EUROPEAN STANDARD
NORME EUROPÉENNE
EUROPÄISCHE NORM

EN 1197

October 2006

ICS 71.100.80

Supersedes EN 1197:2000

English Version

Chemicals used for treatment of water intended for human consumption - Monozinc phosphate solution

Produits chimiques utilisés pour le traitement de l'eau destinée à la consommation humaine - Bis-dihydrogénophosphate de zinc en solution

Produkte zur Aufbereitung von Wasser für den menschlichen Gebrauch - Monozinkphosphat-Lösung

This European Standard was approved by CEN on 4 September 2006.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 1197:2006) has been prepared by Technical Committee CEN/TC 164 "Water supply", the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by April 2007, and conflicting national standards shall be withdrawn at the latest by April 2007.

This document supersedes EN 1197:2000.

Significant technical differences between this edition and EN 1197:2000 are as follows:

- a) deletion of the reference to EU Directive 80/778/EEC of July 15, 1980 in order to take into account the latest Directive in force (see [1]);
- b) replacement of EN 26595 by EN ISO 11969.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Introduction

In respect of potential adverse effects on the quality of water intended for human consumption, caused by the product covered by this European Standard:

- a) this European Standard provides no information as to whether the product may be used without restriction in any of the Member States of the EU or EFTA;
- b) it should be noted that, while awaiting the adoption of verifiable European criteria, existing national regulations concerning the use and/or the characteristics of this product remain in force.

NOTE Conformity with this European Standard does not confer or imply acceptance or approval of the product in any of the Member States of the EU or EFTA. The use of the product covered by this European Standard is subject to regulation or control by National Authorities.

1 Scope

This European Standard is applicable to monozinc phosphate solution used for treatment of water intended for human consumption. It describes the characteristics of monozinc phosphate solution and specifies the requirements and the corresponding test methods for monozinc phosphate solution. It gives information on its use in water treatment.

2 Normative references

3 Description

3.1 Identification

3.1.1 Chemical name

Monozinc phosphate solution.

3.1.2 Synonym or common name

Not applicable.

EN 1197:2006 (E)**3.1.3 Relative molecular mass**

Not applicable.

3.1.4 Empirical formula

Zn(H₂PO₄)₂ (Solution).

3.1.5 Chemical formula

Zn(H₂PO₄)₂ (Solution).

3.1.6 CAS Registry Number¹⁾

13598-37-3.

3.1.7 EINECS reference²⁾

237-067-2.

3.2 Commercial form

The monozinc phosphate is available as a solution; commonly used concentration is 500 g/l.

3.3 Physical properties**3.3.1 Appearance**

The product is a clear solution.

iTeh STANDARD PREVIEW
(standards.iteh.ai)

[SIST EN 1197:2007](https://standards.iteh.ai/catalog/standards/sist/ce7450c8-9b4f-4725-8cd6-0f17e9f96828/sist-en-1197-2007)

<https://standards.iteh.ai/catalog/standards/sist/ce7450c8-9b4f-4725-8cd6-0f17e9f96828/sist-en-1197-2007>

3.3.2 Density

The density at 20 °C is 1,7 g/ml for a concentration of 500 g/l.

3.3.3 Solubility in water

Miscible in any proportion.

3.3.4 Vapour pressure

Not applicable.

3.3.5 Boiling point at 100 kPa³⁾

Not applicable.

3.3.6 Melting point

Not applicable.

¹⁾ Chemical Abstracts Service Registry Number

²⁾ European Inventory of Existing Commercial Chemical Substances

³⁾ 100 kPa = 1 bar

3.3.7 Specific heat

Not known.

3.3.8 Viscosity (dynamic)

180 mPa.s for a concentration of 500 g/l at 20 °C.

3.3.9 Critical temperature

Not applicable.

3.3.10 Critical pressure

Not applicable.

3.3.11 Physical hardness

Not applicable.

3.4 Chemical properties

Solutions of monozinc phosphate have acidic reactions.

The pH value of a solution containing 5 g/l of Zn (H₂PO₄)₂ is approximately 2,1.

iTeh STANDARD PREVIEW
(standards.iteh.ai)

4 Purity criteria**4.1 General**

SIST EN 1197:2007

<https://standards.iteh.ai/catalog/standards/sist/ce7450c8-9b4f-4725-8cd6-68729f66838/sist-en-1197-2007>

This European Standard specifies the minimum purity requirements for monozinc phosphate solution used for the treatment of water intended for human consumption. Limits are given for impurities commonly present in the product. Depending on the raw material and the manufacturing process other impurities may be present and, if so, this shall be notified to the user and when necessary to relevant authorities.

NOTE Users of this product should check the national regulations in order to clarify whether it is of appropriate purity for treatment of water intended for human consumption, taking into account raw water quality, required dosage, contents of other impurities and additives used in the products not stated in this product standard.

Limits have been given for impurities and chemicals parameters where these are likely to be present in significant quantities from the current production process and raw materials. If the production process or raw materials lead to significant quantities of impurities, by-products or additives being present, this shall be notified to the user.

4.2 Composition of commercial product

The product shall conform to the following requirements for the solution :

- Phosphate content expressed as P₂O₅ : mass fraction of (39 ± 2,0) %;
- Zinc oxide content expressed as ZnO : mass fraction of (15 ± 1,0) %.

4.3 Impurities and main by-products

The product shall conform to the requirements specified in Table 1.
