## Intellectual Property Rights

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: *"Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards"*, which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<http://webapp.etsi.org/IPR/home.asp>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

---

## Foreword

This Technical Specification (TS) has been produced by ETSI 3rd Generation Partnership Project (3GPP).

The present document may refer to technical specifications or reports using their 3GPP identities, UMTS identities or GSM identities. These should be interpreted as being references to the corresponding ETSI deliverables.

The cross reference between GSM, UMTS, 3GPP and ETSI identities can be found under  
<http://webapp.etsi.org/key/queryform.asp>.

| 8.10    | Position Parameter Modification .....                         | 31 |
| 8.10.1  | General.....  | 31 |
| 8.10.2  | Successful Operation .....                                    | 32 |
| 8.10.3  | Abnormal Conditions.....                                      | 32 |
| 8.11    | Abort .....   | 32 |
| 8.11.1  | General.....  | 32 |
| 8.11.2  | Successful Operation .....                                    | 32 |
| 8.11.3  | Abnormal Conditions.....                                      | 33 |
| 8.12    | Position Periodic Report.....                                 | 33 |
| 8.12.1  | General.....  | 33 |
| 8.12.2  | Successful Operation .....                                    | 33 |
| 8.12.3  | Abnormal Conditions.....                                      | 34 |
| 8.13    | Position Periodic Result .....                                | 34 |
| 8.13.1  | General.....  | 34 |
| 8.13.2  | Successful Operation .....                                    | 34 |
| 8.13.3  | Abnormal Conditions.....                                      | 35 |
| 8.14    | Position Periodic Termination.....                            | 35 |
| 8.14.1  | General.....  | 35 |
| 8.14.2  | Successful Operation .....                                    | 35 |
| 8.14.3  | Abnormal Conditions.....                                      | 36 |
| 9       | Elements for PCAP Communication.....                          | 36 |
| 9.1     | Message Functional Definition and Content .....               | 36 |
| 9.1.1   | General.....  | 36 |
| 9.1.2   | Message Contents .....  | 36 |
| 9.1.2.1 | Presence .....  | 36 |
| 9.1.2.2 | Criticality .....   | 37 |
| 9.1.2.3 | Range .....   | 37 |
| 9.1.2.4 | Assigned Criticality .....                                    | 37 |
| 9.1.3   | POSITION CALCULATION REQUEST .....                            | 38 |
| 9.1.4   | POSITION CALCULATION RESPONSE .....                           | 39 |
| 9.1.5   | POSITION CALCULATION FAILURE .....                            | 39 |
| 9.1.6   | INFORMATION EXCHANGE INITIATION REQUEST .....                 | 40 |
| 9.1.7   | Information Exchange Initiation Response .....                | 41 |
| 9.1.8   | INFORMATION EXCHANGE INITIATION FAILURE .....                 | 41 |
| 9.1.9   | INFORMATION REPORT .....                                      | 41 |
| 9.1.10  | INFORMATION EXCHANGE TERMINATION REQUEST .....                | 41 |
| 9.1.11  | INFORMATION EXCHANGE FAILURE INDICATION .....                 | 42 |
| 9.1.12  | ERROR INDICATION .....  | 42 |
| 9.1.13  | POSITION INITIATION REQUEST .....                             | 42 |
| 9.1.14  | POSITION INITIATION RESPONSE .....                            | 42 |
| 9.1.15  | POSITION INITIATION FAILURE .....                             | 43 |
| 9.1.16  | POSITION ACTIVATION REQUEST .....                             | 44 |
| 9.1.17  | POSITION ACTIVATION RESPONSE .....                            | 45 |
| 9.1.18  | POSITION ACTIVATION FAILURE .....                             | 46 |
| 9.1.19  | POSITION PARAMETER MODIFICATION .....                         | 46 |
| 9.1.20  | ABORT .....   | 46 |
| 9.1.21  | POSITION PERIODIC REPORT .....                                | 47 |
| 9.1.22  | POSITION PERIODIC RESULT .....                                | 48 |
| 9.1.23  | POSITION PERIODIC TERMINATION .....                           | 48 |

## Foreword

This Technical Specification has been produced by the 3<sup>rd</sup> Generation Partnership Project (3GPP).

The contents of the present document are subject to continuing work within the TSG and may change following formal TSG approval. Should the TSG modify the contents of the present document, it will be re-released by the TSG with an identifying change of release date and an increase in version number as follows:

Version x.y.z

where:

- x the first digit:
  - 1 presented to TSG for information;
  - 2 presented to TSG for approval;
  - 3 or greater indicates TSG approved document under change control.
- y the second digit is incremented for all changes of substance, i.e. technical enhancements, corrections, updates, etc.
- z the third digit is incremented when editorial only changes have been incorporated in the document.

---

## 1 Scope

The present document specifies the *Positioning Calculation Application Part (PCAP)* between the Radio Network Controller (RNC) and the Stand-Alone SMLC (SAS). It fulfills the RNC-SAS communication requirements specified in [6] and thus defines the Iupc interface and its associated signaling procedures.

---

## 2 References

The following documents contain provisions which, through reference in this text, constitute provisions of the present document.

- References are either specific (identified by date of publication, edition number, version number, etc.) or non-specific.
- For a specific reference, subsequent revisions do not apply.
- For a non-specific reference, the latest version applies. In the case of a reference to a 3GPP document (including a GSM document), a non-specific reference implicitly refers to the latest version of that document *in the same Release as the present document*.

## 3 Definitions and abbreviations

### 3.1 Definitions

For the purposes of the present document, the following terms and definitions apply:

**Stand-Alone SMLC (SAS):** logical node that interconnects to the RNC over the Iupc interface via the PCAP protocol. An SAS performs the following procedures:

- provide GNSS (i.e. GPS or GANSS (e.g. Galileo)) related data to the RNC;
- performs the position calculation function based upon UE Positioning measurement data;
- in SAS centric mode, selects the positioning method and controls the positioning procedure.

**Elementary Procedure:** PCAP consists of Elementary Procedures (EPs).

An Elementary Procedure is a unit of interaction between the RNC and the SAS. An EP consists of an initiating message and possibly a response message. Two kinds of EPs are used:

- **Class 1:** Elementary Procedures with response (success or failure).
- **Class 2:** Elementary Procedures without response.

For Class 1 EPs, the types of responses can be as follows:

Successful:

- A signalling message explicitly indicates that the elementary procedure successfully completed with the receipt of the response.

Unsuccessful:

- A signalling message explicitly indicates that the EP failed.

Class 2 EPs are considered always successful.

**Information Exchange Context:** Information Exchange Context is created by the first Information Exchange Initiation Procedure initiated by the RNC and requested from the SAS.

The Information Exchange Context is deleted after the Information Exchange Termination or the Information Exchange Failure procedure when there is no more Information Exchange to be provided by the RNC to the SAS. The Information

Exchange Context is identified by an SCCP connection as, for Information Exchanges, only the connection oriented mode of the signalling bearer is used.

**Positioning Initiation Context:** In the SAS centric mode of operation each positioning request is assigned a unique logical connection identity, i.e., SCCP Source and Destination Local Reference numbers.

**RNC Centric Mode of Operation:** The RNC determines, initiates and controls the positioning method to be used for each positioning request.

**SAS Centric Mode of Operation:** The SAS determines, initiates and controls the positioning method to be used for each positioning request.

**Positioning Event:** The activity associated with the positioning of a UE resulting from the reception of UE positioning request from the CN.

## 3.2 Abbreviations

For the purposes of the present document, the following abbreviations apply:

|         |  |
|---------|--|
| A-GANSS | Assisted GANSS   |
| A-GPS   | Assisted GPS   |
| ASN.1   | Abstract Syntax Notation One   |
| CN      | Core Network   |
| CRNC    | Controlling RNC  |
| DGANSS  | Differential GANSS   |
| DGPS    | Differential GPS   |
| ECEF    | Earth-Centered, Earth-Fixed  |
| ECI     | Earth-Centered-Inertial  |
| EGNOS   | European Geostationary Navigation Overlay Service  |
| EP      | Elementary Procedure   |
| FDD     | Frequency Division Duplex  |
| GAGAN   | GPS Aided Geo-Augmented Navigation GANSS Galileo and Additional Navigation Satellite Systems |
| GLONASS | GLObal'naya NAVigatsionnaya Sputnikovaya Sistema (Engl.: Global Navigation Satellite System) |

## 4 General

### 4.1 Procedure Specification Principles

The principle for specifying the procedure logic is to specify the functional behaviour of the SAS exactly and completely. The RNC functional behaviour is left unspecified.

The following specification principles have been applied for the procedure text in clause 8:

- The procedure text discriminates between:
  - 1) Functionality which "shall" be executed:
    - The procedure text indicates that the receiving node "shall" perform a certain function Y under a certain condition. If the receiving node supports procedure X but cannot perform functionality Y requested in the REQUEST message of a Class 1 EP, the receiving node shall respond with the message used to report unsuccessful outcome for this procedure, containing an appropriate cause value.
  - 2) Functionality which "shall, if supported" be executed:
    - The procedure text indicates that the receiving node "shall, if supported," perform a certain function Y under a certain condition. If the receiving node supports procedure X, but does not support functionality Y, the receiving node shall proceed with the execution of the EP, possibly informing the requesting node about the not supported functionality.
- Any required inclusion of an optional IE in a response message is explicitly indicated in the procedure text. If the procedure text does not explicitly indicate that an optional IE shall be included in a response message, the optional IE shall not be included.

### 4.2 Forwards and Backwards Compatibility

The forwards and backwards compatibility of the protocol is assured by mechanism where all current and future messages, and IEs or groups of related IEs, include Id and criticality fields that are coded in a standard format that will not be changed in the future. These parts can always be decoded regardless of the standard version.

### 4.3 Specification Notations

For the purposes of the present document, the following notations apply:

- |  |   |
|--|---|
| [FDD]  | This tagging of a word indicates that the word preceding the tag "[FDD]" applies only to FDD.<br>This tagging of a heading indicates that the heading preceding the tag "[FDD]" and the section following the heading applies only to FDD.  |
| [TDD]  | This tagging of a word indicates that the word preceding the tag "[TDD]" applies only to TDD, including 3.84Mcps TDD, 7.68Mcps TDD and 1.28Mcps TDD. This tagging of a heading indicates that the heading preceding the tag "[TDD]" and the section following the heading applies only to TDD, including 3.84Mcps TDD, 7.68Mcps TDD and 1.28Mcps TDD. |
| [3.84Mcps TDD] This tagging of a word indicates that the word preceding the tag "[3.84Mcps TDD]" applies only to 3.84Mcps TDD. This tagging of a heading indicates that the heading preceding the tag "[3.84Mcps TDD]" and the section following the heading applies only to 3.84Mcps TDD. |   |
| [1.28Mcps TDD] This tagging of a word indicates that the word preceding the tag "[1.28Mcps TDD]" applies only to 1.28Mcps TDD. This tagging of a heading indicates that the heading preceding the tag "[1.28Mcps TDD]" and the section following the heading applies only to 1.28Mcps TDD. |   |
