## Contents

Foreword . . . . .	xi
Introduction . . . . .	xiv
1. Scope . . . . .	1
2. Normative references . . . . .	2
3. Terms, definitions, and symbols . . . . .	3
4. Conformance . . . . .	7
5. Environment . . . . .	9
5.1 Conceptual models . . . . .	9
5.1.1 Translation environment . . . . .	9
5.1.2 Execution environments . . . . .	11
5.2 Environmental considerations . . . . .	17
5.2.1 Character sets . . . . .	17
5.2.2 Character display semantics . . . . .	19
5.2.3 Signals and interrupts . . . . .	20
5.2.4 Environmental limits . . . . .	20
6. Language . . . . .	29
6.1 Notation . . . . .	29
6.2 Concepts . . . . .	29
6.2.1 Scopes of identifiers . . . . .	29
6.2.2 Linkages of identifiers . . . . .	30
6.2.3 Name spaces of identifiers . . . . .	31
6.2.4 Storage durations of objects . . . . .	32
6.2.5 Types . . . . .	33
6.2.6 Representations of types . . . . .	37
6.2.7 Compatible type and composite type . . . . .	40
6.3 Conversions . . . . .	42
6.3.1 Arithmetic operands . . . . .	42
6.3.2 Other operands . . . . .	46
6.4 Lexical elements . . . . .	49
6.4.1 Keywords . . . . .	50
6.4.2 Identifiers . . . . .	51
6.4.3 Universal character names . . . . .	53
6.4.4 Constants . . . . .	54
6.4.5 String literals . . . . .	62
6.4.6 Punctuators . . . . .	63
6.4.7 Header names . . . . .	64
6.4.8 Preprocessing numbers . . . . .	65
6.4.9 Comments . . . . .	66
6.5 Expressions . . . . .	67

6.5.1	Primary expressions	69
6.5.2	Postfix operators	69
6.5.3	Unary operators	78
6.5.4	Cast operators	81
6.5.5	Multiplicative operators	82
6.5.6	Additive operators	82
6.5.7	Bitwise shift operators	84
6.5.8	Relational operators	85
6.5.9	Equality operators	86
6.5.10	Bitwise AND operator	87
6.5.11	Bitwise exclusive OR operator	88
6.5.12	Bitwise inclusive OR operator	88
6.5.13	Logical AND operator	89
6.5.14	Logical OR operator	89
6.5.15	Conditional operator	90
6.5.16	Assignment operators	91
6.5.17	Comma operator	94
6.6	Constant expressions	95
6.7	Declarations	97
6.7.1	Storage-class specifiers	98
6.7.2	Type specifiers	99
6.7.3	Type qualifiers	108
6.7.4	Function specifiers	112
6.7.5	Declarators	114
6.7.6	Type names	122
6.7.7	Type definitions	123
6.7.8	Initialization	125
6.8	Statements and blocks	131
6.8.1	Labeled statements	131
6.8.2	Compound statement	132
6.8.3	Expression and null statements	132
6.8.4	Selection statements	133
6.8.5	Iteration statements	135
6.8.6	Jump statements	136
6.9	External definitions	140
6.9.1	Function definitions	141
6.9.2	External object definitions	143
6.10	Preprocessing directives	145
6.10.1	Conditional inclusion	147
6.10.2	Source file inclusion	149
6.10.3	Macro replacement	151
6.10.4	Line control	158
6.10.5	Error directive	159
6.10.6	Pragma directive	159

6.10.7	Null directive . . . . .	160
6.10.8	Predefined macro names . . . . .	160
6.10.9	Pragma operator . . . . .	161
6.11	Future language directions . . . . .	163
6.11.1	Floating types . . . . .	163
6.11.2	Linkages of identifiers . . . . .	163
6.11.3	External names . . . . .	163
6.11.4	Character escape sequences . . . . .	163
6.11.5	Storage-class specifiers . . . . .	163
6.11.6	Function declarators . . . . .	163
6.11.7	Function definitions . . . . .	163
6.11.8	Pragma directives . . . . .	163
6.11.9	Predefined macro names . . . . .	163
7.	Library . . . . .	164
7.1	Introduction . . . . .	164
7.1.1	Definitions of terms . . . . .	164
7.1.2	Standard headers . . . . .	165
7.1.3	Reserved identifiers . . . . .	166
7.1.4	Use of library functions . . . . .	166
7.2	Diagnostics <code>&lt;assert.h&gt;</code> . . . . .	169
7.2.1	Program diagnostics . . . . .	169
7.3	Complex arithmetic <code>&lt;complex.h&gt;</code> . . . . .	170
7.3.1	Introduction <small>ISO/IEC 9899:1999 <a href="https://standards.ieee.org/catalog/standards/sist/7451fd1d-bac9-4e45-b69f-2185d536ac1/iso-iec-9899-1999">https://standards.ieee.org/catalog/standards/sist/7451fd1d-bac9-4e45-b69f-2185d536ac1/iso-iec-9899-1999</a></small> . . . . .	170
7.3.2	Conventions . . . . .	171
7.3.3	Branch cuts . . . . .	171
7.3.4	The <b>CX_LIMITED_RANGE</b> pragma . . . . .	171
7.3.5	Trigonometric functions . . . . .	172
7.3.6	Hyperbolic functions . . . . .	174
7.3.7	Exponential and logarithmic functions . . . . .	176
7.3.8	Power and absolute-value functions . . . . .	177
7.3.9	Manipulation functions . . . . .	178
7.4	Character handling <code>&lt;ctype.h&gt;</code> . . . . .	181
7.4.1	Character classification functions . . . . .	181
7.4.2	Character case mapping functions . . . . .	184
7.5	Errors <code>&lt;errno.h&gt;</code> . . . . .	186
7.6	Floating-point environment <code>&lt;fenv.h&gt;</code> . . . . .	187
7.6.1	The <b>FENV_ACCESS</b> pragma . . . . .	189
7.6.2	Floating-point exceptions . . . . .	190
7.6.3	Rounding . . . . .	192
7.6.4	Environment . . . . .	194
7.7	Characteristics of floating types <code>&lt;float.h&gt;</code> . . . . .	196
7.8	Format conversion of integer types <code>&lt;inttypes.h&gt;</code> . . . . .	197
7.8.1	Macros for format specifiers . . . . .	197
7.8.2	Functions for greatest-width integer types . . . . .	198

7.9	Alternative spellings < <b>iso646.h</b> > . . . . .	201
7.10	Sizes of integer types < <b>limits.h</b> > . . . . .	202
7.11	Localization < <b>locale.h</b> > . . . . .	203
7.11.1	Locale control . . . . .	204
7.11.2	Numeric formatting convention inquiry . . . . .	205
7.12	Mathematics < <b>math.h</b> > . . . . .	211
7.12.1	Treatment of error conditions . . . . .	213
7.12.2	The <b>FP_CONTRACT</b> pragma . . . . .	214
7.12.3	Classification macros . . . . .	215
7.12.4	Trigonometric functions . . . . .	217
7.12.5	Hyperbolic functions . . . . .	220
7.12.6	Exponential and logarithmic functions . . . . .	222
7.12.7	Power and absolute-value functions . . . . .	227
7.12.8	Error and gamma functions . . . . .	229
7.12.9	Nearest integer functions . . . . .	230
7.12.10	Remainder functions . . . . .	234
7.12.11	Manipulation functions . . . . .	235
7.12.12	Maximum, minimum, and positive difference functions . . . . .	237
7.12.13	Floating multiply-add . . . . .	238
7.12.14	Comparison macros . . . . .	239
7.13	Nonlocal jumps < <b>setjmp.h</b> > . . . . .	242
7.13.1	Save calling environment . . . . .	242
7.13.2	Restore calling environment . . . . .	243
7.14	Signal handling < <b>signal.h</b> > . . . . .	245
7.14.1	Specify signal handling . . . . .	246
7.14.2	Send signal . . . . .	247
7.15	Variable arguments < <b>stdarg.h</b> > . . . . .	248
7.15.1	Variable argument list access macros . . . . .	248
7.16	Boolean type and values < <b>stdbool.h</b> > . . . . .	252
7.17	Common definitions < <b>stddef.h</b> > . . . . .	253
7.18	Integer types < <b>stdint.h</b> > . . . . .	254
7.18.1	Integer types . . . . .	254
7.18.2	Limits of specified-width integer types . . . . .	256
7.18.3	Limits of other integer types . . . . .	258
7.18.4	Macros for integer constants . . . . .	259
7.19	Input/output < <b>stdio.h</b> > . . . . .	261
7.19.1	Introduction . . . . .	261
7.19.2	Streams . . . . .	263
7.19.3	Files . . . . .	265
7.19.4	Operations on files . . . . .	267
7.19.5	File access functions . . . . .	269
7.19.6	Formatted input/output functions . . . . .	273
7.19.7	Character input/output functions . . . . .	294
7.19.8	Direct input/output functions . . . . .	299

7.19.9	File positioning functions . . . . .	300
7.19.10	Error-handling functions . . . . .	303
7.20	General utilities <b>&lt;stdlib.h&gt;</b> . . . . .	305
7.20.1	Numeric conversion functions . . . . .	306
7.20.2	Pseudo-random sequence generation functions . . . . .	311
7.20.3	Memory management functions . . . . .	312
7.20.4	Communication with the environment . . . . .	314
7.20.5	Searching and sorting utilities . . . . .	317
7.20.6	Integer arithmetic functions . . . . .	319
7.20.7	Multibyte/wide character conversion functions . . . . .	320
7.20.8	Multibyte/wide string conversion functions . . . . .	322
7.21	String handling <b>&lt;string.h&gt;</b> . . . . .	324
7.21.1	String function conventions . . . . .	324
7.21.2	Copying functions . . . . .	324
7.21.3	Concatenation functions . . . . .	326
7.21.4	Comparison functions . . . . .	327
7.21.5	Search functions . . . . .	329
7.21.6	Miscellaneous functions . . . . .	332
7.22	Type-generic math <b>&lt;tgmath.h&gt;</b> . . . . .	334
7.23	Date and time <b>&lt;time.h&gt;</b> . . . . .	337
7.23.1	Components of time . . . . .	337
7.23.2	Time manipulation functions . . . . .	338
7.23.3	Time conversion functions . . . . .	340
7.24	<del>Extended multibyte and wide character utilities <b>&lt;wchar.h&gt;</b></del> . . . . .	347
7.24.1	<del>Introduction</del> . . . . .	347
7.24.2	Formatted wide character input/output functions . . . . .	348
7.24.3	Wide character input/output functions . . . . .	366
7.24.4	General wide string utilities . . . . .	370
7.24.5	Wide character time conversion functions . . . . .	384
7.24.6	Extended multibyte/wide character conversion utilities . . . . .	385
7.25	Wide character classification and mapping utilities <b>&lt;wctype.h&gt;</b> . . . . .	392
7.25.1	Introduction . . . . .	392
7.25.2	Wide character classification utilities . . . . .	393
7.25.3	Wide character case mapping utilities . . . . .	398
7.26	Future library directions . . . . .	400
7.26.1	Complex arithmetic <b>&lt;complex.h&gt;</b> . . . . .	400

## **iTeh STANDARD PREVIEW (standards.iteh.ai)**

[ISO/IEC 9899:1999](#)

<https://standards.iteh.ai/catalog/standards/sist/7451fd1d-bac9-4e45-b69f-72f83d536ae1/iso-iec-9899-1999>

## Foreword

- 1 ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are member of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.
- 2 International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.
- 3 In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75% of the national bodies casting a vote.
- 4 International Standard ISO/IEC 9899 was prepared by Joint Technical Committee ISO/IEC JTC 1 *Information technology Subcommittee SC22 Programming languages, their environments and system software interfaces*. The Working Group responsible for this standard (WG 14) maintains a site on the World Wide Web at <http://www.dkuug.dk/JTC1/SC22/WG14/> containing additional information relevant to this standard such as ~~ISO/IEC 9899:1990 Rationale~~ for many of the decisions made during its preparation and a log of Defect Reports and Responses.  
<http://standards.iso.org/iso/standard/is/7451f111.bac9-4e45-b69f72183d536ae1/iso-iec-9899-1999>
- 5 This second edition cancels and replaces the first edition, ISO/IEC 9899:1990, as amended and corrected by ISO/IEC 9899/COR1:1994, ISO/IEC 9899/AMD1:1995, and ISO/IEC 9899/COR2:1996. Major changes from the previous edition include:
  - restricted character set support via digraphs and `<iso646.h>` (originally specified in AMD1)
  - wide character library support in `<wchar.h>` and `<wctype.h>` (originally specified in AMD1)
  - more precise aliasing rules via effective type
  - restricted pointers
  - variable-length arrays
  - flexible array members
  - `static` and type qualifiers in parameter array declarators
  - complex (and imaginary) support in `<complex.h>`
  - type-generic math macros in `<tgmath.h>`

- the **long long int** type and library functions
- increased minimum translation limits
- additional floating-point characteristics in **<float.h>**
- remove implicit **int**
- reliable integer division
- universal character names (\u and \U)
- extended identifiers
- hexadecimal floating-point constants and %a and %A printf/scanf conversion specifiers
- compound literals
- designated initializers
- // comments
- extended integer types and library functions in **<inttypes.h>** and **<stdint.h>**
- remove implicit function declaration
- preprocessor arithmetic done in **intmax\_t/uintmax\_t**
- mixed declarations and code
  - new block scopes for selection and iteration statements  
ISO/IEC 9899-1999  
<https://standards.ieee.org/catalog/standards/sist/7451d1d-bac9-4e45-b69f>
  - integer constant type rules  
72f83d536ae1/iso-iec-9899-1999
  - integer promotion rules
  - macros with a variable number of arguments
- the **vscanf** family of functions in **<stdio.h>** and **<wchar.h>**
- additional math library functions in **<math.h>**
- floating-point environment access in **<fenv.h>**
- IEC 60559 (also known as IEC 559 or IEEE arithmetic) support
- trailing comma allowed in **enum** declaration
- %lf conversion specifier allowed in **printf**
- inline functions
- the **sprintf** family of functions in **<stdio.h>**
- boolean type in **<stdbool.h>**
- idempotent type qualifiers
- empty macro arguments

- new struct type compatibility rules (tag compatibility)
  - additional predefined macro names
  - **\_Pragma** preprocessing operator
  - standard pragmas
  - **\_\_func\_\_** predefined identifier
  - **VA\_COPY** macro
  - additional **strftime** conversion specifiers
  - LIA compatibility annex
  - deprecate **ungetc** at the beginning of a binary file
  - remove deprecation of aliased array parameters
  - conversion of array to pointer not limited to lvalues
  - relaxed constraints on aggregate and union initialization
  - relaxed restrictions on portable header names
  - **return** without expression not permitted in function that returns a value (and vice versa)  
**iTeh STANDARD PREVIEW**  
**(standards.iteh.ai)**
- 6 Annexes D and F form a normative part of this standard; annexes A, B, C, E, G, H, I, J, the bibliography, and the index ~~are for information only~~ <sup>ISO/IEC 9899:1999</sup>. In accordance with Part 3 of the ISO/IEC Directives, this ~~foreword, the introduction, notes, footnotes, and examples are also for information only.~~ <sup>72183d536ae1/iso-iec-9899-1999</sup>

- 1 With the introduction of new devices and extended character sets, new features may be added to this International Standard. Subclauses in the language and library clauses warn implementors and programmers of usages which, though valid in themselves, may conflict with future additions.
- 2 Certain features are *obsolescent*, which means that they may be considered for withdrawal in future revisions of this International Standard. They are retained because of their widespread use, but their use in new implementations (for implementation features) or new programs (for language [6.11] or library features [7.26]) is discouraged.
- 3 This International Standard is divided into four major subdivisions:
  - preliminary elements (clauses 1–4);
  - the characteristics of environments that translate and execute C programs (clause 5);
  - the language syntax, constraints, and semantics (clause 6);
  - the library facilities (clause 7).
- 4 Examples are provided to illustrate possible forms of the constructions described. Footnotes are provided to emphasize consequences of the rules described in that subclause or elsewhere in this International Standard. References are used to refer to other related subclauses. Recommendations are provided to give advice or guidance to implementors. Annexes provide additional information and summarize the information contained in this International Standard. A bibliography lists documents that were referred to during the preparation of this standard.
- 5 The language clause (clause 6) is derived from “The C Reference Manual”.
- 6 The library clause (clause 7) is based on the 1984 /usr/group Standard.

- 1 This International Standard specifies the form and establishes the interpretation of programs written in the C programming language.<sup>1)</sup> It specifies
- iTeh STANDARD PREVIEW**  
**(standards.iteh.ai)**
- the representation of C programs;
  - the syntax and constraints of the C language;
  - the semantic rules for interpreting C programs;
  - the representation of input data to be processed by C programs;
  - the representation of output data produced by C programs;
  - the restrictions and limits imposed by a conforming implementation of C.
- 2 This International Standard does not specify
- the mechanism by which C programs are transformed for use by a data-processing system;
  - the mechanism by which C programs are invoked for use by a data-processing system;
  - the mechanism by which input data are transformed for use by a C program;
  - the mechanism by which output data are transformed after being produced by a C program;

---

1) This International Standard is designed to promote the portability of C programs among a variety of data-processing systems. It is intended for use by implementors and programmers.
