This European Standard was approved by CENELEC on 2015-05-27. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Foreword

The text of document 40/2343/FDIS, future edition 4 of IEC 60286-2, prepared by IEC/TC 40 "Capacitors and resistors for electronic equipment" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN 60286-2:2015.

The following dates are fixed:

- latest date by which the document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2016-02-27
- latest date by which the national standards conflicting with the document have to be withdrawn (dow) 2018-05-27

This document supersedes EN 60286-2:2009.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC [and/or CEN] shall not be held responsible for identifying any or all such patent rights.

Endorsement notice

The text of the International Standard IEC 60286-2:2015 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following note has to be added for the standard indicated:

ISO 11469:2000

NOTE Harmonized as EN ISO 11469:2000.

Annex ZA
(normative)

**Normative references to international publications
with their corresponding European publications**

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE 1 When an International Publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

NOTE 2 Up-to-date information on the latest versions of the European Standards listed in this annex is available here: www.cenelec.eu.

FOREWORD.....	5
1 Scope.....	7
2 Normative references.....	7
3 Terms, definitions and symbols.....	7
3.1 Terms and definitions.....	7
3.2 Symbols.....	10
4 Dimensions.....	13
4.1 Tape width dimensions (W, W_0, W_1, W_2).....	13
4.1.1 Tape width (W).....	13
4.1.2 Hold-down tape width (W_0).....	13
4.1.3 Distance between the upper edges of the carrier tape and the abscissa (W_1).....	13
4.1.4 Distance between the upper edges of the carrier tape and the hold-down tape (W_2).....	13
4.2 Components and sprocket hole pitches (P, P_0, P_1, P_2, D_0).....	13
4.2.1 General.....	13
4.2.2 Pitch between two consecutive mutual components (P).....	13
4.2.3 Pitch between two consecutive sprocket holes (P_0).....	13
4.2.4 Distance between the ordinate and the first lead of the component on the drawer side (for components with two leads) (P_1).....	14
4.2.5 Distance between the ordinate and the center lead of the component on the drawer side (for components with three leads) (P_2).....	14
4.2.6 Sprocket hole diameter (D_0).....	14
4.3 Dimensions for component position relative to the abscissa (H, H_0, H_1, H_2, H_3).....	14
4.3.1 Distance between the abscissa and the bottom plane of the component body (H).....	14
4.3.2 Distance between the abscissa and the reference plane of components with crimped leads (H_0).....	14
4.3.3 Distance between the abscissa and the top of the body of the components (H_1).....	14
4.3.4 Distance between the abscissa and the tip of the short terminal without tape (H_2).....	14
4.3.5 Distance between the bottom of the component and the tip of the short terminal without tape (H_3).....	14
4.4 Lead terminal dimensions ($d, d_1, F, F_1, F_2, L, K$) and tape thickness (T, T_1).....	15
4.4.1 Dimensions and tolerances of lead spacing for two leaded components (F) and for three leaded components (F_1, F_2).....	15
4.4.2 Lead terminal diameter (d, d_1).....	15
4.4.3 Tape thickness (T, T_1).....	15
4.4.4 Maximum permissible protrusion of the ends of the leads (L).....	15
4.4.5 Distance between the lead terminal and the short terminal without tape (K).....	15
4.5 Maximum permissible deviation of taped component dimensions.....	16
4.5.1 Maximum permissible deviation of taped component dimensions ($\Delta h, \Delta p, \Delta P_1$).....	16
5 Taping.....	16
5.1 Taping dimensions.....	16
5.2 Splices.....	16

INTERNATIONAL ELECTROTECHNICAL COMMISSION

PACKAGING OF COMPONENTS FOR AUTOMATIC HANDLING –**Part 2: Tape packaging of components with
unidirectional leads on continuous tapes**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60286-2 has been prepared by IEC technical committee 40: Capacitors and resistors for electronic equipment.

This fourth edition cancels and replaces the third edition, published in 2008, and constitutes a technical revision.

This edition includes the following significant changes with respect to the previous edition:

- A complete revision of the structure and reworked layout.
- A two page overview containing a clear overview of all symbols and references.
- Addition of annexes of known radial tape formats.
- Improved figures.

The text of this standard is based on the following documents:

FDIS	Report on voting
40/2343/FDIS	40/2374/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 60286 series, published under the general title *Packaging of components for automatic handling*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.
