This European Standard was approved by CEN on 16 March 2006.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 3060:2007) has been prepared by the Aerospace and Defence Industries Association of Europe - Standardization (ASD-STAN).

After enquiries and votes carried out in accordance with the rules of this Association, this Standard has received the approval of the National Associations and the Official Services of the member countries of ASD, prior to its presentation to CEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by December 2007, and conflicting national standards shall be withdrawn at the latest by December 2007.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

EN 3060:2007 (E)

1 Scope

This standard specifies the characteristics of rigid single row ball bearings in steel, cadmium-plated with cadmium plated flanged alignment housing designed to withstand only slow rotations and oscillations under load.

They are intended for use in the hubs of torsion lever and in separated supports for airframe/aerospace applications.

The airframe rolling bearings defined in this standard may be used in the temperature range from $-54\text{ }^{\circ}\text{C}$ to $150\text{ }^{\circ}\text{C}$.

However, being lubricated with the following greases (see EN 3727):

- ester type very high pressure grease (code letter A), operating range from $-73\text{ }^{\circ}\text{C}$ to $121\text{ }^{\circ}\text{C}$ or,
- synthetic hydrocarbons type very high pressure grease general purpose (code letter B) operating range from $-54\text{ }^{\circ}\text{C}$ to $177\text{ }^{\circ}\text{C}$.

Their field of application when lubricated with code letter A grease is limited to $121\text{ }^{\circ}\text{C}$.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 1132-1, *Rolling bearings — Tolerances — Part 1: Terms and Definitions*.

EN 2031, *Steel FE-PL31 — Hardened and tempered — Bars — Aerospace series*.¹⁾

EN 2133, *Aerospace series — Cadmium plating of steels with specified tensile strength $\leq 1\,450\text{ MPa}$, copper, copper alloys and nickel alloys*.

EN 2221, *Steel FE-PL31 — Hardened and tempered — Hollow bars $3,5\text{ mm} \leq a \leq 55\text{ mm}$ — Aerospace series*.¹⁾

EN 2222, *Steel FE-PL31 — Hardened and tempered — Hand and die forgings — Aerospace series*.¹⁾

EN 2249, *Aerospace series — Steel FE-PL52S — $R_m \geq 690\text{ MPa}$ — Bars $D_e \leq 250\text{ mm}$* .²⁾

EN 2424, *Aerospace series — Marking of aerospace products*.

TR 4475, *Aerospace series — Bearings and mechanical transmissions for airframe applications — Vocabulary*.³⁾

1) Published as ASD Standard at the date of publication of this standard.

2) In preparation at the date of publication of this standard.

3) Published as ASD Technical report at the date of publication of this standard.

3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO 1132-1 and TR 4475 apply.

4 Symbols and abbreviations

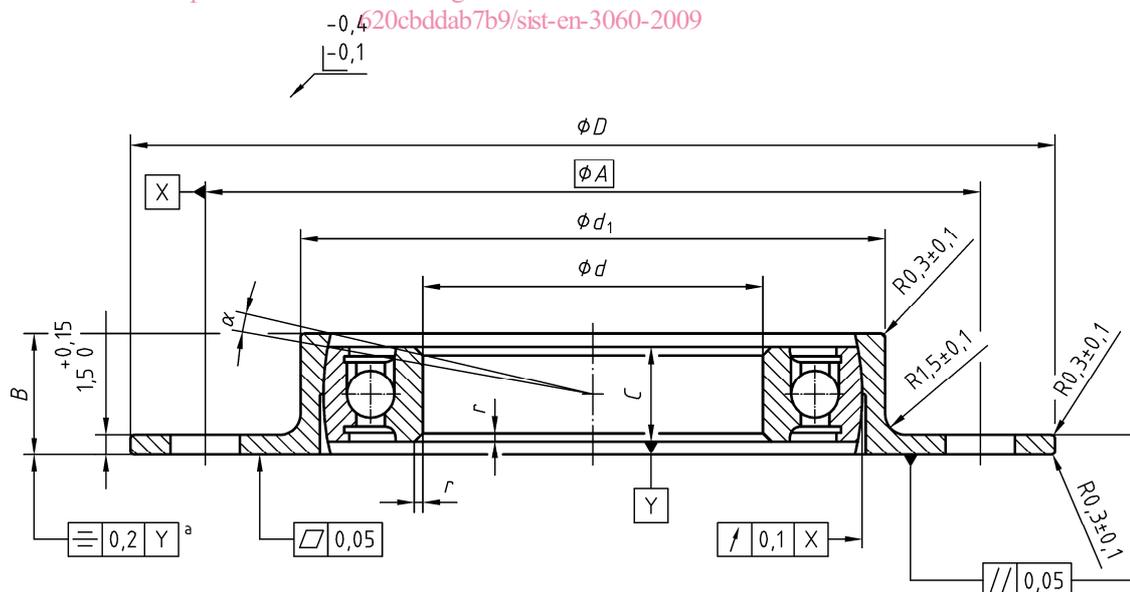

Δ_{dmp}	=	single plane mean bore diameter deviation
Δ_{dis}	=	deviation of a single bore diameter
C_s	=	permissible static radial load
$F_{a \max.}$	=	permissible static axial load
G_a	=	axial internal clearance
G_r	=	radial internal clearance
S_{ia}	=	assembled bearing inner ring face runout with raceway
S_{ea}	=	assembled bearing outer ring face runout with raceway
K_{ia}	=	radial runout of assembled bearing inner ring
K_{ea}	=	radial runout of assembled bearing outer ring

5 Required characteristics

5.1 Dimensions – Clearances – Masses

Configuration and values: according to Figures 1 to 4 and Table 1; the bearings may be fitted with either seals or shields.

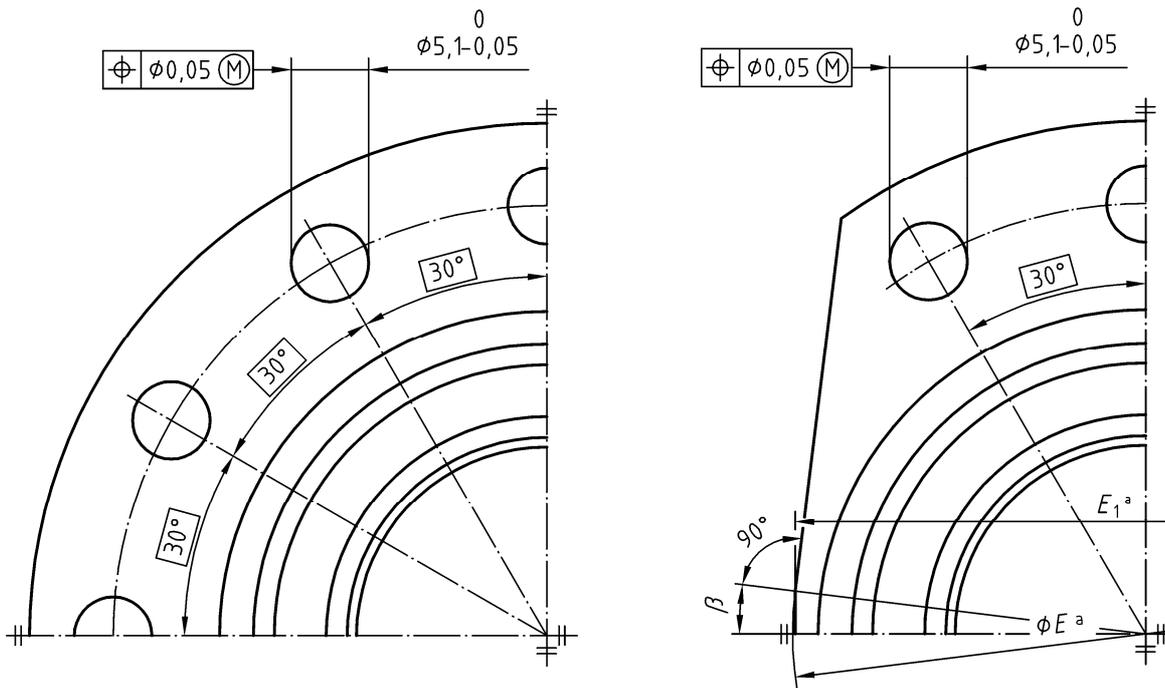

The dimensions and tolerances are expressed in millimetres and apply after surface treatment.

Key

^a In both positions at 180° from the bearing

Figure 1

Key

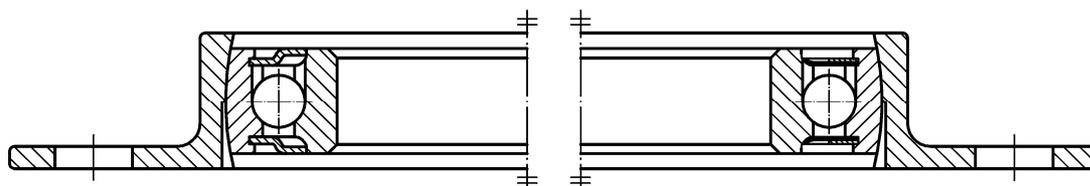

^a Transition area at the manufacturer's discretion

Figure 2 — Solid flanged alignment housing, code letter C

Figure 3 — Light weight flanged alignment housing, code letter D

SIST EN 3060:2009

Type with shields code letter P

Type with seals code letter E

NOTE 1 Installation of seals and shields is at the manufacturer's option.

NOTE 2 The shields shall not extend beyond width C.
