Intellectual Property Rights

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<http://webapp.etsi.org/IPR/home.asp>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Foreword

This Technical Specification (TS) has been produced by ETSI Technical Committee Telecommunications and Internet converged Services and Protocols for Advanced Networking (TISPAN).

The present document is part 2 of a multi-part deliverable covering the Network and Service Management; Subscription Management (SuM), as identified below:

Part 1: "Requirements";

Part 2: "Information Model";

Part 3: "Functional Architecture";

Part 4: "Solution Set".

Introduction

The focus of the present document is on the definition of SuM Information Model.

1 Scope

The purpose of the present document is the definition of the SuM Information model which is paramount for the NGN service delivery within TISPAN NGN.

The present document contains the specification of an information model covering all the mandatory/optional information related to subscription management that shall be provisioned on the NGN Network.

The information model described in the present document is developed according to the specifications of TISPAN R2.

The purposes of the present document are:

- To capture the Subscription Management Information Model needs as expressed in [1].
- To satisfy the needs of the NGN OSS Service Interfaces (NOSI) defined in the Subscription Management Functional Architecture and to support their implementation in Solution Set interfaces.

2 References

References are either specific (identified by date of publication and/or edition number or version number) or non-specific.

- For a specific reference, subsequent revisions do not apply.
- Non-specific reference may be made only to a complete document or a part thereof and only in the following cases:
 - if it is accepted that it will be possible to use all future changes of the referenced document for the purposes of the referring document;
 - for informative references.

Referenced documents which are not found to be publicly available in the expected location might be found at <http://docbox.etsi.org/Reference>.

NOTE: While any hyperlinks included in this clause were valid at the time of publication ETSI cannot guarantee their long term validity.

2.1 Normative references

The following referenced documents are indispensable for the application of the present document. For dated references, only the edition cited applies. For non-specific references, the latest edition of the referenced document (including any amendments) applies.

- [1] ETSI TS 188 002-1: "Telecommunications and Internet converged Services and Protocols for Advanced Networking (TISPAN); NGN Subscription Management; Part 1: Requirements".
- [2] ETSI ES 282 001: "Telecommunications and Internet converged Services and Protocols for Advanced Networking (TISPAN); NGN Functional Architecture".
- [3] ETSI ES 282 007: "Telecommunications and Internet Converged Services and Protocols for Advanced Networking (TISPAN); IP Multimedia Subsystem (IMS) Functional Architecture".
- [4] ETSI ES 282 004: "Telecommunications and Internet converged Services and Protocols for Advanced Networking (TISPAN); NGN Functional Architecture; Network Attachment Sub-System (NASS)".
- [5] ETSI ES 283 034: "Telecommunications and Internet Converged Services and Protocols for Advanced Networking (TISPAN); Network Attachment Sub-System (NASS); e4 interface based on the diameter protocol".

- [6] ETSI TS 123 008: "Digital cellular telecommunications system (Phase 2+); Universal Mobile Telecommunications System (UMTS); LTE; Organization of subscriber data (3GPP TS 23.008)".
- [7] ETSI TS 132 172: "Digital cellular telecommunications system (Phase 2+); Universal Mobile Telecommunications System (UMTS); LTE; Telecommunication management; Subscription Management (SuM) Network Resource Model (NRM) Integration Reference Point (IRP): Information Service (IS) (3GPP TS 32.172)".
- [8] ETSI TS 132 622: "Digital cellular telecommunications system (Phase 2+); Universal Mobile Telecommunications System (UMTS); LTE; Telecommunication management; Configuration Management (CM); Generic network resources Integration Reference Point (IRP): Network Resource Model (NRM) (3GPP TS 32.622)".
- [9] ETSI TS 132 300: "Digital cellular telecommunications system (Phase 2+); Universal Mobile Telecommunications System (UMTS); LTE; Telecommunication management; Configuration Management (CM); Name convention for Managed Objects (3GPP TS 32.300)".
- [10] ETSI TS 182 012: "Telecommunications and Internet Converged Services and Protocols for Advanced Networking (TISPAN); IMS-based PSTN/ISDN Emulation Sub-system (PES); Functional architecture".

2.2 Informative references

The following referenced documents are not essential to the use of the present document but they assist the user with regard to a particular subject area. For non-specific references, the latest version of the referenced document (including any amendments) applies.

- [i.1] ETSI TS 129 228: "Digital cellular telecommunications system (Phase 2+); Universal Mobile Telecommunications System (UMTS); LTE; IP Multimedia (IM) Subsystem Cx and Dx Interfaces; Signalling flows and message contents (3GPP TS 29.228)".
- [i.2] ETSI TS 129 328: "Digital cellular telecommunications system (Phase 2+); Universal Mobile Telecommunications System (UMTS); LTE; IP Multimedia Subsystem (IMS) Sh interface; Signalling flows and message contents (3GPP TS 29.328)".
- [i.3] Void.
- [i.4] ETSI TS 123 218: "Digital cellular telecommunications system (Phase 2+); Universal Mobile Telecommunications System (UMTS); LTE; IP Multimedia (IM) session handling; IM call model; Stage 2 (3GPP TS 23.218)".

3 Definitions and abbreviations

3.1 Definitions

For the purposes of the present document, the terms and definitions given in TS 188 002-1 [1] and the following apply:

IMS Service Profile: collection of service and user related data as defined in TS 129 228 [i.1]

NASS User ID: identity of the attached user at the network access

NOTE: Correspond to the Subscriber ID used in NASS specification [4].

sub-Profile: set of user network profile information

NOTE: Each user network profile may be divided into sub-profiles.

subscribed network access: collection of data related to a network access subscribed by the subscriber

subscribed NGN service: collection of data related to a NGN service subscribed by the subscriber

subscriber: entity (associated with one or more users) that is engaged in a Subscription with a service provider

NOTE: The subscriber is allowed to subscribe and unsubscribe services, to register a user or a list of users authorized to use these services, and also to set the limits relative to the use that associated users make of these services.

subscription: commercial relationship between the subscriber and the service provider

user: entity that consumes the services subscribed by the subscriber

user NGN network access profile: user profile in a specific network access

user NGN service profile: collection of service and user related data

3.2 Abbreviations

For the purposes of the present document, the following abbreviations apply:

AGCF	Access Gateway Control Function
AMF	Access Management Function
AS	Application Server
CLF	Connectivity session Location and repository Function
CNG	Customer Network Gateway
CNGCF	CNG Configuration Function
GAA	Generic Authentication Architecture
GPRS	General Packet Radio Service
IMS	IP Multimedia Subsystem
IOC	Information Object Class
IPTV	Internet Protocol Television
ME	Managed Element
NACF	Network Access Configuration Function
NASS	Network Attachment SubSystem
NGN	Next Generation Network
NOSI	NGN OSS Service Interface
P-CSCF	Proxy Call Session Control Function
PDBF	Profile Data Base Function
PES	PSTN Emulation Subsystem
RACS	Resource and Admission Control Subsystem
S-CSCF	Serving Call Session Control Function
SID	Shared Information/Data model
SuM	Subscription Management
TBD	To Be Defined in next release
TMF	TeleManagement Forum
TMN	Telecommunication Management Network
UAAF	User Access Authorization Function
UE	User Equipment
UML	Unified Modeling Language
UPSF	User Profile Server Function
VC	Virtual Channel
VP	Virtual Path

4 Void

5 Information Object Classes

5.1 Imported information entities and local labels

This clause identifies a list of information entities (e.g. information object class, information relationship, information attribute) that have been defined in other specifications and that are imported in the present document.

Label Reference	Local Label
TS 132 172 [7], Information Object Class, SuMSubscriberProfile	SuMSubscriberProfile
TS 132 172 [7], Information Object Class, SuMService	SuMService
TS 132 172 [7], Information Object Class, SuMSubscribedService	SuMSubscribedService
TS 132 172 [7], Information Object Class, SuMServiceProfile	SuMServiceProfile
TS 132 172 [7], Information Object Class, SuMCredentials	SuMCredentials
TS 132 172 [7], Information Object Class, IMServiceProfile	IMServiceProfile

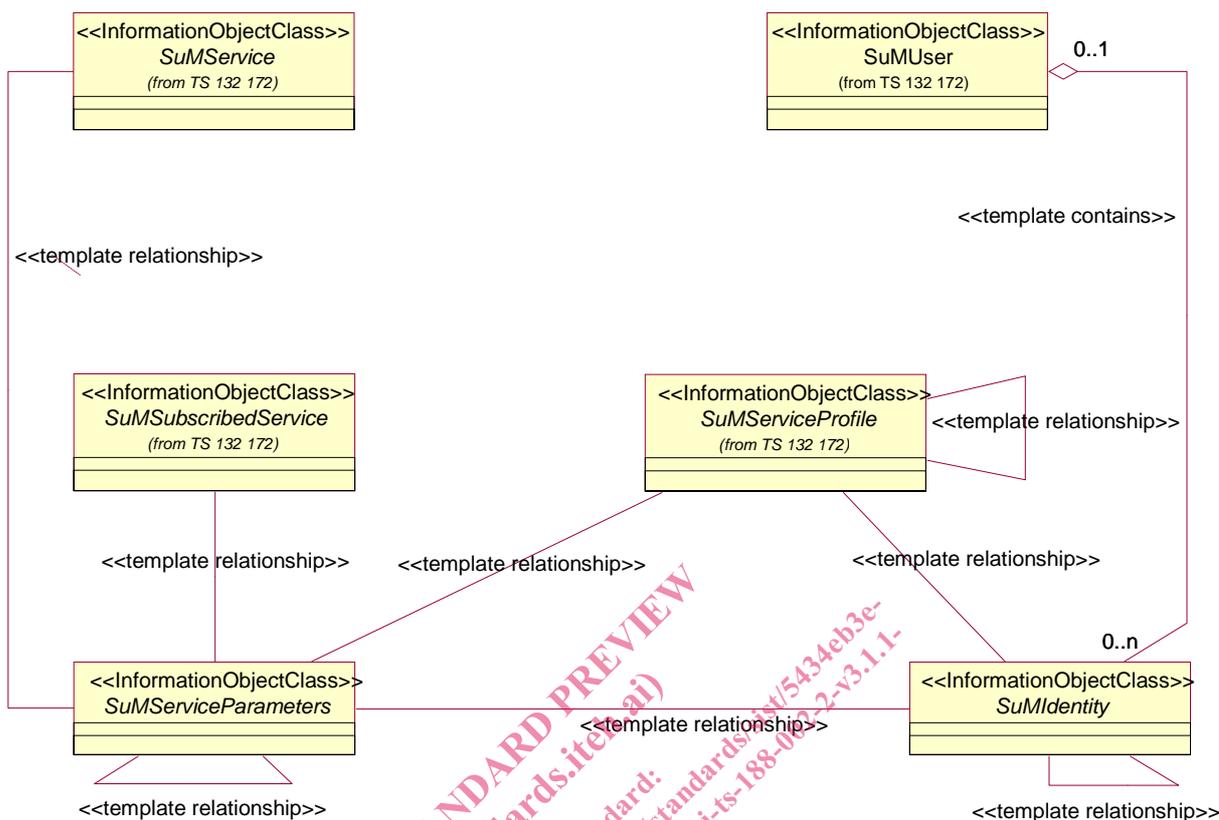

NOTE: The TISPAN SuM information model extends the 3GPP SuM information model described in TS 132 172 [7]. The imported IOCs are limited to the IOCs that the TISPAN specific definitions extend in terms of inheritance or name-containment. Other TS 132 172 [7] Information Object Classes are used in the present document and are not contained within the table since no extensions are done on them within the present document.

5.2 Class diagram

The TISPAN Subscription Management Information Model is based on the 3GPP SuM information model described in TS 132 172 [7] and reminded in annex A.

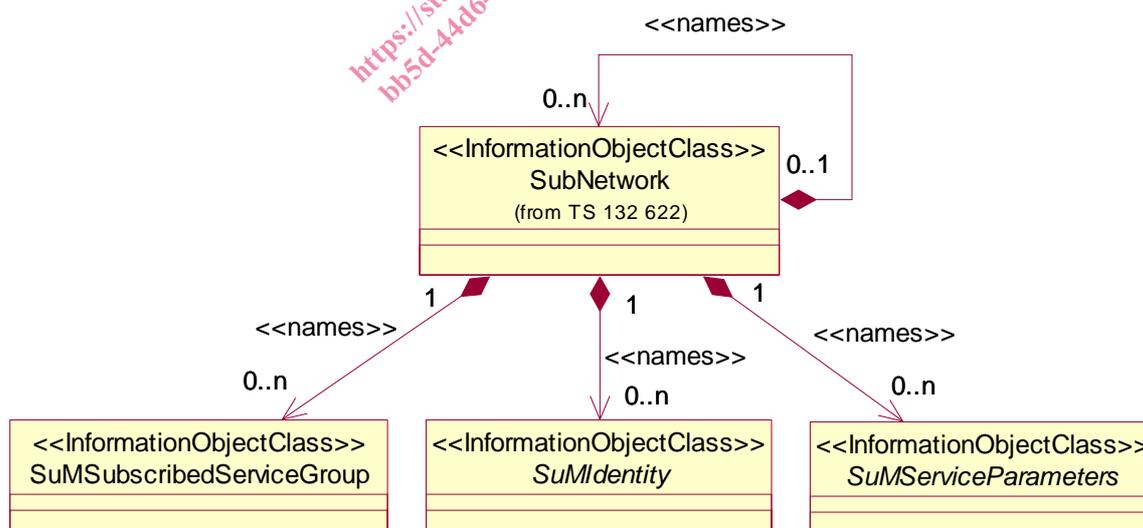

5.2.1 Attributes and relationships

This clause depicts the set of IOCs that encapsulate information relevant for the present document. This clause provides the overview of all information object classes in UML. Subsequent clauses provide more detailed specification of various aspects of these Information Object Classes (IOCs).

NOTE: For the other relationships of the imported IOCs, refer [7].

Figure 5.2.1.1: TISPAN SuM generic model

NOTE: The naming for the other TISPAN NGN specific IOCs is given by inheritance from the generic model.

Figure 5.2.1.2: TISPAN SuM naming

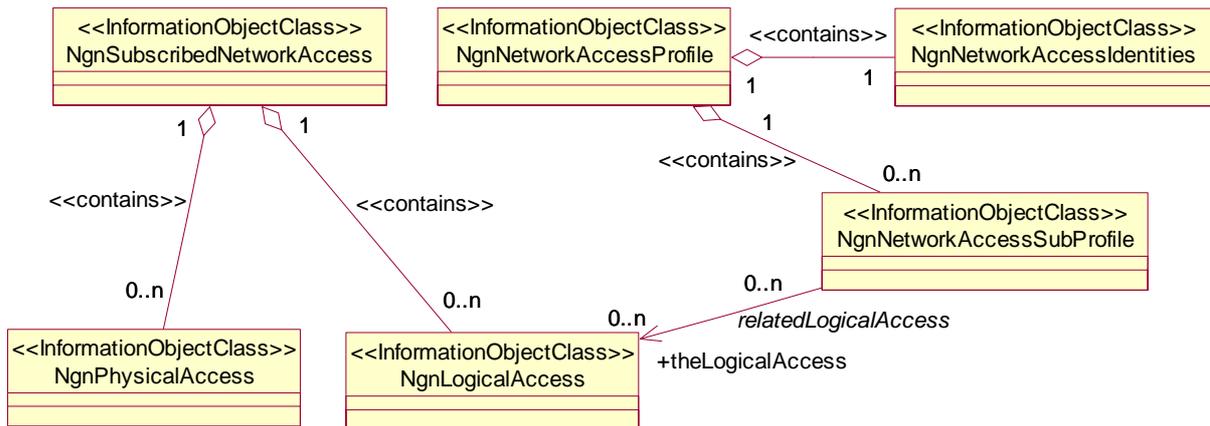

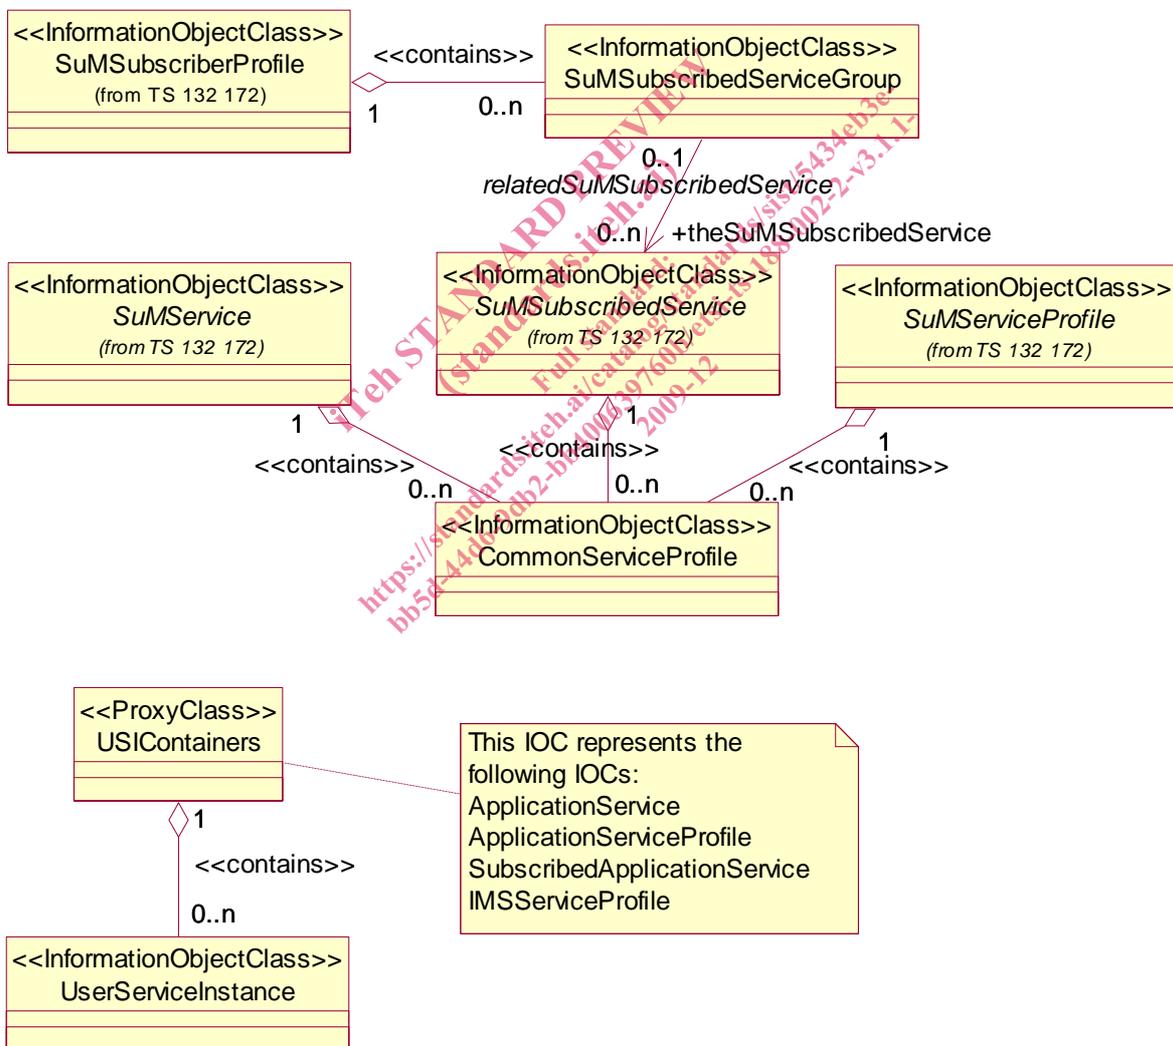

Figure 5.2.1.3: TISPAN SuM relationship diagram 1

NOTE: An object instance of either the UserServiceInstance IOC or the CommonServiceProfile can be contained by only one object instance of the possible parents indicated in the UML diagram.

Figure 5.2.1.4: TISPAN SuM relationship diagram 2
