**Earth-moving machinery — Symbols for  
operator controls and other displays —**

**Part 1:**  
Common symbols

**AMENDMENT 2: Additional symbols**

*Engins de terrassement — Symboles pour les commandes de l'opérateur et  
autres indications —*

*Partie 1: Symboles communs*

*AMENDEMENT 2: Symboles supplémentaires*

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Amendment 2 to International Standard ISO 6405-1:1991 was prepared by Technical Committee ISO/TC 127, *Earth-moving machinery*, Subcommittee SC 3, *Operation and maintenance*.

## Part 1: Common symbols

### AMENDMENT 2: Additional symbols

iTeh STANDARD PREVIEW  
(standards.iteh.ai)

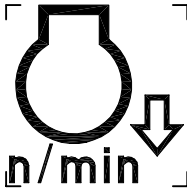

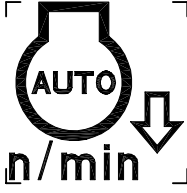

Page 10, clause 7, General symbols

Add the following symbols below 7.40

Symbol number	Symbol form/shape	Symbol description/application	ISO/IEC registration number
7.41		Filling	0028
7.42		Roadway travel mode (To indicate that the machine is set up for travel on public roadways.)	2310

Page 15, clause 8, Engine symbols

Add the following symbols below 8.27

Symbol number	Symbol form/shape	Symbol description/application	ISO/IEC registration number
8.28		Engine — Rotational speed — Instantaneous decrease	2308
8.29		Engine — Rotational speed — Automatic decrease	2309

Page 18, clause 9, Transmission symbols

Add the following symbols below 9.19

Symbol number	Symbol form/shape	Symbol description/application	ISO/IEC registration number
9.20		Fast	Application examples are not registered
9.21		Slow	Application examples are not registered
