

ETSI TS 102 527-5 V1.1.1 (2013-04)

**Digital Enhanced Cordless Telecommunications (DECT);
New Generation DECT;
Part 5: Additional feature set nr. 1
for extended wideband speech services**

PREVIEW

Foreword.....	9
1 Scope	10
2 References	11
2.1 Normative references	11
2.2 Informative references.....	12
3 Definitions, symbols and abbreviations	13
3.1 Definitions.....	13
3.2 Symbols.....	14
3.3 Abbreviations	14
4 Description of Services	16
4.1 Additional feature set nr.1 for extended wideband speech services	16
4.1.1 Back-compatibility with GAP.....	16
4.1.2 Back-compatibility with New Generation DECT; Part 1: wideband speech	16
4.1.3 Back-compatibility with New Generation DECT; Part 3: extended wideband speech services	16
4.2 Additional features for extended wideband speech services defined in the present document	17
5 Service and feature definitions	18
5.1 New Generation DECT Speech Services	18
5.2 Network (NWK) features	18
5.3 Data Link Control (DLC) service definitions.....	18
5.4 Medium Access Control (MAC) service definitions.....	18
5.5 Physical Layer (PHL) service definitions.....	18
5.6 Speech coding and audio feature definitions.....	18
5.7 Application features	19
6 Inter-operability requirements.....	19
6.1 General	19
6.1.1 Editorial conventions	19
6.1.2 Radio and audio conformance requirements.....	20
6.2 New Generation DECT Speech Services support status	20
6.3 Services to DECT feature implementation mappings.....	20
6.4 NWK features.....	29
6.5 Data Link Control (DLC) services	30
6.6 Medium Access Control (MAC) services	32
6.7 Physical layer (PHL) services	32
6.8 Speech coding and audio features	33
6.9 Application features	34
6.10 Network (NWK) feature to procedure mapping.....	34
6.11 Data Link Control (DLC) Service to procedure mapping	42
6.12 Medium Access Control (MAC) service to procedure mapping	43
6.13 Application feature to procedure mapping	45
6.14 General requirements	45
6.14.1 Network (NWK) layer message contents.....	45
6.14.2 Transaction identifier.....	45
6.14.3 Length of a Network (NWK) layer message	46
6.14.4 Handling of error and exception conditions.....	46
6.14.5 Generic Access Profile (GAP) default setup attributes	46
6.14.6 Coexistence of Mobility Management (MM) and Call Control (CC) procedures	46
6.14.7 Coding rules for information elements	46
7 Procedure description.....	46
7.1 Backward compatibility with Generic Access Profile (GAP), New Generation DECT part 1 (wideband speech) and with New Generation DECT part 3 (extended wideband speech services) equipment.....	47

7.1.1	Backward compatibility with Generic Access Profile (GAP); Requirements for NG-DECT, part 5 Fixed Parts (FPs).....	47
7.1.2	Backward compatibility with Generic Access Profile (GAP); Requirements for NG-DECT, part 5 Portable Parts (PPs) registered on GAP compliant FP.....	47
7.1.3	Backward compatibility with New Generation DECT, part 1; Requirements for NG-DECT, part 5 Fixed Parts (FPs).....	47
7.1.4	Backward compatibility with New Generation DECT, part 1; Requirements for NG-DECT, part 5 Portable Parts (PPs) registered on NG-DECT part 1 FP.....	47
7.1.5	Backward compatibility with New Generation DECT, part 3; Requirements for NG-DECT, part 5 Fixed Parts (FPs).....	48
7.1.6	Backward compatibility with New Generation DECT, part 3; Requirements for NG-DECT, part 5 Portable Parts (PPs) registered on NG-DECT part 3 FP.....	48
7.2	Generic Access Profile (GAP) procedures	48
7.3	New Generation DECT; part 1: Wideband Speech and New Generation DECT; part 3: Extended Wideband Speech Services procedures	48
7.3.1	Implementation examples of part 1: Wideband Speech specific procedures	48
7.3.2	Implementation examples of part 3: Extended Wideband Speech Services specific procedures.....	49
7.4	Network (NWK) layer procedures specific to part 5.....	49
7.4.1	Generic events notification	49
7.4.1.1	General	49
7.4.1.2	Voice Message waiting notification.....	49
7.4.1.3	Missed call notifications	49
7.4.1.4	List change notification.....	49
7.4.1.5	Line and diagnostic statuses notifications	50
7.4.1.5.1	General requirements.....	50
7.4.1.5.2	Events triggering 'Line and diagnostic status' list related indications.....	51
7.4.1.6	SMS Message notification	54
7.4.2	Date and Time synchronization	55
7.4.3	Handling of parallel calls	55
7.4.3.1	Parallel call common requirements	55
7.4.3.2	Control messages	55
7.4.3.3	Codec change for parallel calls	57
7.4.3.4	Sending negative acknowledgement	57
7.4.3.5	Common parallel call procedures (external or internal).....	57
7.4.3.6	Call transfer.....	57
7.4.3.7	3-party conference with established external and/or internal calls.....	57
7.4.3.8	Intrusion call (from PP to FP).....	57
7.4.3.9	Internal call codec priority	57
7.4.3.10	Handling of lines where second calls are signalled in-band.....	57
7.4.4	Handling of single call services	57
7.4.5	Line identification.....	57
7.4.6	Call identification	57
7.4.6.1	Call identification general requirements	57
7.4.6.2	Call identifier assignment on first outgoing call (FP to PP).....	57
7.4.6.3	Call identifier assignment on first incoming call (FP to PP).....	57
7.4.6.4	Call status indication to the handset (FP to PP)	58
7.4.6.4.1	Call status indication general requirements.....	58
7.4.6.4.2	Call status indication as call information.....	58
7.4.6.4.3	Call status principles and values.....	58
7.4.6.4.4	Call status reasons summary and MMI mapping.....	60
7.4.6.4.5	Call statuses for a first "Outgoing external call"	61
7.4.6.4.6	Call statuses for a first "Outgoing external call" using early {CC-CONNECT} message	61
7.4.6.4.7	Call statuses for an "Outgoing external call" - user busy	61
7.4.6.4.8	Call statuses for an "Outgoing external call" - number not available	61
7.4.6.4.9	Call statuses for a first "Incoming external call"	61
7.4.6.4.10	Call statuses for a first "Incoming external call"	61
7.4.7	Multiple lines handling	61
7.4.8	Multiple call line handling	61
7.4.9	PP and FP capabilities indication and broadcast.....	61
7.4.9.1	Terminal capability indication	61
7.4.9.2	Higher layer information FP broadcast	63
7.4.9.2.1	Higher layer information in standard FP broadcast (Qh = 3)	63

7.4.9.2.2	Higher layer information in Extended FP broadcast (Qh = 4).....	63
7.4.9.2.3	Extended Higher Layer capabilities part 2 (Qh = 11).....	63
7.4.10	List access service.....	64
7.4.10.1	General considerations	64
7.4.10.2	List change notification.....	66
7.4.10.2.1	General rule	66
7.4.10.2.2	Mandatory notifications.....	69
7.4.10.3	List identifier codings	70
7.4.10.4	List Access Commands	71
7.4.10.4.1	Start and end session	74
7.4.10.4.2	Query supported entry fields	74
7.4.10.4.3	Read entries	74
7.4.10.4.4	Edit entry	74
7.4.10.4.5	Save entry	74
7.4.10.4.6	Delete entry	78
7.4.10.4.7	Delete list.....	78
7.4.10.4.8	Search entries	78
7.4.10.4.9	Negative Acknowledgement.....	78
7.4.10.4.10	Data packet / Data packet last.....	79
7.4.10.4.11	Read selected entries	79
7.4.10.4.12	Write entry.....	82
7.4.10.5	Lists and entry fields	85
7.4.10.5.1	Fields description.....	85
7.4.10.5.2	"List of Supported Lists" entry fields	88
7.4.10.5.3	"Missed Calls List" entry fields	88
7.4.10.5.4	"Outgoing Calls List" entry fields	89
7.4.10.5.5	"Incoming Accepted Calls List" entry fields	89
7.4.10.5.6	"All Calls List" entry fields	89
7.4.10.5.7	"Contact List" entry fields	89
7.4.10.5.8	"Internal Names List" entry fields	89
7.4.10.5.9	"DECT System Settings List" entry fields	89
7.4.10.5.10	"Line Settings List" entry fields	89
7.4.10.5.11	"All Incoming Calls List" entry fields	89
7.4.10.5.12	"Line and Diagnostic Statuses List" entry fields	89
7.4.10.6	List access service call and interactions with voice calls	89
7.4.10.7	Generic sequence charts for list access	89
7.4.10.8	Use case examples for list access	89
7.4.10.9	Extended list change notification	89
7.4.10.9.1	General requirements.....	89
7.4.10.9.2	Sending rules	91
7.4.11	DECT system and line settings	93
7.4.11.1	DECT system and line settings considerations	93
7.4.11.2	Interactions between registration, attachments of handsets and lists	93
7.4.11.3	DECT System Settings List	93
7.4.11.3.1	Field 'Current PIN code'	95
7.4.11.3.2	Field 'Clock master'	95
7.4.11.3.3	Field 'Base reset'	95
7.4.11.3.4	Field 'FP IP address / type'.....	95
7.4.11.3.5	Field 'FP IP address / value'.....	95
7.4.11.3.6	Field 'FP IP address / subnet mask'.....	95
7.4.11.3.7	Field 'FP IP address / gateway'	95
7.4.11.3.8	Field 'FP IP address / DNS server'.....	95
7.4.11.3.9	Field 'FP version / Firmware version'.....	95
7.4.11.3.10	Field 'FP version / Eeprom version'.....	95
7.4.11.3.11	Field 'FP version / Hardware version' field.....	95
7.4.11.3.12	Field 'Emission mode'.....	95
7.4.11.3.13	Field 'New PIN code'	95
7.4.11.3.14	Field 'Base manual transmit power control'.....	96
7.4.12	Calling line identity restriction (CLIR).....	96
7.4.13	Call forwarding (external calls)	96
7.4.14	DTMF handling	96
7.4.15	Tones provision	96

7.4.16	Headset management	96
7.4.17	UTF-8 CNIP	96
7.4.18	Location registration after re-lock	97
7.4.19	PT alerting using pattern signalling	97
7.4.20	Date and Time recovery	97
7.4.21	Void	97
7.4.22	Void	97
7.4.23	Void	97
7.4.24	Void	97
7.4.25	Void	97
7.4.26	Void	97
7.4.27	Void	98
7.4.28	Void	98
7.4.29	Void	98
7.4.30	Void	98
7.4.31	Void	98
7.4.32	Contact number and name matching on outgoing call	98
7.4.32.1	Contact number and name matching on outgoing call	98
7.4.33	Contact number and name matching on incoming call	101
7.4.34	Line and diagnostic information	101
7.4.34.1	General requirements	101
7.4.34.2	Exposed diagnostic information	103
7.4.34.3	Line and Diagnostic Statuses List	104
7.4.34.3.1	Field 'Line id'	104
7.4.34.3.2	Field 'OK status'	104
7.4.34.3.3	Field 'Line use status'	105
7.4.34.3.4	Field 'Handset use status'	106
7.4.34.3.5	Field 'Call Forwarding status'	106
7.4.34.3.6	Field 'Diagnostic error status'	107
7.4.34.4	Diagnostic indication	110
7.4.35	Short Message Service	110
7.4.35.1	General requirements	110
7.4.35.2	Incoming SMS handling	111
7.4.35.3	Outgoing SMS handling	111
7.4.35.4	SMS settings	114
7.4.35.4.1	SMS Settings List	114
7.4.35.4.2	SMS settings fields	115
7.4.35.5	SMS related entry fields and lists	119
7.4.35.5.1	SMS related entry fields	119
7.4.35.5.2	Incoming SMS List entry fields	122
7.4.35.5.3	Sent SMS List entry fields	122
7.4.35.5.4	Outgoing SMS List entry fields	123
7.4.35.5.5	Draft SMS List entry fields	123
7.4.36	(Digital) Telephone Answering Machine (DTAM)	123
7.4.36.1	DTAM description	123
7.4.36.1.1	General requirements	123
7.4.36.1.2	DTAM settings management	124
7.4.36.1.3	DTAM incoming and welcome messages management	125
7.4.36.2	DTAM profiles	126
7.4.36.2.1	Voice oriented DTAM	126
7.4.36.2.2	Visual DTAM	128
7.4.36.3	DTAM consulting call	129
7.4.36.3.1	General description	129
7.4.36.3.2	Parallel call during active DTAM consulting call	133
7.4.36.4	DTAM commands	133
7.4.36.4.1	DTAM commands general requirements	133
7.4.36.4.2	Start DTAM session	134
7.4.36.4.3	Select neighbour message	135
7.4.36.4.4	Play message	136
7.4.36.4.5	Delete message	138
7.4.36.4.6	Pause/resume playing of message	140
7.4.36.4.7	Stop playing message	140

7.4.36.4.8	Record welcome message.....	141
7.4.36.4.9	Stop recording welcome message.....	142
7.4.36.4.10	Negative acknowledgement.....	143
7.4.36.4.11	DTAM status command	144
7.4.36.5	DTAM related lists.....	144
7.4.36.5.1	DTAM specific fields description	144
7.4.36.5.2	DTAM Settings List	150
7.4.36.5.3	DTAM Incoming Calls List.....	150
7.4.36.5.4	DTAM Welcome Message List.....	151
7.4.36.5.5	List Access service call transformation into a DTAM consulting call	151
7.4.36.5.6	Local DTAM PIN code management	154
7.4.36.6	Call Screening.....	155
7.4.36.6.1	Screening general requirements.....	155
7.4.36.6.2	Call screening indication (FP to PP).....	156
7.4.36.6.3	Call screening acceptance (PP to FP)	157
7.4.36.6.4	Call screening rejection (PP to FP).....	158
7.4.36.6.5	Call screening interception (PP to FP).....	159
7.4.36.6.6	FP initiated call screening release (FP to PP).....	160
7.4.36.6.7	Parallel call during active call screening	161
7.4.36.6.8	Call screening of a waiting call	161
7.4.36.6.9	Call screening with screening and non-screening PPs.....	162
7.4.36.6.10	Single/Multiple PP(s) call screening mode.....	164
7.5	Data Link Control (DLC) layer procedures.....	165
7.6	Medium Access Control (MAC) layer procedures.....	165
7.7	Physical layer (PHL) requirements.....	165
7.8	Requirements regarding the speech transmission.....	165
7.9	Management procedures.....	165
7.10	Application procedures.....	165
7.10.1	Easy PIN code and easy pairing registration	165
7.10.2	Handset locator	165
7.10.3	Transmit power control.....	165
7.10.3.1	Base manual transmit power control	165
7.10.3.2	Handset adaptive transmit power control	165
Annex A (normative):	System parameters.....	166
A.1	CC timers.....	166
A.2	MM timers.....	166
A.3	Application timers	166
A.4	Constants	166
Annex B (normative):	Procedure Diagrams.....	167
Annex C (informative):	Recommended implementation of procedures.....	168
Annex D (informative):	Guidelines for implementation of DTMF	169
Annex E (informative):	Tones format in Recommendations ITU-T.....	170
Annex F (informative):	Services and features defined in other specifications	171
F.1	Services and features defined in TS 102 527-1 (New Generation DECT; part 1)	171
F.1.1	New Generation DECT; part 1, Speech Services (clause 5.1 of TS 102 527-1).....	171
F.1.2	New Generation DECT; part 1, Network (NWK) features (clause 5.2 of TS 102 527-1).....	171
F.1.3	New Generation DECT; part 1, Data Link Control (DLC) services (clause 5.3 of TS 102 527-1).....	171
F.1.4	New Generation DECT; part 1, Medium Access Control (MAC) services (clause 5.4 of TS 102 527-1).....	172
F.1.5	New Generation DECT; part 1, Physical Layer (PHL) services (clause 5.5 of TS 102 527-1).....	172
F.1.6	New Generation DECT; part 1, Speech coding and audio features (clause 5.6 of TS 102 527-1).....	172
F.2	Services and features defined in EN 300 444 (GAP).....	176
F.2.1	GAP Network (NWK) features (clause 4.1 of EN 300 444).....	176
F.2.2	GAP Speech coding and audio features (clause 4.2 of EN 300 444)	177

F.2.3	GAP Application features (clause 4.3 of EN 300 444).....	179
F.2.4	DLC service definitions (clause 5.1 of EN 300 444).....	179
F.2.5	GAP MAC service definitions (clause 5.2 of EN 300 444).....	180
F.3	Services and features defined in TS 102 527-3 (NG-DECT Part 3)	180
F.3.1	New Generation DECT; part 3, Speech Services (clause 5.1 of TS 102 527-3).....	181
F.3.2	New Generation DECT; part 3, Network (NWK) features (clause 5.2 of TS 102 527-3).....	181
F.3.3	New Generation DECT; part 3, DLC Services (clause 5.3 of TS 102 527-3).....	182
F.3.4	New Generation DECT; part 3, MAC Services (clause 5.4 of TS 102 527-3).....	182
F.3.5	New Generation DECT; part 3, Physical Layer (PHL) Services (clause 5.5 of TS 102 527-3).....	182
F.3.6	New Generation DECT; part 3, Speech coding and audio features (clause 5.6 of TS 102 527-3).....	182
F.3.7	New Generation DECT; part 3, Application features (clause 5.7 of TS 102 527-3).....	182
F.4	GAP Feature/service to procedure mapping tables	182
F.4.1	GAP NWK feature to procedure mapping table (clause 6.8.1 of EN 300 444).....	183
F.4.2	GAP DLC service to procedure mapping table (clause 6.8.2 of EN 300 444).....	184
F.4.3	GAP MAC service to procedure mapping table (clause 6.8.3 of EN 300 444).....	184
F.4.4	GAP Application feature to procedure mapping table (clause 6.8.4 of EN 300 444).....	185
F.5	NG-DECT Part 3 feature/service to procedure mapping tables	186
F.5.1	NG-DECT Part 3 NWK feature to procedure mapping table (clause 6.10 of TS 102 527-3).....	186
F.5.2	NG-DECT Part 3 DLC service to procedure mapping table (clause 6.11 of TS 102 527-3).....	192
F.5.3	NG-DECT Part 3 MAC service to procedure mapping table (clause 6.12 of TS 102 527-3).....	193
F.5.4	NG-DECT Part 3 application feature to procedure mapping table (clause 6.13 of TS 102 527-3).....	195
Annex G (informative): DTAM service use case examples		196
G.1	Voice oriented remote DTAM with a DTAM number.....	196
G.1.1	DTAM incoming messages management.....	196
G.1.2	Welcome messages management	197
G.2	Local or remote (visual) DTAM without DTAM number.....	198
G.2.1	DTAM incoming/Welcome messages management.....	198
G.3	DTAM message deletion via Delete entry	199
Annex H (normative): Editable fields.....		201
Annex I (informative): Bibliography.....		203

Intellectual Property Rights

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<http://ipr.etsi.org>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Foreword

This Technical Specification (TS) has been produced by ETSI Technical Committee Digital Enhanced Cordless Telecommunications (DECT).

The present document is based on EN 300 175 parts 1 to 8 ([1], [2], [3], [4], [5], [6], [7] and [8]) and EN 300 444 [11]. General attachment requirements and speech attachment requirements are based on EN 301 406 [10] (replacing TBR 006 [i.2]) and EN 300 176-2 [9] (previously covered by TBR 010 [i.3]). Further details of the DECT system may be found in TR 101 178 [i.1].

The present document has been developed in accordance to the rules of documenting a profile specification as described in ISO/IEC 9646-6 [i.12].

The information in the present document is believed to be correct at the time of publication. However, DECT standardization is a rapidly changing area, and it is possible that some of the information contained in the present document may become outdated or incomplete within relatively short time-scales.

The present document is part 5 of a multi-part deliverable covering the New Generation DECT as identified below:

- Part 1: "Wideband speech" [17];
- Part 2: "Support of transparent IP packet data" [i.4];
- Part 3: "Extended wideband speech services" [18];
- Part 4: "Light Data Services: Software Update Over The Air (SUOTA), content downloading and HTTP based applications" [i.5];
- Part 5: "Additional feature set nr. 1 for extended wideband speech services".**

1 Scope

The present document specifies a set of functionalities of the New Generation DECT.

The New Generation DECT provides the following basic new functionalities:

- Wideband speech service (part 1).
- Packet-mode data service supporting Internet Protocol with efficient spectrum usage and high data rates (part 2).
- Extended wideband speech services (part 3).
- Light Data Services: Software Update Over The Air (SUOTA), Content Downloading and HTTP based applications (part 4).
- Additional feature set nr. 1 for extended wideband speech services (part 5).

All New Generation DECT devices will offer at least one or several of these services.

The present document describes the part 5: Additional feature set nr. 1 for extended wideband speech services.

- For the description of the wideband speech service, see TS 102 527-1 [17].
- For the description of the support of transparent IP packet data, see TS 102 527-2 [i.4].
- For the description of the Extended wideband speech services, see TS 102 527-3 [18].
- For the description of the Light Data Services: Software Update Over The Air (SUOTA), Content Downloading and HTTP based applications, see TS 102 527-4 [i.5].

Part 5 ("Additional feature set nr. 1 for extended wideband speech services") is defined as an extension of part 3 ("Extended wideband speech services" [18]) which is itself an extension of part 1 ("Wideband speech service" [17]). Consequently, this means that all devices compliant to the present document will also implement at least all mandatory features and may implement the optional features defined in part 3 and part 1. In addition to that, the present document defines additional mandatory or optional features.

Part 1, and therefore also part 3 and part 5, are defined as extensions of the "Generic Access Profile (GAP)" [11]. All DECT devices offering Wideband speech services (part 1, or part 1 plus part 3, or part 1 plus part 3 plus part 5) are also compliant with the "Generic Access Profile (GAP)" [11], and offer the DECT standard 32 kbit/s voice service according to GAP [11].

All DECT devices claiming to be compliant with this Application Profile will offer at least the basic services defined as mandatory. In addition to that, optional features can be implemented to offer additional DECT services.

The aim of the present document is to guarantee a sufficient level of interoperability and to provide an easy route for development of DECT wideband speech applications, with the features of the present document being a common fall-back option available in all compliant to this profile equipment.

The present document is defined as an extension of TS 102 527-3 [18] so the numbering and order of figures and tables in the present document is aligned with the corresponding numbering and order of figures and tables in TS 102 527-3 [18].

2 References

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

Referenced documents which are not found to be publicly available in the expected location might be found at <http://docbox.etsi.org/Reference>.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

2.1 Normative references

The following referenced documents are necessary for the application of the present document.

3 Definitions, symbols and abbreviations

3.1 Definitions

For the purposes of the present document, the terms and definitions given in EN 300 444 [11] and the following apply:

attached to a line: PP is "attached to a line" if its associated bit is set in the "Handset bitmap" in the "Attached handsets" field of the "Line Settings List" entry for that line

NOTE: A PP that is attached to a line can send and receive calls on that line.

call status: part of the call information sent from FP to PP about the FP call state toward the peer party

double call with in-band signalling (line): legacy line on which second calls -incoming or outgoing- are handled using signalling "in-band"

FP-managed line selection: mode for an outgoing external call, in which the PP does not indicate the line to be used to the FP and the FP chooses the line where the call is placed

Headset PP (HPP): headset PP is a wireless headset telephone using the DECT air interface

NOTE: A HPP usually has only one speaker and one microphone combined with a limited set of keys (e.g. call button, volume plus, and volume minus). Headsets provide the equivalent functionality of a PP with hands-free operation.

late release: sending of a "CS idle" call status by the FP for a call that has been released a long time before in the network.

NOTE: See clause 7.4.3.10.3.1.

line: logical channel, separately accessible from the external world through a dedicated external directory entry (e.g. telephone number, uri, etc.)

NOTE: These lines may be of various types, for example: PSTN, VoIP or ISDN lines.

multiple call line: line supporting several simultaneous (external) calls

NOTE: An example of multiple call line is a VoIP line used with the SIP protocol.

multiple-call mode: configuration mode of a multiple call line from a DECT system point of view, enabling several simultaneous incoming or outgoing calls on different PPs (i.e. this possibility is not disabled by configuration)

new generation DECT: further development of the DECT standard introducing wideband speech, improved data services, new slot types and other technical enhancements

none: a special line identifier value (called "None") is defined in clause 7.7.56 of EN 300 175-5 [5] and is used to indicate that the line id for the external call is not yet known

NOTE: It is used for FP managed line selection (clauses 7.4.3.5.1 and 7.4.5.2.4) and, as a special case, for call intrusion (clause 7.4.3.8).

off-hook CLIP: ability of a network to send CLIP information for a waiting call (also known as "CLIP on call waiting" or "CLIP phase II")

single-call mode: configuration mode of a multiple call line from a DECT system point of view, in which the possibility of making several fully parallel call is (temporarily) disabled

NOTE: This mode may be useful for a user alone in the home. This mode does not prevent several simultaneous calls on the same PP. A line which is not "multiple call" (for instance a PSTN line only enabling double calls) is also said to be in "single call" mode.

super-wideband speech: voice service with enhanced quality compared to ADPCM G.726 and allowing the transmission of a maximum vocal frequency of at least 14 kHz
