This European Standard was approved by CEN on 6 January 2006.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

**The STANDARD PREVIEW
(standardpreview)**

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 3155-040:2007) has been prepared by the European Association of Aerospace Manufacturers - Standardization (AECMA-STAN).

After enquiries and votes carried out in accordance with the rules of this Association, this Standard has received the approval of the National Associations and the Official Services of the member countries of AECMA, prior to its presentation to CEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by October 2007, and conflicting national standards shall be withdrawn at the latest by October 2007.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

The STANDARD PREVIEW (standards.iteh.ai)

SIST EN 3155-040:2009

Introduction

The contacts defined by this standard are derived from those of AS 39029/74 and are intermateable with those of AS 39029/73.

1 Scope

This standard specifies the required characteristics, tests and tooling applicable to size 12, male coaxial, electrical contacts, type D, solder, class R, used in elements of connection according to EN 3155-002.

It shall be used together with EN 3155-001.

The associated female contacts are defined in EN 3155-031 and EN 3155-041.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 2591*, Aerospace series — Elements of electrical and optical connection — Test methods.

EN 3155-001, Aerospace series — Electrical contacts used in elements of connection — Part 001: Technical specification. ¹⁾ <https://standards.iteh.ai/catalog/standards/sist/ea5a1cef-ef04-4089-a774-72b49c5baad/sist-en-3155-040-2009>

EN 3155-002, Aerospace series — Electrical contacts used in elements of connection — Part 002: List and utilization of contacts.

EN 3155-031, Aerospace series — Electrical contacts used in elements of connection — Part 031: Contacts, electrical, coaxial, size 12, female, type D, crimp, class R — Product standard. ¹⁾

EN 3155-041, Aerospace series — Electrical contacts used in elements of connection — Part 041: Contacts, electrical, coaxial, size 12, female, type D, solder, class R — Product standard.

3 Terms and definitions

For the purposes of this standard, the terms and definitions given in EN 3155-001 apply.

4 Required characteristics

iTeh STANDARD PREVIEW 4.1 Specific characteristics

Type D contacts are contacts with screening feature, class R corresponds to an operating temperature range from – 65 °C to 150 °C.

[SIST EN 3155-040:2009](#)

4.2 Dimensions and mass

<https://standards.iteh.ai/catalog/standards/sist/ea5a1cef-ef04-4089-a774-72b49cf5baad/sist-en-3155-040-2009>

See Figure 1 for dimensions.

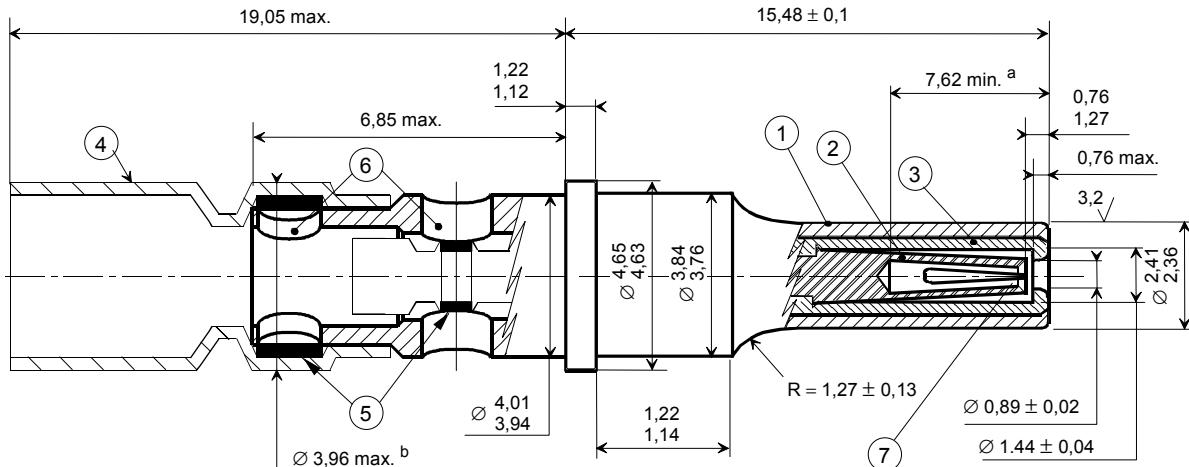

Dimensions and tolerances are given in millimetres.

Contact mass: 2,50 g max.

3) Published by: Society of Automotive Engineering (SAE), 400 Commonwealth Drive, Warrendale, PA 15096, USA.

4) Published by: Electronic Industries Alliance (EIA), 2500 Wilson Boulevard, Arlington, Virginia 22201.

5) Published as AECMA Technical Report at the date of publication of this standard.

iTeh STANDARD PREVIEW (standards.iteh.ai)

NOTE Mates with 0,749/0,711 male contact diameter

[SIST EN 3155-040:2009](#)

<https://standards.iteh.ai/catalog/standards/sist/ea5a1cef-ef04-4089-a774-72b49c5baad/sist-en-3155-040-2009>

4.3 Marking by colour code

Not applicable

4.4 Material, surface treatment

4.4.1 Material

Body: Copper alloy

4.4.2 Protective coating

Gold on appropriate undercoat for copper alloy parts

Thickness not specified

4.4.3 Dielectric

ETFE Fluoropolymer or equivalent

4.4.4 Heat shrinkable tubing

Radiation crosslinked polyvinylidene fluoride

4.4.5 Solder rings

Sn63 as per J-STD-004

4.5 Permissible cables

The cables should have dimensions within the values specified in Table 1, in millimetres.

Table 1

| Cable diameter | | min. | max. |
|---|---|-------------|-------------|
| Jacket | A | – | 3,60 |
| Shield | B | 2,00 | 2,50 |
| Dielectric | C | 0,76 | 2,10 |
| Conductor | D | 0,28 | 0,66 |
| Permissible cable code according to TR 6058 | | XE, XY, WL | |

4.6 Stripping of cables and wiring method

Dimensions are in millimetres. See Figures 2, 3 and 4.
iTeh STANDARD PREVIEW
(standards.iteh.ai)

Strip cable as shown on Figures 2 or 3 or 4.
<https://standards.iteh.ai/catalog/standards/sist/ea5a1cef-ef04-4089-a774-72b40f5bad/sist-en-3155-040-2009>

Insert cable into contact until it is fully seated.

Heat contact with appropriate tools as shown on Figure 5 until solder melts and flows and strain relief tubing conforms to cable.

4.6.2 Preparation of coaxial cable

Depending upon dielectric diameter value there are three possibilities.

The central conductor should always be pretinned after stripping.

4.6.2.1 Cable preparation for straight shield

When all diameters conform to Table 1.
