## **Annex A (normative):      Declarations on features and procedures supported .....261**

A.1	Declarations for portable part.....	261
A.1.1	Optional or conditional PT features.....	261
A.1.2	Extra information for PT testing.....	262
A.1.3	Optional or conditional PT procedures.....	264
A.1.4	PT relevant test cases list.....	267
A.1.4.1	PT is a normal PT (not a headset portable part).....	267
A.1.4.2	PT is a headset portable part .....	267
A.2	Declarations for fixed part.....	268
A.2.1	Optional and conditional FT features .....	268
A.2.2	Extra information for FT testing.....	269
A.2.3	Optional or conditional FT procedures.....	271
A.2.4	FT relevant test cases list.....	271
A.2.4.1	FT handling only 'Common parallel call procedures' lines .....	271
A.2.4.2	FT handling only 'double call with in-band signalling' lines .....	271
A.2.4.3	FT handling 'Common parallel call procedures' lines and 'double call with in-band signalling' lines .....	271

## **Annex B (informative):      List of NG DECT Part 5 procedures.....272**

## **Annex C (normative):      Configuration for testing.....274**

C.1	Portable part configuration to be declared by supplier.....	274
C.2	Fixed part internal configuration to be declared by supplier.....	274
C.3	Test environment configuration to be declared by test house or supplier .....	274

<b>Annex D (normative):</b>	<b>Amendments to other DECT specifications .....</b>	<b>275</b>
D.1	Amendments to the Technical Basis for Regulation TBR 022 amended by TBR 022/A1 applicable to equipment compliant with TS 102 527-5.....	275
D.1.1	Additional testing requirements for PP side .....	275
D.1.2	Additional testing requirements for FP side .....	275
D.1.3	Additional Test Cases applicable to equipment compliant with TS 102 527-5 [15] .....	275
<b>Annex E (informative):</b>	<b>Test case status modifications from TS 102 841.....</b>	<b>276</b>
E.1	PT test cases .....	276
E.1.1	Modified statuses for DECT Part 1 PT features and tests cases .....	276
E.1.2	Modified statuses for DECT Part 3 PT features and tests cases .....	276
E.2	FT test cases .....	277
E.2.1	Modified statuses for DECT Part 1 FT features and tests cases .....	277
E.2.2	Modified statuses for DECT Part 3 FT features and tests cases .....	277
History	.....	278

## Intellectual Property Rights

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<http://ipr.etsi.org>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

---

## Foreword

This Technical Specification (TS) has been produced by ETSI Technical Committee Digital Enhanced Cordless Telecommunications (DECT).

The present document is based on EN 300 175 parts 1 [1] to 8 [8], EN 300 444 [12], TS 102 527-1 [13], TS 102 527-3 [14] and TS 102 527-5 [15]. General attachment requirements and speech attachment requirements are based on EN 300 176-1 [9], EN 301 406 [11] (replacing TBR 006 [i.2]) and EN 300 176-2 [10] (previously covered by TBR 010 [i.3]). Further details of the DECT system may be found in TR 101 178 [i.1].

The information in the present document is believed to be correct at the time of publication. However, DECT standardization is a rapidly changing area, and it is possible that some of the information contained in the present document may become outdated or incomplete within relatively short time-scales.

---

# 1 Scope

The present document contains the Profile Test Specification (PTS) and the Test Case Library (TCL) for "New Generation DECT; Part 5: Additional feature set nr. 1 for extended wideband speech" (TS 102 527-5 [15]). The present document covers both the Portable (PT) and the Fixed (FT) Radio terminations.

The present document is defined as an extension of TS 102 841 [16], so the numbering and order of figures and tables in the present document is aligned with the corresponding numbering and order of figures and tables in TS 102 841 [16]. This also applies to the numbering of tables in the annexes (and especially in annex A).

The Test Case Library (TCL) covers also some test cases for "DECT New Generation; part 1; Wideband speech" (TS 102 527-1 [13]), "DECT New Generation; part 3; Extended wideband speech" (TS 102 527-3 [14]) and for the "Generic Access Profile" (EN 300 444 [12]). This is done because such test cases are mandatory or especially relevant for New Generation DECT part 5 (see TS 102 527-5 [15]), and are not covered by existing GAP test specifications.

Due to the ascending compatibility of DECT profiles, all New Generation DECT part 5 devices (see TS 102 527-5 [15]), are required to be also compliant with "DECT New Generation; part 3; Extended wideband speech" (see TS 102 527-3 [14]), "DECT New Generation; part 1; Wideband speech" (TS 102 527-1 [13]) and with the "Generic Access Profile" (GAP, EN 300 444 [12]). Annex E of the present document specifies the modifications to GAP test cases for requirements and tests that are optional in GAP test specifications (see note), but that become mandatory to support the corresponding GAP features in New Generation DECT Part 5.

**NOTE:** The industry de-facto standard practice for ensuring the compliance to GAP [12] is the use of TBR 022 [i.4] amended by TBR 022/A1 [i.5], even although these two documents no longer have their initial regulatory significance. TBR 022 [i.4] relies on the GAP Profile Test Specification (EN 300 494 parts 1 [i.6] to 3 [i.8]) and on the DECT Test Case Library (EN 300 497 parts 1 [i.9] to 9 [i.17]). The GAP test suite also includes the GAP Profile Implementation Conformance Statement (PICS) (EN 300 474 parts 1 [i.25] and 2 [i.26]) and the DECT Common Interface (CI) Profile Implementation Conformance Statement (PICS) (EN 300 476 parts 1 [i.18] to 7 [i.24]).

The objective of the present document is to provide a basis for approval tests of NG DECT Part 5 equipment giving a high probability of air interface interoperability between different manufacturer's DECT equipment.

---

## 2 References

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

Referenced documents which are not found to be publicly available in the expected location might be found at <http://docbox.etsi.org/Reference>.

**NOTE:** While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

## 3 Definitions, symbols and abbreviations

### 3.1 Definitions

For the purposes of the present document, the terms and definitions given in TS 102 527-5 [15], TS 102 527-3 [14], TS 102 527-1 [13], EN 300 444 [12] and the following apply:

**GAP (PP, FP, device or equipment):** PP, FP or any of them compliant with EN 300 444 [12]

**Golden device:** ideal example of a device used as reference device for compliance testing and against which later devices are tested and judged

**NG DECT Part 1 Golden Device:** golden device, such as the one administered by the DECT Forum, used for compliance testing of NG DECT Part 1 [13] equipment

**NG DECT Part 1 (PP, FP, device or equipment), also shortened as Part 1 (PP, FP, device or equipment):** PP, FP or any of them compliant with TS 102 527-1 [13].

**NG DECT Part 3 (PP, FP, device or equipment), also shortened as Part 3 (PP, FP, device or equipment):** PP, FP or any of them compliant with TS 102 527-3 [14].

**NG DECT Part 5 (PP, FP, device or equipment), also shortened as Part 5 (PP, FP, device or equipment):** PP, FP or any of them compliant with TS 102 527-5 [15].

**Off-hook CLIP:** ability of a network to send CLIP information for a waiting call (also known as "CLIP on call waiting" or "CLIP phase II")

### 3.2 Symbols

For the purposes of the present document, the following symbols apply:

M	mandatory to support (provision mandatory, process mandatory)
O	optional to support (provision optional, process mandatory)
I	out-of-scope (provision optional, process optional) not subject for testing
C	conditional to support (process mandatory)

N/A not applicable (in the given context the present document makes it impossible to use this capability)

**Provision mandatory, process mandatory** means that the indicated feature service or procedure is to be implemented as described in the present document, and may be subject to testing.

**Provision optional, process mandatory** means that the indicated feature, service or procedure may be implemented, and if implemented, the feature, service or procedure is to be implemented as described in the present document, and may be subject to testing.

NOTE: The notation used is based on the notation proposed in ISO/IEC 9646-7 [i.27].

### 3.3 Abbreviations

For the purposes of the present document, the following abbreviations apply:

BTPC	Base manual Transmit Power Control
CC	Call Control
CFB	Call Forwarding on Busy subscriber
CFNA	Call Forwarding on No Answer
CFU	Call Forwarding Unconditional
CI	Common Interface
CLIP	Calling Line Identification Presentation
CLIR	Calling Line Identification Restriction
CNIP	Calling Name Identification Presentation
CW	Call Waiting
DCIBS	Double Call with In-Band Signalling
DECT	Digital Enhanced Cordless Telecommunications
DLC	Data Link Control
DNS	Domain Name System
DTAM	Digital Telephone Answering Machine
DTMF	Dual Tone Multi-Frequency
FP	Fixed Part
FT	Fixed radio Termination
GAP	Generic Access Profile
HTTP	HyperText Transfer Protocol
IE	Information Element
IUT	Implementation Under Test
IWU	InterWorking Unit
IXIT	Implementation eXtra Information for Testing
LAN	Local Area Network
LiA	List Access
MAC	Medium Access Control
MD	Manufacturer Defined
MM	Mobility Management
MMI	Man and Machine Interface
NA	Not Applicable
NB	Narrow Band
NDT	Network Delay Type
NEM	No Emission Mode
NG	New Generation
NG DECT	New Generation DECT
NWK	NetWorK
Ph A	Phone A
Ph B	Phone B
Ph C	Phone C
PHL	PHysical Layer
PIN	Personal Identification Number
PP	Portable Part
PT	Portable radio Termination
PTS	Profile Test Specification
RSSI	Received Signal Strength Indication

SMS-C	SMS Centre
TCL	Test Case Library
TS	Test System
VoIP	Voice over IP
WAN	Wide Area Network
WB	WideBand

## 4 Test method

The test method used to test the NG DECT Part 5 devices is the same as for NG DECT Part 3 devices (see TS 102 841 [16], clause 4).

### 4.1 Test platform

#### 4.1.1 PP test platform

The PP test platform outlined in clause 4.1.1 of TS 102 841 [16] applies to NG DECT Part 5 devices with the following modifications.

##### 4.1.1.1 List content for tests

###### 4.1.1.1.1 List of Supported Lists

The List of Supported Lists outlined in clause 4.1.1.1.1 of TS 102 841 [16] also applies.

###### 4.1.1.1.2 Missed Calls List

The Missed Calls List outlined in clause 4.1.1.1.2 of TS 102 841 [16] also applies to NG DECT Part 5 devices.

###### 4.1.1.1.3 Outgoing Calls List

The Outgoing Calls List outlined in clause 4.1.1.1.3 of TS 102 841 [16] also applies to NG DECT Part 5 devices.

###### 4.1.1.1.4 Incoming Accepted Calls List

The Incoming Accepted Calls List outlined in clause 4.1.1.1.4 of TS 102 841 [16] also applies to NG DECT Part 5 devices.

###### 4.1.1.1.5 All Calls List

Table 4 shows the All Calls List. The total number of entries in the list is 30.

'Unread' and 'Nb of calls' are only relevant for missed calls and for such calls bear the same value as in the Missed calls list.
