EUROPEAN STANDARD NORME EUROPÉENNE EUROPÄISCHE NORM

DRAFT prEN 15552

August 2006

ICS

English Version

Packaging - Complete, filled transport packages and unit loads -Performance testing schedules for common distribution chains

Emballage - Emballages d'expédition complets et pleins et charges unitaires - Programmes d'essai de performance pour circuits de distribution courants Verpackung - Versandfertige Packstücke und Ladeeinheiten - Prüfpläne für gewöhnliche Transportketten

This draft European Standard is submitted to CEN members for enquiry. It has been drawn up by the Technical Committee CEN/TC 261.

If this draft becomes a European Standard, CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

This draft European Standard was established by CEN in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

Warning : This document is not a European Standard. It is distributed for review and comments. It is subject to change without notice and shall not be referred to as a European Standard.

SIST EN 15552:2008

https://standards.iteh.ai/catalog/standards/sist/f546b587-32a4-496a-abeb-eb995da3740d/sist-en-15552-2008

Introduction

Packagings are designed for many functions in the distribution of goods like packing, handling, storage, transport, information, promotion, tamper proofing, easy opening, etc.

This European Standard is intended to assess the protection of goods through handling, storage and transport of packages.

The objective is also to check whether the packagings are just sufficient to the level of stresses, but without excess.

Alternatives are sometimes proposed to better cover actual likely hazards.

The specified testing schedules cross-reference well recognized international testing methods.

EN 13011 defines a system for the declaration of performance conditions within goods transport chains.
