## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

# Woodruff keyseat cutters — Dimensions

## 1 Scope

This International Standard specifies the dimensions of milling cutters intended for manufacturing Woodruff keyseats in accordance with ISO 3912.

Two types of Woodruff keyseat cutters with cylindrical shank are specified:

- Woodruff keyseat cutters with cylindrical shank, in accordance with ISO 3338-1;
- Woodruff keyseat cutters with flatted cylindrical shank, in accordance with ISO 3338-2.

The following standards contain provisions which, through reference in this text, constitute provisions of this International Standard. At the time of publication, the editions indicated were valid. All standards are subject to revision, and parties to agreements based on this International Standard are encouraged to investigate the possibility of applying the most recent editions of the standards indicated below. Members of IEC and ISO maintain registers of currently valid International Standards.
