### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

#### IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a Divariety of criteria (reference number, text, technical pu committee, ...). It also gives information on projects, replaced ha and withdrawn publications.

IEC online collection - oc.iec.ch

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

### Electropedia - www.electropedia.org

**IEC Just Published - webstore.iec.ch/justpublished** Stay up to date on all new IEC publications. Just Published details all new publications released. Available online (and)20 once a month by email.

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 18 additional languages. Also known as the International Electrotechnical Vocabulary

### **IEC Customer Service Centre - webstore.iec.ch/csc**dc9c19/iec-60205-2016 If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

### A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

#### A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

### Recherche de publications IEC -

### webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

### IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

### Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

#### IEC online collection - oc.iec.ch

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

#### Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 000 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

# iTeh STANDARD PREVIEW (standards.iteh.ai)

# INTERNATIONAL ELECTROTECHNICAL COMMISSION

# CALCULATION OF THE EFFECTIVE PARAMETERS OF MAGNETIC PIECE PARTS

# FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user. STANDARD PREVEW
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of <u>conformity.Olf</u>dependent certification bodies provide conformity assessment services and in some areas access to IEC marks of conformity.<u>JEC is</u> not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60205 has been prepared by IEC technical committee 51: Magnetic components, ferrite and and magnetic powder materials.

This fourth edition cancels and replaces the third edition published in 2006 and Amendment 1:2009. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) addition, in 5.1, of the drawing of a core of rectangular cross-section with chamfer;
- b) addition, in 5.1.3, of the equation of a core of rectangular cross-section with chamfer;
- c) equations in 5.1.4, 5.6, 5.7, 5.8, 5.9, 5.11, 5.12, 5.14 are amended or replaced;
- d) drawings RM6-S and RM6-R in 5.7 are amended;
- e) addition of EC-cores, see 5.15.

The text of this standard is based on the following documents:

FDIS	Report on voting
51/1149/FDIS	51/1156/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "http://webstore.iec.ch" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

The contents of the corrigendum of July 2018 have been included in this copy.

# iTeh STANDARD PREVIEW (standards.iteh.ai)

## INTRODUCTION

The purpose of this revision is to provide formulae by which everybody can reach the same effective parameter values. Firstly, it is necessary to have a sufficient number of significant figures when figures are rounded off in the process of calculation. Additionally, some of the calculation formulae have been changed to get closer to the actual shape.

In this revision, the basic idea of calculation has not been changed. Recently, analysis of the magnetic field in the core has been considerably improved, so that, based on these ideas, development of new approaches and formulae can be expected.

Furthermore, the new "EC-cores" have been added.

The parameters in the existing IEC standards will be revised with the outcome from the formulae of this document.

# iTeh STANDARD PREVIEW (standards.iteh.ai)

# CALCULATION OF THE EFFECTIVE PARAMETERS OF MAGNETIC PIECE PARTS

## 1 Scope

This document specifies uniform rules for the calculation of the effective parameters of closed circuits of ferromagnetic material.

## 2 Normative references

There are no normative references in this document.

## 3 Terms and definitions

No terms and definitions are listed in this document.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at http://www.electropedia.org/
- ISO Online browsing platform Savailable at http://www.iso.org/obp

### 4 Basic rules applicable to this standard 2016

https://standards.iteh.ai/catalog/standards/sist/38e6dd8a-a5ab-4694-ad89-

**4.1** All results shall be expressed in units based on millimetres, shall be accurate to three significant figures, but to derive  $l_e$ ,  $A_e$  and  $V_e$  the values of  $C_1$  and  $C_2$  shall be calculated to five significant figures. All angles are in radians.

NOTE The purpose of specifying this degree of accuracy is only to ensure that parameters calculated at different establishments are identical and it is not intended to imply that the parameters are capable of being determined to this accuracy.

**4.2**  $A_{min}$  is the nominal value of the smallest cross-section.  $A_g$  is the geometrical crosssection of a ring core with rectangular shape. All the dimensions used to calculate  $A_{min}$  shall be the mean values between the tolerance limits quoted on the appropriate piece part drawing. All results shall be expressed in units based on millimetres, and shall be accurate to three significant figures.

The minimum physical cross-section area  $A_{\min}$  is given as:  $A_{\min} = \min(A_i)$ 

NOTE  $A_{g}$  to be used for the measurement of the saturation flux density  $B_{max}$  on ring cores with rectangular cross-section.

**4.3** Calculations are only applicable to the component parts of a closed magnetic circuit.

**4.4** All dimensions used for the purpose of calculations shall be the mean value within the tolerance limits quoted on the appropriate piece part drawing.

**4.5** All irregularities in the outline of the core, such as small cut-outs, notches, chamfers, etc. shall be ignored unless otherwise described.

**4.6** When the calculation involves the sharp corner of a piece part, then the mean length of flux path for that corner shall be taken as the mean circular path joining the centres of area of the two adjacent uniform sections, and the cross-sectional area associated with that length shall be taken as the average area of the two adjacent uniform sections.

Calculation of effective parameters  $l_{e}$ ,  $A_{e}$  and  $V_{e}$ .

The effective parameters can be defined as

$$l_{e} = C_{1}^{2}/C_{2}$$
  $A_{e} = C_{1}/C_{2}$   $V_{e} = l_{e}A_{e} = C_{1}^{3}/C_{2}^{2}$ 

where

 $l_{e}$  is the effective magnetic length of the core (mm);

 $A_{e}$  is the effective cross-sectional area (mm<sup>2</sup>);

 $V_{e}$  is the effective volume (mm<sup>3</sup>);

 $C_1$  is the core constant (mm<sup>-1</sup>);

 $C_2$  is the core constant (mm<sup>-3</sup>).

### 5 Formulae for the various types of cores

## 5.1 Ring cores

# 5.1.1 Ring cores in general (standards.iteh.ai)

Drawings of ring cores are shown in Figure 1.

## Figure 1 – Ring cores

$$C_1 = \frac{2\pi}{h_{\mathsf{e}} \ln(d_1/d_2)}$$

$$C_2 = \frac{4\pi (1/d_2 - 1/d_1)}{{h_e}^2 \ln^3 (d_1/d_2)}$$

### 5.1.2 For ring cores of rectangular cross-section with sharp corners

$$h_{e} = h$$

The geometrical cross-section of a ring core with rectangular shape  $A_{g}$  is given as:

$$A_{g} = h \frac{d_2 - d_1}{2}$$

# 5.1.3 For ring cores of rectangular cross-section with an appreciable average rounding radius $r_0$

$$h_{\rm e} = h(1-k_1)$$
  $k_1 = \frac{1,7168r_0^2}{h(d_1-d_2)}$ 

### 5.1.4 For ring cores of rectangular cross-section with appreciable chamfer $c_0$

$$h_{e} = h(1-k_{3})$$
  $k_{3} = \frac{4c_{0}^{2}}{h(d_{1}-d_{2})}$ 

The geometrical cross-section of a ring core with appreciable chamfer shape  $A_{g}$  is given as:

iTeh STAND 
$$A_{A_g} = h \frac{A_2 B_1}{2c_0} P_{2c_0}$$
  
(standards.iteh.ai)

5.1.5 For ring cores of trapezoidal cross-section with sharp corners <u>IEC 60205:2016</u> https://standards.iteh.ai/catalog/standards/s/tfane@ub-4694-ad89-

ps://standards.iteh.ai/catalog/standards/
$$h(\tan \omega 4/\tan \beta)$$
  
 $h_e = 4.4 e \sqrt{2} g_{2} g_{1} g_{2} e = 6020 g_{1}^{-2} d_{2}^{-1}$ 

5.1.6 For ring cores of trapezoidal cross-section with an appreciable average rounding radius  $r_0$ 

$$h_{\mathsf{e}} = h\big(1 - k_1 - k_2\big)$$

### 5.1.7 For ring cores of cross-section with circular arc frontal sides

$$h_{e} = h - \frac{d_{1} - d_{2}}{4\sin^{2}(\varphi/2)} \left( 2\sin\frac{\varphi}{2} - \frac{\sin\varphi}{2} - \frac{\varphi}{2} \right)$$
$$\varphi = 2\arcsin\frac{d_{1} - d_{2}}{4r}.$$

When the winding is uniformly distributed over a ring core, it may be expected that, at all points inside the ring core, the flux lines will be parallel to its surface.

No leakage flux will therefore leave or enter the ring core. This justifies the use of a theoretically more correct derivation of the effective parameters, which does not make use of the assumption that the flux is uniformly distributed over the cross-section.

## 5.2 Pair of U-cores of rectangular section

Drawings of a pair of U-cores of the rectangular section are shown in Figure 2.

Figure 2 – Pair of U-cores of the rectangular section

Length of flux path associated with area  $A_2$ :

iTeh STANDARD PREVIEW (standards.iteh.ai)

Mean length of flux paths at corners:

 $\frac{\text{IEC } 60205:2016}{\text{https://standards.iteh.ai/catalog/standards/_rist/38e6dd8a-a5ab-4694-ad89-4e490d49t14/iec-roughts-2016}$ 

$$l_5 = l'_5 + l''_5 = \frac{\pi}{4} (s+h)$$

Mean areas associated with  $l_4$  and  $l_5$ :

$$A_{4} = \frac{A_{1} + A_{2}}{2}$$
$$A_{5} = \frac{A_{2} + A_{3}}{2}$$
$$C_{1} = \sum_{i=1}^{5} \frac{l_{i}}{A_{i}} \quad C_{2} = \sum_{i=1}^{5} \frac{l_{i}}{A_{i}^{2}}$$

# 5.3 Pair of U-cores of rounded section

Drawings of a pair of U-cores of the rounded section are shown in Figure 3.

Figure 3 – Pair of U-cores of rounded section

In calculating  $A_2$  ignore any ridges introduced for the purpose of facilitating manufacture.

Length of flux path associated with area  $A_2$ :

iTeh STANDARD PREVIEW  $l_2 = l'_2 + l''_2$ (standards.iteh.ai)

Mean length of flux path at corners:

 $\frac{\text{IEC } 60205:2016}{\text{https://standards.iteh.ai/catalog/standards/sist/38e6dd8a-a5ab-4694-ad89-464490d49t1l4/iez-6(pg-h)16}{464490d49t1l4/iez-6(pg-h)16}$ 

$$l_5 = l'_5 + l''_5 = \frac{\pi}{4} (s+h)$$

Mean areas associated with  $l_4$  and  $l_5$ :

$$A_4 = \frac{A_1 + A_2}{2}$$

$$A_5 = \frac{A_2 + A_3}{2}$$

$$C_1 = \sum_{i=1}^5 \frac{l_i}{A_i}$$
  $C_2 = \sum_{i=1}^5 \frac{l_i}{A_i^2}$ 

# 5.4 Pair of E-cores of rectangular section

Drawings of a pair of E-cores of the rectangular section are shown in Figure 4.

- 12 -

Figure 4 – Pair of E-cores of rectangular section

Area of half the centre limb:  $A_3$ 

Mean length of flux paths at corners: ANDARD PREVIEW (standards.iteh.ai)  $l_4 = \frac{\pi}{8}(p+h)$ IEC 60205:2016 https://standards.iteh.ai/catalog/standards/sist/38e6dd8a-a5ab-4694-ad89- $4e4e9q_5 = \frac{\pi}{8}(\frac{id_260}{2}h)^{-2016}$ 

Mean areas associated with  $l_4$  and  $l_5$ :

$$A_{4} = \frac{A_{1} + A_{2}}{2}$$
$$A_{5} = \frac{A_{2} + A_{3}}{2}$$
$$C_{1} = \sum_{i=1}^{5} \frac{l_{i}}{A_{i}} \quad C_{2} = \sum_{i=1}^{5} \frac{l_{i}}{2A_{i}^{2}}$$

## 5.5 Pair of ETD/EER-cores

Drawings of a pair of ETD/EER-cores are shown in Figure 5.

- 13 -

 $A_{1} \text{ is equal to the rectangle } b\left(\frac{1}{2}a-c\right) \text{ less the cap or segment } A_{c} \\ \textbf{iTeh STANDARD PREVIEW} \\ A_{c} = \frac{(\text{standar}(ds))}{4} \frac{(1+b)}{2} \frac{(1+b)}{4} \frac{2}{2} \frac{1}{2}b^{2} \frac{1}{2}b^{2}}{\frac{1+b}{2}} \\ \frac{1+b}{4} \frac{1}{2}ab \frac{4}{4}b \sqrt{4} \frac{2}{2} \frac{1}{2}b^{2} \frac{1}{2}b^{2} \frac{1}{2}ab \frac{4}{2}b^{2} \frac{1}{2}b^{2} \frac{1}$ 

Mean length of flux path at back walls:

$$l_2 = \frac{1}{4} \left( d_2 + \sqrt{d_2^2 - b^2} \right) - \frac{d_3}{2}$$

NOTE  $l_2$  is taken from the mean value of  $\frac{1}{2}(d_2 - d_3)$  and  $(c - d_3 / 2)$ .

Area of half the centre limb:

$$A_3 = A'_3 + A''_3$$

The condition to obtain  $A'_3 = A''_3$  is

$$S_1 = 0,2980d_3$$

Mean length of flux path at corners:

$$l_4 = \frac{\pi}{8} (p+h)$$
