

# Standard Practice for Mechanical Symbols, Shipboard—Heating, Ventilation, and Air Conditioning (HVAC)<sup>1</sup>

This standard is issued under the fixed designation F 856; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon ( $\epsilon$ ) indicates an editorial change since the last revision or reapproval.

*This standard has been approved for use by agencies of the Department of Defense.*

## 1. Scope

1.1 This practice covers symbols used on heating, ventilation, and air conditioning (HVAC) detailed engineering drawings.

1.2 These symbols may be useful on contract and preliminary design drawings.

## 2. Significance and Use

2.1 When symbolic representation is required for an item not covered in this standard, the character of the symbol shall be adequately identified and shall be subject to one interpretation only. If necessary, a note shall be attached to the symbol for further clarity.

2.2 Symbolic representation does not require exact or scale layouts of the actual system. Therefore, the symbols may be used in all views of the system layout.

## 3. Abbreviations

3.1 The abbreviations (for use only in this practice) are defined as follows:

AF = axial fan,  
AFD = automatic fire damper with manual override,  
BD = balance damper,  
CC = cooling coil,  
CCW = counter clockwise,  
CE = convection heater, electric,  
CF = centrifugal fan,  
CS = convection heater, steam,  
CW = clockwise,  
EH = turret heater electric,

EP = duct preheater, electric,  
ER = duct reheater, electric,  
EU = electric unit heater,  
F = filter,  
FA = flame arrester,  
FCA = fan coil assembly,  
FCU = fan coil unit,  
G = grille,  
GC = gravity cooling coil,  
H = humidistat, humidifier,  
L = louver,  
M = motor,  
MFD = manual fire damper,  
NE = natural exhaust,  
NS = natural supply,  
R = return air,  
RO = remote operated,  
SFD = solenoid fire damper,  
SP = preheater, steam,  
SR = reheater, steam,  
SU = steam unit heater,  
T = thermostat,  
TE = tempered air, electric,  
TS = tempered air, steam,  
U = undercut,  
UC = unit cooler,  
V = volume, volumetric, and  
VC = volume control.

## 4. Illustrations

4.1 Illustrations for HVAC symbols are given in Figs. 1-4.

## 5. Keywords

5.1 air conditioning; design symbols; engineering symbols; heating; HVAC; marine; ship; symbols; ventilation
