iTeh STANDARD PREVIEW (standards.iteh.ai)

SIST HD 611.2 S1:1998
This Harmonization Document was approved by CENELEC on 1992-06-16.
<https://standards.iteh.ai/catalog/standards/SIS/1887854584802-9585-1992-06-16>
CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations
which stipulate the conditions for implementation of this Harmonization Document
on a national level.

Up-to-date lists and bibliographical references concerning national implementation
may be obtained on application to the Central Secretariat or to any CENELEC member.

This Harmonization Document exists in three official versions (English, French,
German).

CENELEC members are the national electrotechnical committees of Austria, Belgium,
Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg,
Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

CENELEC

European Committee for Electrotechnical Standardization
Comité Européen de Normalisation Electrotechnique
Europäisches Komitee für Elektrotechnische Normung

Central Secretariat: rue de Stassart 35, B-1050 Brussels

FOREWORD

The CENELEC questionnaire procedure, performed for finding out whether or not the International Standard IEC 216-2:1990 could be accepted without textual changes, has shown that no common modifications were necessary for the acceptance as Harmonization Document.

The reference document was submitted to the CENELEC members for formal vote and was approved by CENELEC as HD 611.2 S1 on 16 June 1992.

The following dates were fixed:

- latest date of announcement
of the HD at national level (doa) 1992-12-01
 - latest date of publication of
a harmonized national standard (dop) 1993-06-01
 - latest date of withdrawal of
conflicting national standards (dow) 1993-06-01

Annexes designated "normative" are part of the body of the standard.
In this standard, annex ZA is normative.

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**GUIDE FOR THE DETERMINATION
OF THERMAL ENDURANCE PROPERTIES
OF ELECTRICAL INSULATING MATERIALS**

Part 2: Choice of test criteria

FOREWORD

- 1) The formal decisions or agreements of the IEC on technical matters, prepared by Technical Committees on which all the National Committees having a special interest therein are represented, express, as nearly as possible, an international consensus of opinion on the subjects dealt with.
- 2) They have the form of recommendations for international use and they are accepted by the National Committees in that sense.
- 3) In order to promote international unification, the IEC expresses the wish that all National Committees should adopt the text of the IEC recommendation for their national rules in so far as national conditions will permit. Any divergence between the IEC recommendation and the corresponding national rules should, as far as possible, be clearly indicated in the latter.

iTeh STANDARD PREVIEW
PREFACE
(standards.iteh.ai)

This standard has been prepared by Sub-Committee 15B: Endurance tests, of IEC Technical Committee No. 15: Insulating materials.

<https://standards.iteh.ai/catalog/standards/sist/iec787-51-2cbv-11/0-029> - the second edition
This third edition of IEC Publication 216-2 replaces the second edition
issued in 1974.

The text of this standard is based on the following documents:

Six Months' Rule	Report on Voting
15B(CO)71	15B(CO)79

Full information on the voting for the approval of this standard can be found in the Voting Report indicated in the above table.

The following IEC publications are quoted in this standard:

Publications Nos. 172 (1987): Test procedure for the determination of the temperature index of enamelled winding wires.

243 (1967): Recommended methods of test for electric strength of solid insulating materials at power frequencies.

317: Specifications for particular types of winding wires.

370 (1971): Test procedure for thermal endurance of insulating varnishes - Electric strength method.
