## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this Amendment may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to International Standard ISO 8986-2:1995 was prepared by Technical Committee ISO/TC 61, *Plastics*, Subcommittee SC 9, *Thermoplastics materials*.

## Part 2: Preparation of test specimens and determination of properties

### AMENDMENT 1

Page 2

#### Clause 2

Replace the normative reference to ASTM D 3350 by:

“ASTM D 3895-98, *Standard Test Method for Oxidative-Induction Time of Polyolefins by Differential Scanning Calorimetry.*”

Add the following note:

“NOTE An International Standard (ISO 11357-6) is in preparation for the determination of oxidative induction time and, when published, will probably replace ASTM D 3895 as the normative reference at the next revision of this part of ISO 8696.”

Page 5

#### Table 3

Replace

"Oxidation induction temperature" in accordance with "ASTM D 3350"

by

"Oxidation induction time" in accordance with "ASTM D 3895".
