

SLOVENSKI STANDARD

SIST EN 4312:2009

01-julij-2009

Aeronavtika - Elastični stebelni vijaki, široka toleranca, srednja navojna dolžina, iz topotno in korozjsko odpornega jekla, z aluminijem pigmentiranim premazom - Klasifikacija: 1100 MPa (pri temperaturi okolice)/315 °C

Aerospace series - Studs, coarse tolerance reduced shank, medium length thread, in heat and corrosion resisting steel, with aluminium pigmented coating - Classification: 1100 MPa (at ambient temperature)/315 °C

iTeh STANDARD PREVIEW

Luft- und Raumfahrt - Stift-Dehnschrauben, mit mittlerer Gewindelänge, aus hochwarmfestem und korrosionsbeständigem Stahl, mit aluminiumpigmentierter Beschichtung - Klasse: 1100 Mpa (bei Raumtemperatur)/315 °C

This European Standard was approved by CEN on 6 February 2006.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

SIST EN 4312:2009

<https://standards.iteh.ai/catalog/standards/sist/3a49fb10-256d-4644-a2f1-a32b48c2c8dc/sist-en-4312-2009>

Foreword

This European Standard (EN 4312:2006) has been prepared by the European Association of Aerospace Manufacturers - Standardization (AECMA-STAN).

After enquiries and votes carried out in accordance with the rules of this Association, this Standard has received the approval of the National Associations and the Official Services of the member countries of AECMA, prior to its presentation to CEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by December 2006, and conflicting national standards shall be withdrawn at the latest by December 2006.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

THE STANDARD PREVIEW (standards.iteh.ai)

SIST EN 4312:2009

<https://standards.iteh.ai/catalog/standards/sist/3a49fb10-256d-4644-a2f1-a32b48c2c8dc/sist-en-4312-2009>

1 Scope

This standard specifies the characteristics of studs, close tolerance shank, medium length thread, in heat and corrosion resisting steel, with aluminium pigmented coating.

Classification: 1 100 MPa¹⁾ / 315 °C²⁾

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 3353-1, *Aerospace — Lead and runout threads — Part 1: Rolled external threads*.

ISO 5855-2, *Aerospace — MJ threads — Part 2: Limit dimensions for bolts and nuts*.

ISO 7913, *Aerospace — Bolts and screws, metric — Tolerances of form and position*.

ISO 8168, *Aerospace — Corrosion- and heat-resisting steel bolts with strength classification 1 100 MPa and MJ threads — Procurement specification*.

EN 2424, *Aerospace series — Marking of aerospace products*.

EN 4474, *Aerospace series — Aluminium pigmented coatings — Coating methods*.³⁾

iTeh STANDARD PREVIEW
EN 9100, *Aerospace series — Quality management systems — Requirements (based on ISO 9001:2000) and Quality systems — Model for quality assurance in design, development, production, installation and servicing (based on ISO 9001:1994)*.

TR 3775, *Aerospace series — Bolts and pins — Materials*.⁴⁾
<https://standards.iteh.ai/catalog/standards/sist/3a49fb10-256d-4644-a2f1-a32b48c2c8dc/sist-en-4312-2009>

3 Required characteristics

3.1 Configuration – Dimensions – Masses

See Figure 1 and Tables 1 and 2.

Dimensions and tolerances are expressed in millimetres and apply after coating.

3.2 Tolerances of form and position

See ISO 7913.

3.3 Materials

See TR 3775 (heat and corrosion resisting steel, strength class: 1 100 MPa).

- 1) Minimum tensile strength of the material at ambient temperature.
- 2) Maximum temperature that the stud can withstand without continuous change in its original characteristics, after return to ambient temperature. The maximum temperature is determined by the coating.
- 3) Published as AECMA Prestandard at the date of publication of this standard.
- 4) Published as AECMA Technical Report at the date of publication of this standard.

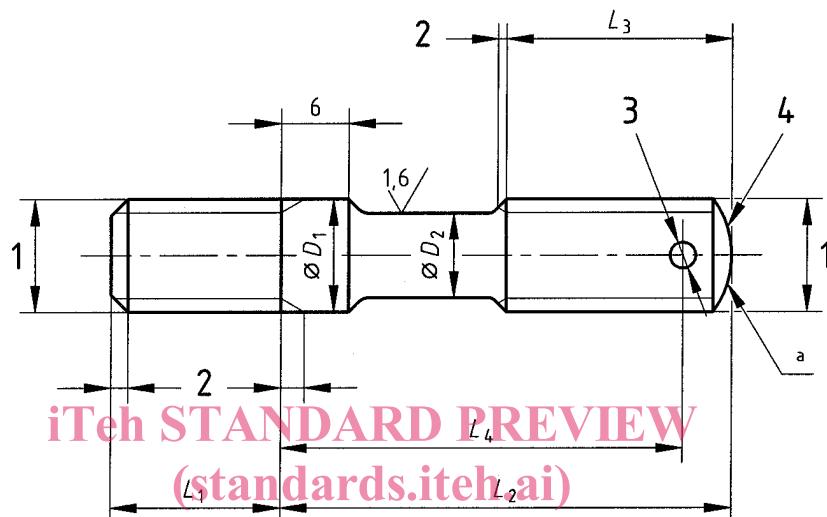

3.4 Surface treatments

EN 4474

After aluminium deposit, optional lubrication with cethylic alcohol (code E).

$\checkmark \quad [\checkmark]$ Values in micrometres apply prior to surface treatment.

Break sharp edges 0,1 to 0,4.

SIST EN 4312:2009
