This amendment A1 modifies the European Standard EN 60695-2-13:2010; it was approved by CENELEC on 2014-03-19. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this amendment the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This amendment exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Foreword

The text of document 89/1199/FDIS, future IEC 60695-2-13:2010/A1, prepared by IEC TC 89, Fire hazard testing, was submitted to the IEC-CENELEC parallel vote and was approved by CENELEC as EN 60695-2-13:2010/A1:2014.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN and CENELEC shall not be held responsible for identifying any or all such patent rights.

The following dates were fixed:

- latest date by which the EN has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2014-12-19
- latest date by which the national standards conflicting with the EN have to be withdrawn (dow) 2017-03-19

Endorsement notice

The text of the International Standard IEC 60695-2-13:2010/A1:2014 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standards indicated:

IEC 60695-2-11

NOTE Harmonized as EN 60695-2-11.

ISO/IEC 13943:2008

NOTE Harmonized as EN ISO 13943:2010.

FOREWORD

This amendment has been prepared by technical committee 89: Fire hazard testing.

The text of this amendment is based on the following documents:

FDIS	Report on voting
89/1199/FDIS	89/1208/RVD

Full information on the voting for the approval of this amendment can be found in the report on voting indicated in the above table.

The committee has decided that the contents of this amendment and the base publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

iTeh STANDARD PREVIEW (standards.iteh.ai)

INTRODUCTION

Replace the sixth paragraph of the Introduction by the following:

Fires involving electrotechnical products can also be initiated from external non-electrical sources. Considerations of this nature should be dealt with in the overall fire hazard assessment.

Replace the seventh paragraph of the Introduction by the following:

This part of IEC 60695 describes a glow-wire ignition temperature test method for materials. It should be used to measure, describe, and rank the properties of materials in response to heat caused by contact with an electrically heated wire under controlled laboratory conditions. This may be useful for the evaluation of materials for use in products that may be exposed to excess thermal stress such as a fault current flowing through a wire, overloading of components, and/or bad connections. It should not be used to solely describe or appraise the fire hazard or fire risk of materials, products, or assemblies under actual fire conditions. However, results of this test may be used as elements of a fire hazard assessment which takes into account all of the factors which are pertinent to a particular end use.

1 Scope

Replace item b) of the second paragraph of the Scope by the following:

- b) sustained flaming combustion does not occur for a time longer than 5 s for any single flame event and the specimen is not totally consumed.

[SIST EN 60695-2-13:2011/A1:2014](https://standards.iteh.ai/catalog/standards/sist/92e13734-f119-4dfb-96fd-c3c5948e0372/sist-en-60695-2-13-2011-a1-2014)

<https://standards.iteh.ai/catalog/standards/sist/92e13734-f119-4dfb-96fd-c3c5948e0372/sist-en-60695-2-13-2011-a1-2014>

2 Normative references

Remove the dates from the following existing references:

IEC Guide 104, *The preparation of safety publications and the use of basic safety publications and group safety publications*

ISO/IEC Guide 51, *Safety aspects – Guidelines for inclusion in standards*

ISO 293, *Plastics – Compression moulding of test specimens of thermoplastic materials*

ISO 295, *Plastics – Compression moulding of test specimens of thermosetting materials*

Remove the following references:

IEC 60695-2-11, *Fire hazard testing – Part 2-11: Glowing/hot-wire based test methods – Glow-wire flammability test method for end-products*

ISO/IEC 13943:2008, *Fire safety – Vocabulary*

4.2 Test specimen dimensions

Replace the note to 4.2 by the following:
