1 Modification in clause 1 Scope

Amend the existing "NOTE" to read "NOTE 1" and add the following "NOTE 2":

"NOTE 2 For coarse aggregate between 4 mm and 20 mm the percentage of crushed or broken surfaces is linked to the flow coefficient and can therefore be used in association with the test method specified in EN 933-6."

2 Modification in clause 3 Definitions

3.9

crushed or broken surfaces

Amend the second sentence of the definition to read as follows:

"If both the surface and the edges of a particle of crushed or broken gravel are worn or weathered then it shall be considered as rounded for the purposes of this test method."
