This European Standard was approved by CEN on 13 October 2006 and includes Amendment 1 approved by CEN on 23 August 2007.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

SIST EN 1123-2:2007+A1:2007

<https://standards.iteh.ai/catalog/standards/sist/40a0dd66-7c54-469e-a7e5-2d992f17ba93/sist-en-1123-2-2007a1-2007>

EN 1123-2:2007 (E)

Foreword

This document (EN 1123-2:2006+A1:2007) has been prepared by Technical Committee CEN/TC 165 "Waste water engineering", the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by March 2008, and conflicting national standards shall be withdrawn at the latest by March 2008.

This document supersedes [\[A\]](#) EN 1123-2:2006 [\[A\]](#).

This document includes Amendment 1, approved by CEN on 2007-08-23.

The start and finish of text introduced or altered by amendment is indicated in the text by tags [\[A\]](#) [\[A\]](#).

This document on pipes and fittings of longitudinally welded hot-dip galvanized steel pipe with spigot and socket for waste water systems consists of the following Parts:

- Part 1: Requirements, testing, quality control;
- Part 2: Dimensions **iTeh STANDARD PREVIEW**
- Part 3: Dimensions and special requirements for vacuum drainage systems and for drainage systems in shipbuilding

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

Introduction

Pipes and fittings of longitudinally welded hot-dip galvanized steel pipes with spigot and socket for waste water systems as specified in this European Standard are used in gravity drainage systems in buildings. For vacuum drainage systems and for drainage systems in shipbuilding, it was necessary to specify additional requirements and further dimensional specifications for components and joints used in these systems. Components specified in this EN 1123-3 are used for vacuum drainage systems and for drainage systems in shipbuilding.

iTeh STANDARD PREVIEW (standards.iteh.ai)

SIST EN 1123-2:2007+A1:2007

<https://standards.iteh.ai/catalog/standards/sist/40a0dd66-7c54-469e-a7e5-2d992f17ba93/sist-en-1123-2-2007a1-2007>

EN 1123-2:2007 (E)

1 Scope

This European Standard applies to pipes and fittings of longitudinally welded hot-dip galvanized steel pipes with spigot and socket for waste water systems. It specifies dimensions and tolerances for pipes, fittings, pipe connectors and seals and establishes a system of designations for the different pipe and fitting types that conform to the stated requirements. This standard is only valid in connection with EN 1123-1. This standard does not apply to the marking of products. EN 1123-1 applies to the marking.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 295 (all Parts), *Vitrified clay pipes and fittings and pipe joints for drains and sewers*

EN 877, *Cast iron pipes and fittings, their joints and accessories for the evacuation of water from buildings — Requirements, test methods and quality assurance*

EN 1123-1, *Pipes and fittings of longitudinally welded hot-dip galvanized steel pipes with spigot and socket for waste water systems — Part 1: Requirements, testing, quality control*

EN 1329-1, *Plastics piping systems for soil and waste discharge (low and high temperature) within the building structure — Unplasticized poly(vinyl chloride) (PVC-U) — Part 1: Specifications for pipes, fittings and the system*

EN 1451-1, *Plastics piping systems for soil and waste discharge (low and high temperature) within the building structure — Polypropylene (PP) — Part 1: Specifications for pipes, fittings and the system*
<https://standards.iteh.ai/catalog/standards/sist/40a0dd66-7c54-469e-a7e5-4199007-2007-2007>

EN 1453-1, *Plastics piping systems with structured-wall pipes for soil and waste discharge (low and high temperature) inside buildings — Unplasticized poly(vinyl chloride) (PVC-U) — Part 1: Specifications for pipes and the system*

EN 1455-1, *Plastics piping systems for soil and waste discharge (low and high temperature) within the building structure — Acrylonitrile-butadiene-styrene (ABS) — Part 1: Requirements for pipes, fittings and the system*

EN 1519-1, *Plastics piping systems for soil and waste discharge (low and high temperature) within the building structure — Polyethylene (PE) — Part 1: Specifications for pipes, fittings and the system*

EN 1565-1, *Plastics piping systems for soil and waste discharge (low and high temperature) within the building structure — Styrene copolymer blends (SAN+PVC) — Part 1: Specifications for pipes, fittings and the system*

EN 1566-1, *Plastics piping systems for soil and waste discharge (low and high temperature) within the building structure — Chlorinated poly(vinyl chloride) (PVC-C) Part 1: Specifications for pipes, fittings and the system*

3 Terms and definitions

For the purposes of this document, the terms and definitions given in EN 1123-1:1999 apply.

4 Symbols and abbreviations

DN/ID	Nominal size with regard to the inside diameter
DN/OD	Nominal size with regard to the outside diameter
<i>d</i>	Diameter
<i>t</i>	Socket depth
<i>s</i>	Wall thickness
<i>l</i>	Effective length
<i>r</i>	Radius
α	Angle
<i>t₅</i>	Least insertion depth
<i>e</i>	Off-set dimensions (shift)

5 Dimensions

5.1 General and tolerances

The dimensions given shall be followed. Where no dimensions are given in this European Standard, tolerances for linear dimensions shall be followed according to Table 1, tolerances for radii shall be followed according to Table 2, tolerances for angular dimensions referring to the smaller side length shall be followed according to Table 3 and tolerances for elastomer parts shall be followed according to Table 4.

SIST EN 1123-2:2007+A1:2007
Table 1 — Tolerances for linear dimensions
<https://standards.ieee.org/catalog/standards/sist/40a0dd66-7c54-469e-a7e5-2d992f17ba93/sist-en-1123-Dimensions-in-millimetres>

Dimensional range	Tolerance
0 to 300	± 5
more than 300	± 8

Table 2 — Tolerances for radii

Dimensional range	Tolerance	Dimensions in millimetres
> 26 to 181	± 3	
> 181 to 378	± 4	
> 378 to 457	± 5	

A1 Table 3 — Tolerances for angular dimensions referring to the smaller side length **A1**

Dimensions in millimetres	
Side length mm	Tolerance °
> 10 to 120	±3
> 120 to 400	±2
> 400	±1,5

Table 4 — Tolerances for elastomer parts

Range of nominal size	Dimensions in millimetres	
	Form bound (F) %	Tolerance Form fitting bound (C)
> 25 to 40	±0,6	±1,0
> 40 to 63	±0,8	±1,3
> 63 to 100	±1,0	±1,6
> 100 to 160	±1,3	±2,0
> 160	±0,8	by agreement with the manufacturer of the components

5.2 Sockets

The socket dimensions according to Figure 1 shall conform to Table 5. Fittings are generally fabricated with socket type 1 A if the designation of the fitting does not specify the socket type.

Dimensions not specified shall be chosen appropriately.

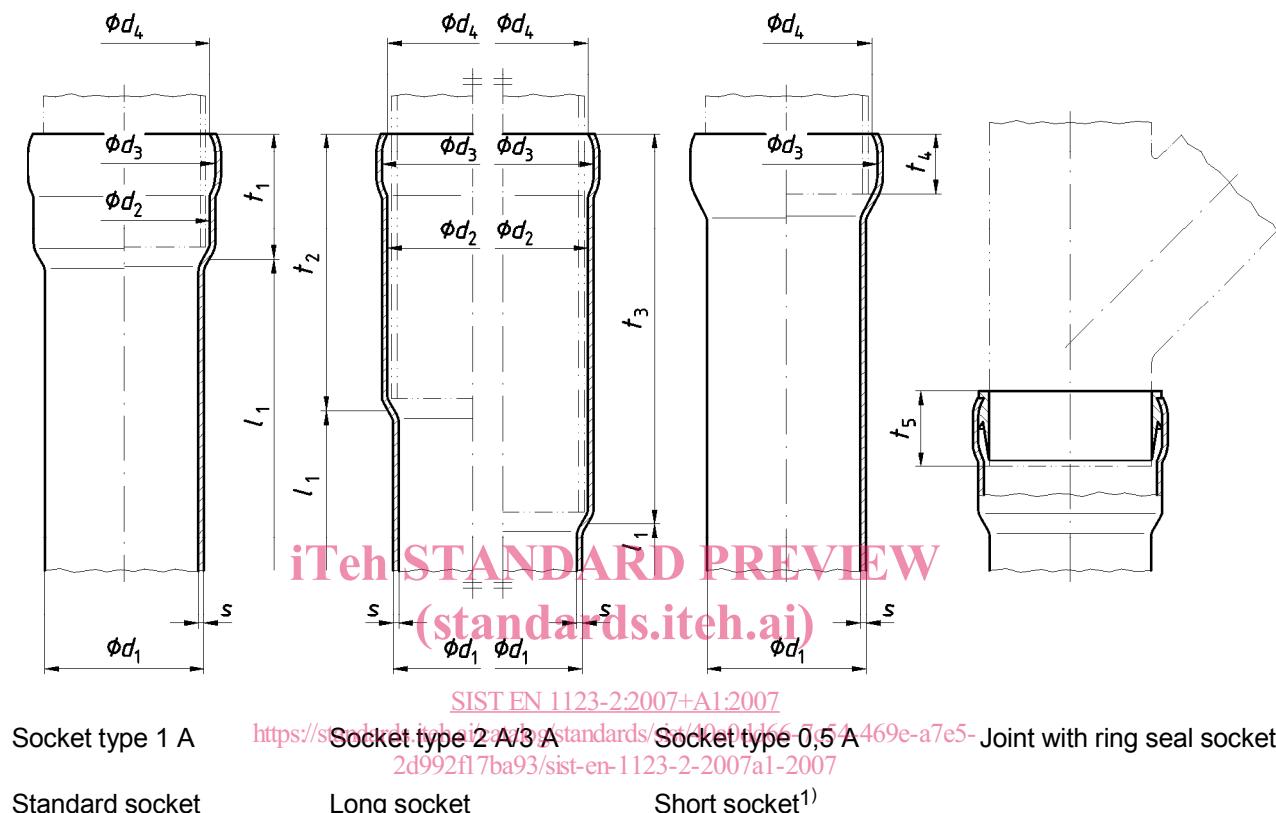

Figure 1 — Socket types

¹⁾ For use of the short socket, national regulations should be taken into account

Table 5 — Socket dimensions

Nominal size DN/ID	Type	d_1^a	s^b	Socket dimensions								Dimensions in millimetres

a Pipe ends slightly retracted.

b The wall thickness data refer to the ungalvanized pipe.

c Installation instructions only (necessary least insertion depth for tightness of connection) — except short socket.

5.3 Pipes

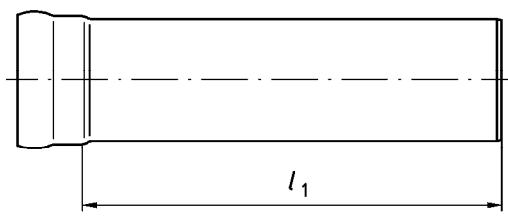

5.3.1 General

The effective length of pipes shall comply with Table 6 or Table 7.

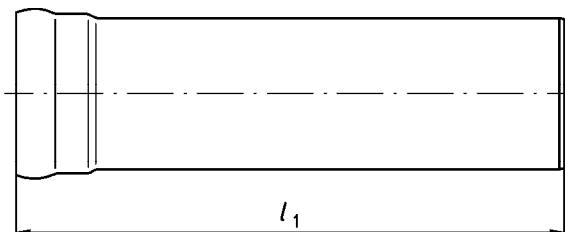

If the pipes have an additional corrosion protection (P) according to EN 1123-1, this shall be added to the designation.

5.3.2 Pipe with one socket — Shape B 1

Type A (DN/ID 40 to DN/ID 200)

Type B (DN/ID 250 and DN/ID 300)

**Figure 2 — Shape B 1**

Designation of a drainage steel pipe (B 1) with standard socket (1 A) of nominal size DN/ID 100 with an effective length $l_1 = 1\ 000\ \text{mm}$
