Aerospace series - Paints and varnishes - Two component cold curing polyurethane finish - Part 004: High flexibility

Série aérospatiale - Peintures et vernis - Peinture de finition polyuréthane, à deux composants, polymérisant à température ambiante - Partie 004: Haute flexibilité

Luft- und Raumfahrt - Beschichtungsstoff - Zweikomponenten- Polyurethan-Decklack, kalthärtend - Teil 004: Hohe Elastizität

This European Standard was approved by CEN on 6 February 2010.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 2434-004:2010) has been prepared by the Aerospace and Defence Industries Association of Europe - Standardization (ASD-STAN).

After enquiries and votes carried out in accordance with the rules of this Association, this Standard has received the approval of the National Associations and the Official Services of the member countries of ASD, prior to its presentation to CEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by March 2011, and conflicting national standards shall be withdrawn at the latest by March 2011.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

<https://standards.iteh.ai/catalog/standards/sist/fl633f8d-15b6-4d0c-a4e7-25b3abe2835b/sist-en-2434-004-2010>

Introduction

This European Standard is part of a series of EN non-metallic materials standards for aerospace applications.

The general organisation of this series is described in EN 4385.

This European Standard is a level 3 document as defined in EN 4385.

Definition for subcase numbering in Table 2 to Table 5, is given in EN 7000-9.

1 Scope

This European Standard specifies the requirements for a two component polyurethane finish to be applied over a primer mainly for exterior aerospace applications, offering high flexibility

The properties specified in this European Standard are obtained on defined aluminium alloy test pieces prepared in accordance with EN 3837 and EN 23270 and painted with primer to prEN 2435-002. The ability of the material to be used for a specific application (e.g. alternative substrate, alternative primer, specific drying conditions etc.) shall be determined by supplementary tests to confirm that the requirements of this standard are met.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 2379, *Aerospace series — Fluids for assessment of non-metallic materials* ¹⁾

EN 2435-001, *Aerospace series — Paints and varnishes — Corrosion resistant chromated two component cold curing primer — Part 001: Minimum requirements*

EN 2435-002, *Aerospace series — Paints and varnishes — Corrosion resistant chromated two component cold curing primer — Part 002: High corrosion resistance*

EN 3837, *Aerospace series — Paints and varnishes — Nature and method for surface preparation of test pieces in aluminium alloys* ¹⁾

EN 3840, *Aerospace series — Pieces paints and varnishes — Technical specification*

EN 4385, *Aerospace series — Non-metallic materials — General organisation of standardisation — Links between types of standards* ¹⁾

EN 7000-9, *Aerospace series — Non-metallic materials — Rules for the drafting and presentation of material standards — Part 9: Paints and varnishes* ¹⁾

EN 23270, *Paints, varnishes and their raw materials — Temperatures and humidities for conditioning and testing (ISO 3270:1984)*

¹⁾ Published as ASD-STAN Prestandard at the date of publication of this standard

EN ISO 1513, *Paints and varnishes — Examination and preparation of samples for testing (ISO 1513:1992)*

EN ISO 3696, *Water for analytical laboratory use — Specification and test methods (ISO 3696:1987)*

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

3.1

Gloss finish

≥ 80 units measured at 60° according to EN 3840 test 27

4 Classification

Not applicable.

5 Batch release and qualification testing

5.1 Batch release testing

For batch acceptance the tests marked with an * in Table 1 to Table 5 shall be performed.

5.2 Qualification tests

For product qualification, all tests mentioned in this European Standard, in the Table 1 to Table 5, shall be performed.

<https://standards.iteh.ai/catalog/standards/sist/fl633f8d-15b6-4d0c-a4e7-25b3abe2835b/sist-en-2434-004-2010>

Table 1 – General Requirements

1.001	Material description	Two component cold curing polyurethane coating
1.002	Formulation	Base – a base containing an hydroxyl functional resin, solvents and pigments. Activator – a polyisocyanate activator solution Thinner – if required
1.003	Form and method of production	These components shall be mixed in simple whole number proportions, by volume or by weight, in accordance with the manufacturer's instructions.
1.004	Technical specification	EN 3840
1.009	Application and use	Dry film thickness of $(50 \pm 5) \mu\text{m}$
1.010	Storage stability	See EN 3840
1.011	Shelf life	See EN 3840
1.013	Processing conditions	EN 23270 for 7 d before testing unless otherwise specified. Finish is applied to the primer following drying of the primer for 4 h to 16 h.
1.093	Quality assurance	See EN 3840
1.094	Designation	Polyurethane Finish EN 2434-04
1.095	Packaging	See EN 3840
1.096	Identification marking	See EN 3840
1.097	Flash point	See EN 3840
1.098	Health and safety	See EN 3840
