Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Amendment 1 to International Standard ISO 1832:1991 was prepared by Technical Committee ISO/TC 29, *Small tools*, Subcommittee SC 9, *Tools with cutting edges made of hard cutting materials*.

Indexable inserts for cutting tools — Designation

AMENDMENT 1: Tolerance of *d* and *m* of V-shape inserts

1 Scope

This amendment specifies the tolerance on *d* and *m* of V-shape inserts. At a later date, this amendment shall be incorporated in a fourth edition of ISO 1832.

2 Symbol for tolerance class — Reference 3

Delete the sentence after Table 5, add in Table 5 the tolerance on *d* and *m* of V-shape inserts and modify the sentence above Table 5 as follows:

In the case of rhombic inserts with an included angle of 55° (shape D) and of 35° (shape V), the values for tolerance classes M and N on *d* and *m* are indicated in Table 5.

Diameter of inscribed circle <i>d</i>		Tolerance on <i>d</i>		Tolerance on <i>m</i>		Shape of the insert concerned
mm	in	mm	in	mm	in	
6,35	1/4	± 0,05	± 0,002	± 0,16	± 0,006	V- 
7,94	5/16					
9,525	3/8					

3 Symbols for insert sizes (reference 5) according to standardized inscribed circles for equilateral and round inserts

Add in annex A, Table A.1, the following insert sizes.

Diameter of inscribed circle <i>d</i>		Symbol for insert size (reference 5) for insert shape											
mm	in	H	O	P	S	T	C	D	E	M	V	W	R
3,97		—	—	—	03	06	—	04	—	—	06	02	—
	5/32	1,2											
4,76		—	—	—	04	08	04	05	04	04	08	L3	—
	3/16	1,5
