Delete NOTE 1 and substitute with the new NOTE 1 shown below.

"NOTE 1 Armourstone used in construction should comply with all the requirements of this European Standard. As well as familiar and traditional natural and manufactured armourstone Mandate M/125 "Aggregates" included recycled armourstone and some materials from new or unfamiliar sources. Recycled armourstone are included in the standards and new test methods for them are at an advanced stage of preparation. For unfamiliar materials from secondary sources, however, the work on standardisation has only started recently and more time is needed to define clearly the origins and characteristics of these materials. In the meantime such unfamiliar materials when placed on the market as armourstone must comply fully with this standard and national regulations for dangerous substances (see Annex ZA of the standard) depending upon their intended use. Additional characteristics and requirements may be specified on a case by case basis depending upon experience of use of the product, and defined in specific contractual documents."
