EUROPEAN STANDARD

**EN 61869-6**

NORME EUROPÉENNE

EUROPÄISCHE NORM

December 2016

ICS 17.220.20

Supersedes EN 60044-7:2000 (partially),  
EN 60044-8:2002 (partially)

English Version

**Instrument transformers - Part 6: Additional general requirements for low-power instrument transformers (IEC 61869-6:2016)**

Transformateurs de mesure - Partie 6: Exigences générales supplémentaires concernant les transformateurs de mesure de faible puissance (IEC 61869-6:2016)

Messwandler - Teil 6: Zusätzliche allgemeine Anforderungen für Kleinsignal-Messwandler (IEC 61869-6:2016)

This European Standard was approved by CENELEC on 2016-06-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

**EN 61869-6:2016****European foreword**

The text of document 38/501/FDIS, future edition 1 of IEC 61869-6, prepared by IEC/TC 38 "Instrument transformers" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN 61869-6:2016.

The following dates are fixed:

- latest date by which the document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2017-06-23
- latest date by which the national standards conflicting with the document have to be withdrawn (dow) 2019-12-23

This document is to be read jointly with, and is based on, EN 61869-1:2009, *General requirements*. However, the reader is encouraged to use the most recent edition of that document.

This document follows the structure of EN 61869 series and supplements or modifies the corresponding clauses in EN 61869-1 Standard.

When a particular clause/subclause of Part 1, is not mentioned in this Part 6, that clause/subclause applies as far as is reasonable. When this standard states "addition", "modification" or "replacement", the relevant text in Part 1 is to be adapted accordingly.

For additional clauses, subclauses, figures, tables, annexes or notes, the following numbering system is used:

– clauses, subclauses, tables, figures and notes that are numbered starting from 601 are additional to those in Part 1;

– additional annexes are lettered 6A, 6B, etc.

This document, jointly with EN 61869-1:2009, supersedes EN 60044-7:2000 (partially) and EN 60044-8:2002 (partially).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC [and/or CEN] shall not be held responsible for identifying any or all such patent rights.

**Endorsement notice**

The text of the International Standard IEC 61869-6:2016 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standards indicated:

IEC 60044-7:1999	NOTE	Harmonized as EN 60044-7:2000 (not modified).
IEC 60044-8:2002	NOTE	Harmonized as EN 60044-8:2002 (not modified)
IEC 61508-1	NOTE	Harmonized as EN 61508-1.
IEC 61508-3	NOTE	Harmonized as EN 61508-3.
IEC 61850 Series	NOTE	Harmonized as EN 61850 Series.
IEC 61869 Series	NOTE	Harmonized as EN 61869 Series.
IEC 61869-5	NOTE	Harmonized as EN 61869-5.
IEC 61869-9	NOTE	Harmonized as EN 61869-9.
IEC 61869-10	NOTE	Harmonized as EN 61869-10.
IEC 61869-11	NOTE	Harmonized as EN 61869-11.

## Annex ZA (normative)

### Normative references to international publications with their corresponding European publications

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE 1 When an International Publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

NOTE 2 Up-to-date information on the latest versions of the European Standards listed in this annex is available here: [www.cenelec.eu](http://www.cenelec.eu)

#### Annex ZA of EN 61869:2009 is applicable with the following additions:

## CONTENTS

FOREWORD.....	6
1 Scope.....	10
2 Normative reference .....	10
3 Terms and definitions .....	13
3.1 General terms and definitions .....	13
3.2 Terms and definitions related to dielectric ratings and voltages.....	17
3.3 Terms and definitions related to current ratings .....	17
3.4 Terms and definitions related to accuracy .....	21
3.5 Terms and definitions related to other ratings.....	26
3.7 Index of abbreviations and symbols .....	26
4 Normal and special service conditions.....	28
4.2 Normal service conditions .....	28
4.2.3 Vibrations or earth tremors .....	28
4.2.601 Partially outdoor LPIT .....	28
5 Ratings.....	28
5.3 Rated insulation levels and voltages .....	28
5.3.5 Insulation requirements for secondary terminals .....	28
5.3.601 Rated auxiliary power supply voltage ( $U_{ar}$ ).....	28
5.4 Rated frequency.....	29
5.5 Rated output .....	29
5.5.601 Rated burden ( $R_{br}$ ) .....	29
5.5.602 Standard values for the rated delay time ( $t_{dr}$ ) .....	29
5.6 Rated accuracy class .....	30
6 Design and construction .....	30
6.7 Mechanical requirements.....	30
6.11 Electromagnetic compatibility (EMC).....	30
6.11.3 Requirements for immunity.....	30
6.11.4 Requirement for transmitted overvoltages.....	32
6.11.601 Emission requirements .....	32
6.13 Markings .....	33
6.601 Requirements for optical transmitting system and optical output link.....	33
6.601.1 General .....	33
6.601.2 Optical connectors .....	33
6.601.3 Fibre optic terminal box.....	33
6.601.4 Total cable length .....	33
6.602 Requirements for electrical transmitting system and electrical wires for output link .....	33
6.602.1 Connectors .....	33
6.602.2 Earthing of the output cable.....	34
6.603 Signal-to-noise ratio .....	34
6.604 Failure detection and maintenance announcement.....	35
6.605 Operability .....	35
6.606 Reliability and dependability .....	35
6.607 Vibrations .....	35
7 Tests.....	36
7.1 General.....	36

7.1.2	List of tests .....	36
7.2	Type tests .....	37
7.2.1	General .....	37
7.2.2	Temperature-rise test.....	37
7.2.3	Impulse voltage withstand test on primary terminals.....	37
7.2.5	Electromagnetic compatibility (EMC) tests .....	37
7.2.6	Test for accuracy .....	41
7.2.601	Low-voltage component voltage withstand test .....	43
7.3	Routine tests.....	44
7.3.1	Power-frequency voltage withstand tests on primary terminals .....	44
7.3.4	Power-frequency voltage withstand tests on secondary terminals .....	45
7.3.5	Test for accuracy .....	45
7.3.601	Power-frequency voltage withstand test for low-voltage components .....	45
7.4	Special tests .....	45
7.4.601	Vibration tests.....	45
601	Information to be given with enquiries, tenders and orders.....	46
601.1	Designation.....	46
601.2	Dependability.....	46
Annex 6A (normative) LPIT frequency response and accuracy requirements for harmonics.....		47
6A.1	General.....	47
6A.2	Requirements for noise and distortion .....	47
6A.3	Anti-aliasing filter requirements for LPIT using digital data processing.....	47
6A.4	LPIT accuracy requirements for harmonics and low frequencies .....	49
6A.4.1	General.....	49
6A.4.2	Measuring accuracy classes.....	49
6A.4.3	Accuracy class extension for quality metering and low bandwidth d.c. applications .....	50
6A.4.4	Protective accuracy classes .....	51
6A.4.5	Special high bandwidth protection accuracy class.....	51
6A.4.6	Special accuracy classes for d.c. coupled low-power voltage transformers .....	52
6A.5	Tests for accuracy versus harmonics and low frequencies.....	52
6A.6	Test arrangement and test circuit.....	53
6A.6.1	Test for accuracy for harmonics and low frequencies .....	53
6A.6.2	Type test for proper anti-aliasing .....	53
Annex 6B (informative) Transient performances of low-power current transformers .....		55
6B.1	General.....	55
6B.2	Short-circuit currents in power systems.....	55
6B.3	Conventional current transformer equivalent circuit.....	58
6B.4	Types of current transformers.....	60
6B.4.1	Types of conventional CTs .....	60
6B.4.2	Types of low-power current transformers .....	61
6B.5	Transient performance of current transformers.....	62
6B.5.1	Transient performance of conventional current transformers .....	62
6B.5.2	Transient performance of low-power current transformers .....	63
6B.6	Summary .....	64
Annex 6C (informative) Transient performances of low-power voltage transformers.....		65
6C.1	Overview .....	65

6C.2	General.....	65
6C.2.1	Defining primary and secondary voltages.....	65
6C.2.2	Normal service conditions of the network.....	65
6C.2.3	Abnormal service conditions of the network.....	66
6C.2.4	Rated secondary voltages.....	66
6C.2.5	Steady-state conditions.....	66
6C.3	Transient conditions.....	66
6C.3.1	Theoretical considerations.....	66
6C.3.2	Definition of transient error.....	73
6C.3.3	Test of transient performance.....	73
Annex 6D	(informative) Test circuits.....	78
6D.1	Test circuits for accuracy measurements in steady state for low-power current transformers.....	78
6D.2	Test circuits for accuracy measurements in steady state for low-power voltage transformers.....	81
Annex 6E	(informative) Graph explaining the accuracy requirements for multi-purpose low-power current transformer.....	84
Bibliography	.....	85
Figure 601	– General block diagram of a single-phase LPIT.....	10

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

## INSTRUMENT TRANSFORMERS –

Part 6: Additional general requirements  
for low-power instrument transformers

## FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61869-6 has been prepared by IEC technical committee 38: Instrument transformers.

This first edition of IEC 61869-6 cancels and replaces the relevant parts of IEC 60044-7, published in 1999, and of IEC 60044-8, published in 2002<sup>1</sup>.

<sup>1</sup> IEC 60044-7 and IEC 60044-8 will eventually be replaced by the IEC 61869 series, but until all the relevant parts will be published, these two standards are still in force.

The text of this standard is based on the following documents:

FDIS	Report on voting
38/501/FDIS	38/507/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 61869 series, published under the general title *Instrument transformers*, can be found on the IEC website.

This Part 6 is to be read in conjunction with, and is based on, IEC 61869-1:2007, *General Requirements* – however, the reader is encouraged to use its most recent edition.

This Part 6 follows the structure of IEC 61869-1:2007 and supplements or modifies its corresponding clauses.

When a particular clause/subclause of Part 1 is not mentioned in this Part 6, that clause/subclause applies. When this standard states “addition”, “modification” or “replacement”, the relevant text in Part 1 is to be adapted accordingly.

For additional clauses, subclauses, figures, tables, annexes or notes, the following numbering system is used:

- clauses, subclauses, tables, figures and notes that are numbered starting from 601 are additional to those in Part 1;
- additional annexes are lettered 6A, 6B, etc.

An overview of the planned set of standards at the date of publication of this document is given below. The updated list of standards issued by IEC TC 38 is available at the website: [www.iec.ch](http://www.iec.ch).
