 mm - Rm ≥ 1 400 MPa**

Série aérospatiale - Acier FE-PM1506 (X5CrNiMoAl13-8-2)
 - Élaboré sous vide par induction et refondu à l'électrode
 consommable - Mis en solution et vieilli - Barres - a ou D ≤
 150 mm - Rm ≥ 1 400 MPa

Luft- und Raumfahrt - Stahl FE-PM1506 (X5CrNiMoAl13-8-
 2) - Vakuuminduktionserschmolzen und mit
 selbstverzehrender Elektrode umgeschmolzen -
 Lösungsgeglüht und ausgelagert - Stangen - a oder D ≤
 150 mm - Rm ≥ 1 400 MPa

This European Standard was approved by CEN on 15 February 2007.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

Foreword

This document (EN 4463:2007) has been prepared by the Aerospace and Defence Industries Association of Europe - Standardization (ASD-STAN).

After enquiries and votes carried out in accordance with the rules of this Association, this Standard has received the approval of the National Associations and the Official Services of the member countries of ASD, prior to its presentation to CEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by December 2007 and conflicting national standards shall be withdrawn at the latest by December 2007.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

Introduction

This standard is part of the series of EN metallic material standards for aerospace applications. The general organization of this series is described in EN 4258.

This standard has been prepared in accordance with EN 4500-5.

1 Scope

This standard specifies the requirements relating to:

Steel FE-PM1506 (X5CrNiMoAl13-8-2)
Vacuum induction melted and consumable electrode remelted
Solution treated and precipitation treated
Bar
 a or $D \leq 150$ mm
 $R_m \geq 1\,400$ MPa

for aerospace applications

iTeh STANDARD PREVIEW (standards.iteh.ai)

The following referenced documents are SIST EN 4463:2009 for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 2043, Aerospace series — Metallic materials — General requirements for semi-finished product qualification (excluding forgings and castings).¹⁾

EN 4258, Aerospace series — Metallic materials — General organization of standardization — Links between types of EN standards and their use.

EN 4436, Aerospace series — Steel — Test methods — Determination of δ ferrite content.¹⁾

EN 4500-5, Aerospace series — Metallic materials — Rules for drafting and presentation of material standards — Part 5: Specific rules for steels.¹⁾

EN 4700-2, Aerospace series — Steel and heat resisting alloys — Wrought products — Technical specification — Part 2: Bar and section.¹⁾

1) Published as ASD Prestandard at the date of publication of this standard.
