English version

Foreword

Spelling error in the title of Part 2 – amend – ‘...maintenance to be....’

2

Note year of publication - EN 12385-4:2002

5.3.1 and 5.3.2

There are some instances where the symbol for coefficient of utilization is not in italics (but not the suffix). In all cases it should be ' Z_p '.

5.3.1

In the second formula, ' C_L ' should be ' k '.

In Note 2, replace ' C_L ' with ' k '

5.3.2 iTeh STANDARD PREVIEW

In the formula, ' k ' should be ' K_T ' (to be consistent with EN 13414-1 and avoid confusion with spinning loss factor for ropes, which also uses the symbol ' k ').

In the formula, ' C_L ' should be ' k ' [SIST EN 13414-3:2004/AC:2004
https://standards.iteh.ai/catalog/standards/sist/6be63f06-416e-4668-96ad-ee719631ac8/sist-en-13414-3-2004-ac-2004](https://standards.iteh.ai/catalog/standards/sist/6be63f06-416e-4668-96ad-ee719631ac8/sist-en-13414-3-2004-ac-2004)

Below the formula replace symbol k and text with the following:
' K_T is a factor which allows for the efficiency of the termination'

Below the formula replace symbol C_L and text with the following:
' k is a factor which allows for the spinning loss in cabling. Currently this is taken as 0,9.'

Below the formula replace 'For cable-laid ... be 0,9' with the following:
'For the turn-back eye ferrule-secured termination conforming to prEN 13411-3 K_T shall be 0,9 and for spliced terminations K_T shall be 0,8.'

B.1

Correct the identification of the figures – should be ‘a’ and ‘b’ [NOT ‘A’ and ‘B’] to align with the text.

B.2

Replace ‘(L_4)’ with ‘(L)’ in the text (twice)

Annex E

- g) – after circumference add ‘(L)’
- i) – delete - as already covered by g) and re-number accordingly
- j) – delete ‘(AL)’ and amend to ‘Actual length or circumference (L_m)’
- k) – replace ‘(D)’ with ‘(d_m)’
- l) – delete – (no eyes in grommet according to this standard)
- m) – delete - (no eyes in grommet according to this standard)
- n) – replace ‘(PD)’ with ‘(D)’

iTeh STANDARD PREVIEW (standards.iteh.ai)

- g) - after circumference add ‘(L)’ [SIST EN 13414-3:2004/AC:2004](#)
- i) – delete - as already covered by g) and re-number accordingly [https://standards.iteh.ai/standard/iut/1-6386-416e-4668-96ad-ee719fe31ac8/sist-en-13414-3-2004-ac-2004](#)
- j) – replace ‘(AL)’ with ‘(L_m)’
- k) – replace ‘(D)’ with ‘(d_m)’
- l) – replace ‘($E1$)’ with ‘(h_1)’
- m) – replace ‘($E2$)’ with ‘(h_2)’
- n) – delete ‘(S1)’ and amend to ‘Approximate splice length from beginning of eye to last tuck – splice 1’
- o) - delete ‘(S2)’ and amend to ‘Approximate splice length from beginning of eye to last tuck – splice 2’
- p) – delete ‘(TL1 and TL2)’ and amend to two separate sub-clauses, i.e. ‘Tail length – splice 1’ and ‘Tail length – splice 2’
- q) – delete ‘(LS)’
- r) – replace ‘(PD)’ with ‘(D)’

EN 13414-3:2003/AC:2004 (E)

Annex G

Some confusion arises from the terms used in the headings above the tables and the tables themselves.

For example, **Table G.1** covers ‘cable-laid grommet slings’ – therefore, this term should be used, viz. ‘Table G.1 – Working load limits for cable-laid grommet slings made of wire ropes with steel cores of classes 6 x 19 and 6 x 36’

In the table itself, replace ‘Endless sling (Grommet)’ with ‘Endless sling (Cable-laid grommet)’.

In the table, replace ‘calculation factor’ with ‘rating factor’ (as this is a factor which enables the rating of the sling to be modified according to its configuration).

In the table itself amend the factors to ‘1’ and ‘0,8’ (NOT ‘2’ and ‘1,6’)

For clarification, the term ‘Nominal rope diameter’ should be replaced by ‘Nominal diameter of cable-laid grommet’ to avoid any confusion with the nominal diameter of the unit rope which is used to form the cable-laid grommet.

A summary of the required amendments to Table G.1 and the other Tables in this Annex is as follows: (Also, note that the tables are re-aligned for consistency with those in EN 13414-1)

In addition, **Table G.5** contains serious errors, viz.

Two-leg sling (align with Table 3 of EN 13414-1)
Three- and four-leg sling (align with Table 3 of EN 13414-1)

Left hand column – replace ‘0° up to 45°’ with ‘0° to 45°’
 Right hand column – replace ‘over 45° to 60°’ with ‘over 45° to 60°’

[Note the hyphens before leg, i.e. ‘Two-leg’, ‘Three-leg’; ‘Four-leg’. These must be inserted.]

Table G.1 – Working load limits for cable-laid grommet slings made of wire ropes with steel cores of classes 6 x 19 and 6 x 36
