Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Amendment 3 to International Standard ISO/IEC 10728:1993 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 21, *Open systems interconnection, data management and open distributed processing*.

AMENDMENT 3: CORBA IDL binding

Page v

Contents

Add a new entry to the Table of Contents as follows:

"Annex E - CORBA IDL binding"

Page 1

Clause 1

Add a new sentence in Clause 1 paragraph 2, before the last sentence.

"A language binding for CORBA IDL is provided in Annex E."

Page 5

Subclause 4.4 iTeh STANDARD PREVIEW (standards.iteh.ai)

"Data structures for use with CORBA IDL are defined in Annex E." ISO/IEC 10728:1993/Amd 3:1996

Page 5

<https://standards.iteh.ai/catalog/standards/sist/d3af6480-9de5-40c3-a282-81fbfa6dd92b/iso-iec-10728-1993-amd-3-1996>

Subclause 4.5

Add a new sentence in subclause 4.5.

"CORBA IDL bindings for the services are provided in Annex E."

Page 71

Subclause 8.1

Amend the first sentence of the NOTE in clause 8.1 to read:

"For the Pascal language binding specified in this clause, the C language binding specified in Annex C, the Ada language binding specified in Annex D and the CORBA IDL binding specified in Annex E, enumerated types are"

Page 75

Clause 9

Amend the first sentence of the second paragraph of Clause 9 to read:

"The service formats are specified in this clause using ISO standard Pascal. Alternative service formats for use with the C language binding are specified in Annex C, for the Ada language binding in Annex D and the CORBA IDL binding in Annex E."

Page 105

Add a new Annex E as follows:

iTeh STANDARD PREVIEW (standards.iteh.ai)

[ISO/IEC 10728:1993/Amd 3:1996](#)

<https://standards.iteh.ai/catalog/standards/sist/d3af6480-9de5-40c3-a282-81fbfa6dd92b/iso-iec-10728-1993-amd-3-1996>

Annex E

(normative)

CORBA IDL Binding

The IRDS Services Interface language bindings for the CORBA Interface Definition Language are presented in the form of a .idl file as set out in clause E.4 below.

E.1 Strategy for the Language Binding

In this binding the data names and data structures defined in clause 8 have been adhered to except where the CORBA IDL does not provide an appropriate construct.

In this binding the procedure names and their parameters defined in clause 8 have been adhered to except where the CORBA IDL does not provide an appropriate construct.

#define statements have been used for various limits instead of because CORBA IDL compilers will not accept a as an array length specifier.

Use of this language binding requires the use of a CORBA IDL compiler that conforms to ISO/IEC {Editor to insert reference} level {Editor to insert level identification}.

E.2 Class Architecture

The following class architecture is proposed. Note that these are only the classes that *need* to be visible across the CORBA interface. A finer grained class structure may be appropriate in future, but that this probably ought to be a starting point. Moving to further classes such as IRDDefinition, IRD, WorkingSet and IRDObject would be a natural next step and not inconsistent with the objects defined below.

Class Name	ISO/IEC 10728:1993/Amd 3:1996 Services	10728 Clause Reference
IrdsServicesInterfaceProcessor	IrdsCreateIRDDefinition	9.1.1
	IrdsDropIRDDefinition	9.1.2
	IrdsOpen	9.1.3
IrdsSession	IrdsPrepare	9.1.4
	IrdsCommit	9.1.5
	IrdsRollback	9.1.6
	IrdsClose	9.1.7
	IrdsGetDiagnostics	9.1.8
	IrdsSetContext	9.2.1
	IrdsAddObject	9.2.2
	IrdsOpenCursor	9.2.3

Class Name	Services	10728 Clause Reference
IrdsSession (continued)		
	IrdsRetrieveObject	9.2.4
	IrdsModifyObject	9.2.5
	IrdsDeleteObject	9.2.6
	IrdsDeclassifyObject	9.2.7
	IrdsReclassify	9.2.8
	IrdsCloseCursor	9.2.9
	IrdsCreateWorkingSet	9.2.10
	IrdsDropWorkingSet	9.2.11
	IrdsModifyContentStatus	9.2.12
	IrdsCreateReferencePath	9.2.13
	IrdsModifyReferencePath	9.2.14
	IrdsDropReferencePath	9.2.15
	IrdsCreateIRD	9.3.1
	IrdsDropIRD	9.3.2
	IrdsDeactivateIRD	9.3.3
	IrdsReactivateIRD	9.3.4
	IrdsValidateIRDSchemaGroup	9.3.5

iTeh STANDARD PREVIEW (standards.itech.ai)

[ISO/IEC 10728:1993/Amd 3:1996](https://standards.itech.ai/catalog/standards/sist/d3af6480-9de5-40c3-a282-81fbfa6dd92b/iso-iec-10728-1993-amd-3-1996)

<https://standards.itech.ai/catalog/standards/sist/d3af6480-9de5-40c3-a282-81fbfa6dd92b/iso-iec-10728-1993-amd-3-1996>

E.3 General Rules

1. Those data names in E.4 below that also appear in Clause 8 shall have the same meaning as is defined in Clause 8. The same rules for the use of separators as defined in Clause 8 shall apply.
2. The function and parameter names in E.4 below shall have the same meaning as is defined in Clause 9.
3. The Service Return Codes returned shall be those defined by Clause 9 and Annex A and they shall have the same meaning.

4. The following mappings from SQL data types to CORBA IDL data types have been used:

SQL DATA TYPE	CORBA IDL DATA TYPE
CHARACTER	string /* See 8.2.1 */
CHARACTER VARYING	string /* See 8.2.1 */
NATIONAL CHARACTER	string /* See 8.2.1 */
NATIONAL CHARACTER VARYING	string /* See 8.2.1 */
REAL	float
DOUBLE PRECISION	double
FLOAT	float
INTEGER	long
SMALLINT	short
NUMERIC	long
DECIMAL	long
DATE	IrdsDate /* See 8.2.1 */
TIME	IrdsTime /* See 8.2.1 */
TIMESTAMP	IrdsTimeStamp /* See 8.2.1 */
INTERVAL	IrdsInterval /* See 8.2.1 */

5. Every function returns an int which is to be set to the value of the NumStates field of the RetCode returned by the function.

iTeh STANDARD PREVIEW

E.4. IDL Interface Definition (standards.iteh.ai)

The following is the IDL interface definition for the object classes set out in clause E.1.

ISO/IEC 10728:1993/Amd 3:1996

```
module irds https://standards.iteh.ai/catalog/standards/sist/d3af6480-9de5-40c3-a282-
{
    const short IrdsNameLim = 255          /*      t1 */
        /* IrdsNameLim is used in 8.2.2 below */ */

    const short IrdsVarLim = 255          /*      t2 */
        /* IrdsVarLim is used in 8.2.2 below */
```

```

/* Clause 8.1.2 */

const short IrdsTextLim = 30728      /* t3 */

/*
   Note that although no use is made of IrdsTextLim in this
   language binding, it is included so that a program may
   refer
      to the value to test the length of a string. */

```

**iTeh STANDARD PREVIEW
(standards.iteh.ni)**

```

/* Clause 8.1.3 - these definitions are used in 8.2.3 below */

/*
   The numeric values in this clause will be
   replaced by n1, n2, n3, n4 as in clause 8.1.3 in
   the final version of this Annex. Actual values
   are retained in this draft to facilitate testing
   of the text by compilation against a range of
   compilers. */

```

```

const short IrdsSessIdLim = 255;          /* n1 */
/* IrdsSessIdLim used in 8.2.3 below */
const short IrdsCurIdLim = 255;          /* n2 */
/* IrdsCurIdLim used in 8.2.3 below */
const short IrdsImpDicNameLen = 255;      /* n3 */
/* IrdsImpDicNameLen used in 8.2.3 below */

```

```

const short IrdsKeyLen = 255;             /* n4 */
/* IrdsKeyLen used in 8.2.1 below */
