This European Standard was approved by CEN on 10 November 2005 and includes Amendment 1 approved by CEN on 17 November 2009.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

SIST EN 1034-2:2006+A1:2010

<https://standards.iteh.ai/catalog/standards/sist/02291e43-121a-4616-a22c-fadc56c08b4c/sist-en-1034-2-2006a1-2010>

Foreword

This document (EN 1034-2:2005+A1:2009) has been prepared by Technical Committee CEN/TC 198 "Printing and paper machinery - Safety", the secretariat of which is held by DIN.

This document shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by June 2010, and conflicting national standards shall be withdrawn at the latest by June 2010.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document includes Amendment 1, approved by CEN on 17 November 2009.

This document supersedes EN 1034-2:2005.

The start and finish of text introduced or altered by amendment is indicated in the text by tags $\boxed{A_1}$ $\boxed{A_1}$.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s).

$\boxed{A_1}$ For relationship with EU Directive(s), see informative Annexes ZA and ZB, which are integral parts of this document. $\boxed{A_1}$

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

EN 1034-2:2005+A1:2009 (E)**Introduction**

This European Standard is a type C standard as stated in EN ISO 12100-1.

The machinery concerned and the extent to which hazards, hazardous situations and events are covered are indicated in the scope of this European Standard.

For machines that have been designed and built according to the provisions of this type C standard, the following stipulation applies: when provisions of this type C standard are different from those which are stated in type A or B standards or from provisions made in **EN 1034-1:2000+A1:2010**, the provisions of this type C standard take precedence over the provisions of the other standards.

1 Scope

This European Standard applies to barking drums consisting of drum, drive, power transmission elements, supporting wheels and control systems intended for use in debarking plants for paper making and shall be used together with **EN 1034-1:2000+A1:2010**. It deals with all significant hazards, hazardous situations and hazard events relevant to barking drums, when they are used as intended and under the conditions foreseen by the manufacturer (see clause 4). This standard does not apply to sawing equipment or log and bark conveying systems used in debarking plants.

This European Standard is not applicable to barking drums that have been manufactured before the date of publication of this European Standard by CEN.

3 Terms and definitions

For the purposes of this document, the definitions of EN 1034-1:2000+A1:2010, EN ISO 12100-1:2003 and the following definition apply:

3.1

barking drum

machine formed of a cylindrical hollow tube (drum) through which logs are fed. The rotation of the drum causes the logs to fall and be pushed against each other and rubbed against the inner wall of the drum causing the bark to break and fall off. Figure 1 illustrates the principle of a barking drum in a debarking plant

EN 1034-2:2005+A1:2009 (E)

Key

1	Drum
2	Drive
3	Supporting wheels
4	Discharge side
5, 6, 7, 8	Log conveyor belts

4 List of significant hazards

Table 1 of this clause contains all the significant hazards that, as far as they are dealt with in this standard, are identified by risk assessment in accordance with EN 1050 as significant for this type of machinery and require action to eliminate or reduce the risk.

When carrying out the risk assessment, the machine designer has to check whether the list of hazards in Table 1 is complete and applicable with respect to his particular machine.

Table 1 — List of significant hazards

Hazards	EN 1034-2:2005	EN 1034-1:2000+A1:2010 (A1)
Mechanical hazards		
Crushing hazard	5.2.2; 5.2.6; 5.2.7	5.1; 5.3
Entanglement hazard	5.2.1; 5.2.2	5.2
Drawing-in or trapping hazard	5.2.3; 5.2.5	5.1; 5.4
Impact hazard	5.2.4; 5.3.2	5.1
Friction or abrasion hazard	5.2.1	5.1
High-pressure fluid ejection hazard	5.13; 5.14	5.24

Table 1 (concluded)

Hazards	EN 1034-2:2005	EN 1034-1:2000+A1:2010 (A1)
Ejection of parts	5.2.4; 5.2.7	5.2
Slip, trip and fall hazards	5.2.4; 5.3; 5.7.2; 5.7.3	5.5
Electrical hazards caused by, for example:		
Electrical contact (direct or indirect)	5.12	5.23
External influences on electrical equipment	5.12	5.23
Hazards generated by noise, resulting in		
Hearing loss (deafness), other physiological disorders (e.g. loss of balance, loss of awareness)	5.9	5.15
Interferences with speech communication, acoustic signals	5.9	5.15
Hazards generated by materials and substances processed, used or exhausted by machines, for example		
Hazards resulting from contact with or inhalation of dusts	5.15	5.16
Hazards generated by neglecting ergonomic principles in machine design		
Unhealthy postures or excessive efforts	5.3.2; 5.11	5.22
Inadequate consideration of human hand-arm or foot-leg anatomy	5.11	5.22
Inadequate area lighting	5.10	5.18
Hazards caused by failure of energy supply and other functional disorders, for example:		
Failure of energy supply	5.6	5.8
Malfunction of control system	5.2.4; 5.8	5.14
Errors of fitting	5.7	7
Overturn	5.8.2	5.14
Emergency measures	5.5	5.7; 5.18; 5.19
Combination of hazards	5.2.8; 5.4; 5.7	5.6; 5.9

5 Safety requirements and/or measures

5.1 General

Machinery shall comply with the safety requirements and/or measures of this clause. In addition, the machines shall be designed according to the principles of EN ISO 12100-1 for relevant but not significant hazards that are not dealt with by this document.
