English Version

Automatic forced draught burners for liquid fuels

Brûleurs automatiques à air soufflé pour combustibles liquides

Automatische Brenner mit Gebläse für flüssige Brennstoffe

This draft European Standard is submitted to CEN members for formal vote. It has been drawn up by the Technical Committee CEN/TC 47.

If this draft becomes a European Standard, CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

This draft European Standard was established by CEN in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Warning : This document is not a European Standard. It is distributed for review and comments. It is subject to change without notice and shall not be referred to as a European Standard.

Bibliography.....	89

Foreword

This document (FprEN 267:2009) has been prepared by Technical Committee CEN/TC 47 "Atomizing oil burners and their components - Function - Safety - Testing", the secretariat of which is held by DIN.

This document is currently submitted to the Formal Vote.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s).

For relationship with EU Directive(s), see informative Annexes ZA, ZB and ZC, which are integral parts of this document.

This document will supersede EN 267:1999.

According to edition 1999 the following fundamental changes are given:

- inclusion of hazards by burners considered as machinery according to Directive 98/37/EC Machinery Directive and Directive 2006/42/EC Machinery Directive;
- additional requirements for burners in the scope with pressurised parts and /or firing pressurised bodies according to Directive 97/23/EC Pressure Equipment Directive (PED);
- in accordance with EN 676 requirements for electrical safety and industrial applications added;
- requirements for higher boiling petroleum based first raffinates added;
- standard structured as EN 676.

Following a request from CEN/TC 47, CEN has agreed to defer the date of withdrawal of EN 267:1999 for a transition period of 2 years.
