This amendment A1 modifies the European Standard EN ISO 105-C09:2003; it was approved by CEN on 18 July 2007.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for inclusion of this amendment into the relevant national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This amendment exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to ISO 105-C09:2001 was prepared by Technical Committee ISO/TC 38, *Textiles*, Subcommittee SC 1, *Tests for coloured textiles and colorants*.

Textiles — Tests for colour fastness —

Part C09:

Colour fastness to domestic and commercial laundering — Oxidative bleach response using a non-phosphate reference detergent incorporating a low temperature bleach activator

AMENDMENT 1

Page 1, Clause 1

Delete 4th paragraph.

Replace 5th paragraph with the following text.

This part of ISO 105 specifies a procedure incorporating the use of ECE¹⁾ non-phosphate reference detergent, sodium perborate tetrahydrate, and the bleach activator tetra-acetyl ethylenediamine (TAED) (see Annex A) and a procedure incorporating the use of AATCC 1993 zero phosphate reference detergent (without optical brightener), sodium perborate monohydrate and the bleach activator sodium nonanoyloxybenzene sulfonate (SNOBS) (see Annex B).

This method has been designed for the detergents and bleach systems given. Other detergents and bleach systems may require different conditions and levels of ingredient.

Page 2, subclause 4.1

Add the following subclauses under “Reference detergent”.

4.1.4 AATCC 1993 Standard Reference Detergent Base Powder.

4.1.5 Bleach activator, sodium nonanoyloxybenzene sulfonate (SNOBS/NOBS).

4.1.6 Sodium perborate monohydrate (PB1).

Page 3, Clause 7

Delete existing text and replace with the following.

Provisions are made in Annexes A and B for washing procedures using a specific bleach activator and reference detergent combination.

1) European Colourfastness Establishment (ECE).
