This European Standard was approved by CEN on 9 May 2008.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Iteland, Iteland, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

### Foreword

This document (EN 1645-2:2008) has been prepared by Technical Committee CEN/TC 245 "Leisure accomodation vehicles", the secretariat of which is held by BSI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by December 2008, and conflicting national standards shall be withdrawn at the latest by December 2008.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 1645-2:1998.

This document is one of a series covering the habitation and design aspects of leisure accommodation vehicles.

The method of calculation of user payloads to be allowed for when designing motor caravans is specified in EN 1646-2.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

<u>SIST EN 1645-2:2008</u> https://standards.iteh.ai/catalog/standards/sist/bf9ca718-cdec-4e88-b5bbc40b8afa21c7/sist-en-1645-2-2008

#### 1 Scope

This European standard specifies the calculation method of user payloads allowed, when designing caravans.

It also sets out the information relating to user payload to be included in the user's handbook.

It applies to all categories of caravan as defined in EN 13878.

#### 2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 13878:2003, Leisure accommodation vehicles — Terms and definitions

ISO 612:1978, Road vehicles — Dimensions of motor vehicles and towed vehicles — Terms and definitions

### 3 Terms and definitions

For the purposes of this document, the terms and definitions given in EN 13878:2003 and the following apply.

#### 3.1

# maximum technically permissible laden massndards.iteh.ai)

mass of the vehicle which takes into account operating conditions including factors such as the strength of materials, loading capacity of the tyres, etc., and which is stated by the vehicle manufacturer

3.2

https://standards.iteh.ai/catalog/standards/sist/bf9ca718-cdec-4e88-b5bbc40b8afa21c7/sist-en-1645-2-2008

#### registration mass

mass of the vehicle declared by the manufacturer at type approval for registration; this mass shall not exceed the mass according to 3.1, if the requirements specified in clause 5 of this standard are met

#### 3.3

#### mass of the caravan in running order

mass of the unladen caravan with bodywork in running order (see clause 4), tools, spare wheel (if any); it also includes the essential habitation equipment (see 3.5)

#### 3.4

#### user payload

difference between the maximum technically permissible laden mass (see 3.1) or the registration mass (see 3.2), if this mass differs from the mass according to 3.1, and the mass of the caravan in running order (see 3.3)

#### 3.5

#### essential habitation equipment

items required for the safe and proper functioning of the equipment for habitation as defined by the manufacturer of the caravan

#### 3.6

#### personal effect

item which a user can choose to carry in a caravan and which is not included as essential habitation equipment or optional equipment

### 3.7

optional equipment

items made available by the manufacturer over and above the standard specification for the caravan

#### Mass of the caravan in running order 4

#### 4.1 General

The mass of any item shall not be included more than once.

The manufacturer shall ensure that all manufacturing tolerances for weight fluctuations shall be allowed to be within the mass of the vehicle in running order.

#### 4.2 Essential habitation equipment

The essential habitation equipment shall include the following items, as appropriate, in the state given:

- a) Installation of Liquefied Petroleum Gas (LPG) system:
  - 1) mass of the recommended cylinder(s) or tank(s) when filled to 100 % of their nominal capacity;
  - number of cylinders to be considered are those that can be connected to the regulator(s) installed by 2) the manufacturer. eh STANDARD PREVIEW
- Mass of the liquids in: b)
  - (standards.iteh.ai) 1) fresh water storage and heating system - full;
  - SIST EN 1645-2:2008
  - central heating system full: full: ai/catalog/standards/sist/bf9ca718-cdec-4e88-b5bb-2)
  - c40b8afa21c7/sist-en-1645-2-2008 waste water tank – empty;
  - 4) toilet flushing tank full;
  - toilet waste holding tank empty; 5)
  - 6) essential fluids for the use of any other items of standard equipment full.
- Electrical supply C)
  - allowance of 4 kg for the low voltage (LV) connection cable;
  - 2) mass of the auxiliary battery(s), if provided or when provision has been included.

#### Calculation of user payload 5

#### 5.1 General

The user payload is the result of the addition of the masses for personal effects and optional equipment.

#### 5.2 Personal effects

Personal effects are typically items common to all occupants such as food, cutlery, pots, pans, first aid box, maps, portable chemical toilet, levelling blocks, TV and radio, fire blanket or fire extinguisher and items personal to each occupant such as clothing, footwear, bedding, books, cameras, toys and toiletries. Bicycles, boats, sail boards, sports equipment, etc. are also included whether carried on racks or otherwise.

The mass allowance *M*, for personal effects, in kilograms, for a caravan shall be calculated from the following formula:

$$M = 10n + 10l + 30 \tag{1}$$

where

6

- *l* is the overall length of the caravan in metres, excluding draw gear as given in **ISO 612:1978, 6.1.2**;
- *n* is the sum of all standard and optional berths.

NOTE It is essential that despite permitted tolerances in the mass in running order the personal effects allowance is not eroded below either 100 kg or as calculated in 5.2, whichever is the lower.

#### 5.3 Optional equipment

The manufacturer shall specify the mass of each item of optional equipment offered including the mass of any fluids required for its safe and proper functioning.

NOTE Examples for optional equipment offered are air conditioning, bicycle rack.

# User's handbook iTeh STANDARD PREVIEW

(standards.iteh.ai)

#### 6.1 Information on masses

The manufacturer shall state in the Caravan user's handbook the following information including the https://standards.iteh.avcatalog/standards/sist/bi9ca/18-cdec-4e88-b5bbc40b8afa21c7/sist-en-1645-2-2008

- a) maximum technically permissible laden mass and registration mass, in kilograms;
- b) mass of the vehicle in running order, in kilograms;
- c) mass of the user payload, in kilograms;
- d) mass of the essential habitation equipment, in kilograms.
- e) mass of the optional equipment, in kilograms;
- f) mass of the personal effects, in kilograms.

#### 6.2 Information about load spread

The manufacturer shall provide information and general principles related to the correct distribution of the various loads.

#### 6.3 Regulatory and safety advice

The manufacturer shall also include the following statements in the user's handbook:

a) PLEASE TAKE CARE TO ENSURE THAT YOU HAVE ALLOWED FOR THE MASSES OF ALL ITEMS YOU INTEND TO CARRY IN THE CARAVAN. e.g. optional equipment, essential habitation equipment and personal effects such as clothing, food, pets, bicycles, sailboards, sports equipment etc. For the purposes of towing vehicle to caravan compatibility calculation, the registration mass shall be used.

- b) **WARNING** UNDER NO CIRCUMSTANCES SHOULD THE REGISTRATION MASS OF THIS CARAVAN BE EXCEEDED.
- c) THE MASS OF THE CARAVAN IN RUNNING ORDER CONTAINS A PROVISION FOR THE MASSES OF LIQUIDS, GAS ETC. (SEE ESSENTIAL HABITATION EQUIPMENT IN USER HANDBOOK). PART OF THIS PROVISION CAN ALSO BE UTILISED AS ADDITIONAL PAYLOAD IF FOR EXAMPLE YOU WISH TO TRAVEL WITH WATER TANKS EMPTY OR WITH NO GAS CYLINDERS.
