Add a new definition:**3.xx****suction cup**

means of temporarily attaching a toy to a smooth surface made of soft, flexible, polymeric material, normally having a circular base which adheres to the surface when pressed against it thus creating a vacuum

Add a new requirement in clause 5:**5.14 Suction cups**

- a) Loose suction cups, removable suction cups and suction cups attached to a toy by a string, elastic cord or similar tether shall not pass entirely through template E when tested according to 8.34 (small balls and suction cups test)
- b) Suction cups that become detached from a toy when tested according to 8.3 (torque test), 8.4.2.1 (tension test, general), 8.5 (drop test), 8.7 (impact test) and 8.8 (compression test) shall not pass entirely through template E when tested according to 8.34 (small balls and suction cups test) and shall still continue to comply with relevant requirements of this part of EN 71-1.

Position and clamp test template E shown in Figure Y in EN 71-1:1998/A8:2003 so that the axis of the slot is substantially vertical and the slot is unobstructed at its top and bottom openings.

Place the ball or suction cup without compressing it and in any orientation in the slot so that the force on the ball or suction cup is only the force due to its mass.

Determine whether the ball or suction cup passes entirely through template E.
