English Version

**Energy efficiency services - Definitions and essential
requirements**

This draft European Standard is submitted to CEN members for enquiry. It has been drawn up by the Technical Committee CEN/SS F23.

If this draft becomes a European Standard, CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

This draft European Standard was established by CEN in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

Warning : This document is not a European Standard. It is distributed for review and comments. It is subject to change without notice and shall not be referred to as a European Standard.

Introduction

Energy efficiency services play a very important role in the control of energy consumption and the improvement of energy efficiency.

Improved energy efficiency can be achieved by increasing the availability of and demand for energy efficiency services.

This standard may be used as a reference document for appropriate qualification, accreditation and/or certification schemes for providers of energy services, as mentioned in article 8 of Directive 2006/32/CE.

This standard is written to provide guidance to both customers and providers of energy efficiency services and to contribute to the development of a market for energy efficiency services.

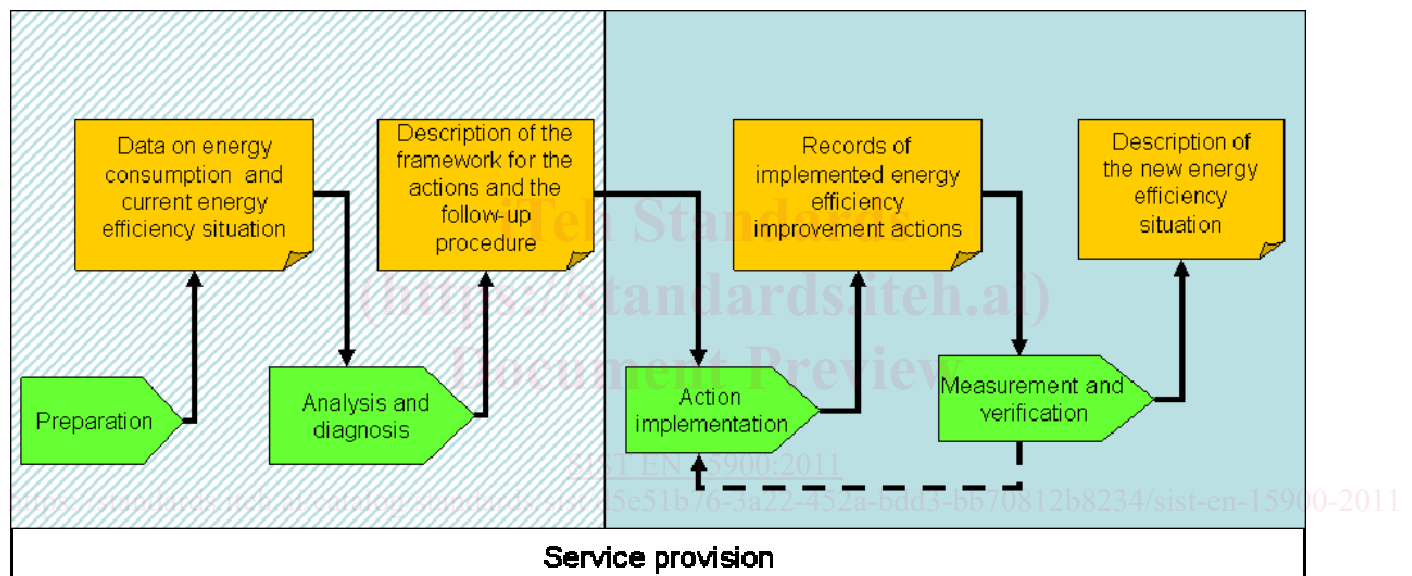

Figure 1 — Typical scheme of an energy efficiency improvement service provision process

The service provider and the customer should strive to implement a continuous improvement in energy efficiency.

1 Scope

This standard specifies the definitions and minimum requirements for an energy efficiency service.

2 Normative references

This standard does not include normative references at present.
