

## Standard Specification for Zinc<sup>1</sup>

This standard is issued under the fixed designation B 6; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

*This standard has been approved for use by agencies of the Department of Defense.*

### 1. Scope\*

1.1 This specification covers zinc metal made from ore or other material by a process of distillation or by electrolysis in three grades as follows:

- 1.1.1 Special High Grade,
- 1.1.2 High Grade,
- 1.1.3 Prime Western.

NOTE 1—Certain continuous galvanizing grades are specified in Specification B 852. Other continuous galvanizing and controlled lead grades are not included in this specification but are covered by specific user purchasing specifications.

1.2 This specification does not cover zinc produced by “sweating” or remelting of secondary zinc.

1.3 The values stated in inch-pound units are to be regarded as the standard. The values given in parentheses are for information only.

1.4 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to become familiar with all hazards including those identified in the appropriate Material Safety Data Sheet (MSDS) for this product/material as provided by the manufacturer; to establish appropriate safety and health practices, and determine the applicability of regulatory limitations prior to use.*

### 2. Referenced Documents

2.1 The following documents of the issue in effect on the date of material purchase form a part of this specification to the extent referenced herein.

2.2 *ASTM Standards:*<sup>2</sup>

**B 852** Specification for Continuous Galvanizing Grade (CGG) Zinc Alloys for Hot-Dip Galvanizing of Sheet Steel

<sup>1</sup> This specification is under the jurisdiction of ASTM Committee B02 on Nonferrous Metals and Alloys and is the direct responsibility of Subcommittee B02.04 on Zinc and Cadmium.

Current edition approved Nov. 1, 2003. Published November 2003. Originally approved in 1911. Last previous edition approved in 2000 as B 6 – 00.

<sup>2</sup> For referenced ASTM standards, visit the ASTM website, www.astm.org, or contact ASTM Customer Service at service@astm.org. For *Annual Book of ASTM Standards* volume information, refer to the standard’s Document Summary page on the ASTM website.

- B 899** Terminology Relating to Non-ferrous Metals and Alloys
- B 914** Practice for Color Codes on Zinc and Zinc Alloy Ingot for Use in Hot-Dip Galvanizing of Steel
- E 29** Practice for Using Significant Digits in Test Data to Determine Conformance with Specifications
- E 47** Test Methods for Chemical Analysis of Zinc Die-Casting Alloys<sup>3</sup>
- E 88** Practice for Sampling Nonferrous Metals and Alloys in Cast Form for Determination of Chemical Composition
- E 527** Practice for Numbering Metals and Alloys (UNS)
- E 536** Test Methods for Chemical Analysis of Zinc and Zinc Alloys

### 3. Terminology

3.1 Terms shall be defined in accordance with Terminology B 899.

3.2 *Definitions of Terms Specific to This Standard:*

3.2.1 *Special High Grade, n*—a high purity grade of zinc containing a minimum of 99.990 % zinc, with controlled impurity levels, as specified in Table 1.

3.2.2 *High Grade, n*—a grade of zinc containing a minimum of 99.90 % zinc, with controlled impurity levels, as specified in Table 1.

3.2.3 *Prime Western, n*—a grade of zinc containing 0.5–1.4 % lead, a minimum of 98.0 % zinc, with controlled impurity levels, as specified in Table 1.

3.3 *Abbreviations:*

3.3.1 *SHG*—Special High Grade Zinc

3.3.2 *HG*—High Grade Zinc

3.3.3 *PW*—Prime Western Zinc

### 4. Ordering Information

4.1 Orders for zinc metal under this specification shall include the following information:

4.1.1 ASTM designation and year of issue,

4.1.2 Quantity (weight),

4.1.3 Name of material (zinc metal),

4.1.4 Size (see Section 7), and

<sup>3</sup> Withdrawn.

\*A Summary of Changes section appears at the end of this standard.
