This European Standard was approved by CEN on 6 August 2011.

CEN members are bound to comply with the CEN-CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.
<https://standards.iteh.ai/catalog/standards/sist/0b42fc2f-3a19-4a2f-8267>

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Foreword

This document (EN 4644-002:2012) has been prepared by the Aerospace and Defence Industries Association of Europe - Standardization (ASD-STAN).

After enquiries and votes carried out in accordance with the rules of this Association, this Standard has received the approval of the National Associations and the Official Services of the member countries of ASD, prior to its presentation to CEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by November 2012, and conflicting national standards shall be withdrawn at the latest by November 2012.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

1 Scope

This European Standard specifies the common conditions for rectangular electrical modular connectors for receptacles and plugs with interchangeable modules and a continuous operating temperature of 175 °C (or 125 °C).

Contact arrangements for fibre optic contacts are described in EN 4639-002.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

3 Description of models

Modular electrical rectangular, rack and panel or disconnect connectors, environmental resistant with four shells sizes 1, 2, 3 and 4, crimp contacts class R.

4 Description and codification of shell classes

See Table 1.

Table 1

Classes	Description
A	Plug and receptacle with aluminium alloy housing, nickel plated, 96 h resistance to salt mist, without grounding block, maximum operating temperature: 175 °C continuous.
B	Plug and receptacle with aluminium alloy housing, nickel plated, 96 h resistance to salt mist, with grounding block, maximum operating temperature: 175 °C continuous.
C	Plug and receptacle with aluminium alloy housing and aluminium chromatation plating, 48 h resistance to salt mist, without grounding block, maximum operating temperature: 125 °C continuous.
E	Plug and receptacle with composite housing, nickel plated, 96 h resistance to salt mist, without grounding block, maximum operating temperature: 175 °C continuous.
F	Plug and receptacle with composite housing, nickel plated, 96 h resistance to salt mist, with grounding block, maximum operating temperature: 175 °C continuous.

5 Terminology

See EN 4644-001.

iTeh STANDARD PREVIEW

6 Operating conditions – Permissible cables dimensions

The performance of these connectors is achieved with the cables of the dimensions given in Table 2 and using the accessories and wiring tools specified.

<http://standards.iteh.cz/catalog/standards/sist/0b42fc2f-3a19-4a2f-8267-8f2c59de7141/sist-en-4644-002-2012>

Table 2 (1 of 2)

Contact size		Size of conductors standard cables		Outer diameter of cables mm	
Contact	Barrel	AECMA code	AWG	min.	max.
22	22	004	22	0,86	1,45
		002	24		
		001	26		
20	20	006	20	1,02	1,80

7 Operating characteristics

7.1 Electrical conditions

- Rated current: according to standards for contacts
- Insulation resistance at ambient temperature: 5 000 MΩ
- Withstanding voltage at sea level: 1 500 V r.m.s.
- Withstanding voltage from 15 000 m to 21 000 m: 800 V r.m.s.

7.2 Environmental conditions

- Minimum temperature: -65 °C
- Maximum temperature: 175 °C continuous. (except class C at 125 °C).
- Corrosion resistance and fluid resistance: see EN 4644-001.

7.3 Mechanical conditions

Mechanical endurance: 500 mating and unmating cycles for contacts; 100 mating and unmating cycles for locking mechanisms.

7.4 Housing electrical continuity

See Table 3.

Table 3

Class	Maximum resistance mΩ
A, B, E, F	2,5
C	15
