constant voltage transformers
 - Part 2-13: Particular requirements and tests for auto transformers
 - Part 2-14: Particular requirements and tests for variable transformers
 - Part 2-15: Particular requirements and tests for isolating transformers for the supply of medical locations
 - Part 2-16: Particular requirements and tests for switch mode power supply units and transformers for switch mode power supply units
 - Part 2-20: Particular requirements and tests for small reactors
 - Part 2-23: Particular requirements and tests for transformers and power supply units for construction sites
 - Part 2-26: Particular requirements and tests for transformers and power supply units all for saving energy and other purposes
- Other parts are under consideration.
