This European Standard was approved by CENELEC on 2013-03-05. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## Foreword

The text of document 100/2070/FDIS, future edition 1 of IEC 62731, prepared by IEC/TC 100 "Audio, video and multimedia systems and equipment" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN 62731:2013.

The following dates are fixed:

- latest date by which the document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2013-12-05
- latest date by which the national standards conflicting with the document have to be withdrawn (dow) 2016-03-05

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC [and/or CEN] shall not be held responsible for identifying any or all such patent rights.

## Endorsement notice

The text of the International Standard IEC 62731:2013 was approved by CENELEC as a European Standard without any modification.

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

---

**TEXT-TO-SPEECH FOR TELEVISION –  
GENERAL REQUIREMENTS**
**FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62731 has been prepared by IEC technical committee 100: Audio, video and multimedia systems and equipment.

The text of this standard is based on the following documents:

FDIS	Report on voting
100/2070/FDIS	100/2109/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

## **iTeh STANDARD PREVIEW (standards.iteh.ai)**

[SIST EN 62731:2013](#)

<https://standards.iteh.ai/catalog/standards/sist/c902db9b-e4b5-41dd-a829-41430b0acc85/sist-en-62731-2013>

## TEXT-TO-SPEECH FOR TELEVISION – GENERAL REQUIREMENTS

### 1 Scope

This International Standard specifies the text-to-speech functionality for a (broadcast) receiver with a text-to-speech system. Such a system may be one device, i.e. a receiver with an integrated text-to-speech generator, or may be two devices, i.e. a receiver interfacing with an external text-to-speech device. This International Standard applies only to completely functional stationary (or semi-stationary) digital TV receivers such as set top boxes, integrated digital TVs, recorders and other products whose primary function is to receive TV content. Where this standard refers to TV, this will be shorthand for all such receivers.

This International Standard does not apply to products that are capable of receiving TV as a secondary function (e.g. PCs or game consoles with digital television receivers). It also does not apply to sub-assemblies (e.g. PC tuner cards).

### 2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

(void) [SIST EN 62731:2013  
https://standards.iteh.ai/catalog/standards/sist/c902db9b-e4b5-41dd-a829-41430b0acc85/sist-en-62731-2013](https://standards.iteh.ai/catalog/standards/sist/c902db9b-e4b5-41dd-a829-41430b0acc85/sist-en-62731-2013)

### 3 Terms, definitions and abbreviations

#### 3.1 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

##### 3.1.1 context

one specific function of a TV

EXAMPLE Watching TV, EPG, etc.

##### 3.1.2 DTV broadcast event

set of related broadcast streams with a defined start and end time, commonly referred to as a TV programme

Note 1 to entry: DTV events have typically the following properties associated with them: start time, end time or duration, content synopsis, additional content information, parental rating and availability of subtitles or audio description.

##### 3.1.3 DTV service information

metadata describing broadcasting content and its scheduling and timing details

Note 1 to entry: The purpose of DTV service information is to aid the end user to select and schedule viewing and recording, and also to select the equipment configuration.

**3.1.4****DTV broadcast event classification**

general category of programme/event content, or its classification

EXAMPLES Movie (drama), news/current affairs, talk show, sports (football), etc.

**3.1.5****EPG filter**

filter that organises or reduces the list of displayed EPG items according to certain criteria

EXAMPLES Of criteria are to show only:

- programmes with a certain content type;
- favourites;
- programmes that are audio described;
- programmes for a given time period (for instance "today", "tomorrow", "next 7 days").

**3.1.6****event**

trigger to start an action

**3.1.7****list**

collection of items

**3.1.8****menu**

subsequent order of items

**iTeh STANDARD PREVIEW**  
(standards.iteh.ai)

**3.1.9****receiver**

device capable of receiving or handling digital television signals

[SIST EN 62731:2013](https://standards.iteh.ai/catalog/standards/sist/c902db9b-e4b5-41dd-a829-41d30b07c085/sist-en-62731-2013)

[https://standards.iteh.ai/catalog/standards/sist/c902db9b-e4b5-41dd-a829-](https://standards.iteh.ai/catalog/standards/sist/c902db9b-e4b5-41dd-a829-41d30b07c085/sist-en-62731-2013)

[41d30b07c085/sist-en-62731-2013](https://standards.iteh.ai/catalog/standards/sist/c902db9b-e4b5-41dd-a829-41d30b07c085/sist-en-62731-2013)

**3.1.10****service**

sequence of programs under the control of a broadcaster which can be broadcast as part of a schedule

**3.1.11****subtitle**

textual representation of the dialogue (and frequently additional auditory information), typically shown at the bottom of the screen

Note 1 to entry: Subtitles can be a textual rendering in the same language as the spoken dialogue, or can provide a written translation in a different language.

Note 2 to entry: In some parts of the world subtitles are called "(closed) captions", and subtitling is referred to as "(closed) captioning".

Note 3 to entry: This standard uses the term subtitles throughout.

**3.1.12****TTS audio**

audio output by the TTS engine in correspondence with TTS data

Note 1 to entry: If the TV uses an external TTS converter, TTS audio is interpreted as TTS data.

**3.1.13****TTS data**

(text) data converted into TTS audio information by the text-to-speech engine

## 3.2 Abbreviations

For the purposes of this document, the following abbreviations apply.

DTV	digital television
EPG	electronic programme guide
STB	set top box
TTS	text-to-speech
TV	television
UI	user interface

## 4 Guiding principles and conventions

This standard describes the required basic behaviour for a TV text-to-speech combination in a basic profile, but also provides for enhanced profiles. It also gives a short introduction into the basic problems of visually impaired people: i.e. what are the problems visually impaired people experience when using and watching TV?

Providing text-to-speech functionality for a broadcast receiver, e.g. TV or STB can be of great help to (visually) disabled people. Such speech functionality may be integrated in the receiver or may be external to the receiver in a separate device.

In general as the guiding principle, when building a TTS interface in the context of this standard, implementers should aspire to achieve functional equivalence of the user experience. This means that a person operating the device using the speech interface should have access to similar information and be able to accomplish similar tasks as with a graphical UI.

[SIST EN 62731:2013](https://standards.iteh.ai/catalog/standards/sist/c902db9b-e4b5-41dd-a829-414908acc0531-62731-2013)

[https://standards.iteh.ai/catalog/standards/sist/c902db9b-e4b5-41dd-a829-](https://standards.iteh.ai/catalog/standards/sist/c902db9b-e4b5-41dd-a829-414908acc0531-62731-2013)

The main features of this International Standard are:

- basic functional description for a TV-TTS device combination or TV with integrated TTS;
- profiles for different levels of TV-TTS functionality;
- targeted towards the digital TV application.

In this standard mandatory requirements are specified; optional and informative features are also included.

A claim of conformity with this standard requires conformity with all mandatory requirements. A TV-TTS device combination or a TV with a TTS that is integrated may provide options for a user to enable or disable product features.

## 5 User requirements of visually impaired people

### 5.1 Users' needs

This subclause 5.1 explains the needs of visually impaired people as the primary target users for a TV with TTS. Unless these needs are met, the system is not accessible to this user group. Visually impaired people experience access barriers in the course of the following activities when watching TV:

- a) following TV programming, e.g. the TV series;
- b) using a remote control;
- c) not being able to see subtitles;
- d) navigating channels;
