Intellectual Property Rights

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<http://webapp.etsi.org/IPR/home.asp>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Foreword

This European Standard (Telecommunications series) has been produced by CENELEC and ETSI Technical Committee Electromagnetic compatibility and Radio spectrum Matters (ERM), and is now submitted for the Public Enquiry phase of the ETSI standards Two-step Approval Procedure.

The present document is part 3 of a multi-part deliverable covering the EMC network standards, as identified below:

Part 1: "Wire-line telecommunications networks using telephone wires";

Part 2: "Wire-line telecommunications networks using coaxial cables";

Part 3: "Wire-line telecommunications networks using power lines".

STANDARD PREVIEW
(standards.iteh.ai)

Proposed national transposition dates	
Date of latest announcement of this EN (doa):	3 months after ETSI publication
Date of latest publication of new National Standard or endorsement of this EN (dop/e):	6 months after doa
Date of withdrawal of any conflicting National Standard (dow):	6 months after doa

Introduction

The present documents has been prepared by the CENELEC/ETSI JWG on EMC of Conducted Transmission Networks and it is intended to become one of the main deliverable under EC Mandate M/313 [i.1].

Endorsement notice

The entire unchanged endorsed document is contained in an Adobe Portable Document Format™ file (JWG_Part_3r1.doc) contained in archive en_30268403v010000c0.zip) which accompanies the present document.

1 Scope

The present document refers to EMC requirements for wire-line telecommunications networks using power lines.

An informative annex on good EMC engineering practice for this network type is contained in an Adobe Portable Document Format™ file (JWG_Part_3r1.doc) contained in archive en_30268403v010000c0.zip) which accompanies the present document.

2 References

References are either specific (identified by date of publication and/or edition number or version number) or non-specific.

- For a specific reference, subsequent revisions do not apply.
- Non-specific reference may be made only to a complete document or a part thereof and only in the following cases:
 - if it is accepted that it will be possible to use all future changes of the referenced document for the purposes of the referring document;
 - for informative references.

Referenced documents which are not found to be publicly available in the expected location might be found at <http://docbox.etsi.org/Reference>.

NOTE: While any hyperlinks included in this clause were valid at the time of publication ETSI cannot guarantee their long term validity.

2.1 Normative references

The following referenced documents are indispensable for the application of the present document. For dated references, only the edition cited applies. For non-specific references, the latest edition of the referenced document (including any amendments) applies.

Not applicable.

2.2 Informative references

The following referenced documents are not essential to the use of the present document but they assist the user with regard to a particular subject area. For non-specific references, the latest version of the referenced document (including any amendments) applies.

[i.1] EC Mandate M/313: "Standardisation mandate addressed to CEN, CENELEC and ETSI concerning electromagnetic compatibility (EMC) - Telecommunications network".
