Cigarettes - Assessment of the ignition propensity - Safety requirement

Cigarettes - Evaluation du potentiel incendiaire -
Prescription de sécurité

Zigaretten - Beurteilung der Zündneigung -
Sicherheitsanforderung

This European Standard was approved by CEN on 16 November 2010.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 16156:2010) has been prepared by Technical Committee CEN/TC 401 "Project Committee - Reduced Ignition Propensity Cigarettes", the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by May 2011, and conflicting national standards shall be withdrawn at the latest by May 2011.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

Introduction

Mandate M/425 asks CEN to develop a European Standard that satisfies the fire safety requirement laid down in Commission Decision 2008/264/EC on the fire safety requirements to be met by European Standards for cigarettes pursuant to Directive 2001/95/EC of the European Parliament and of the Council [1].

1 Scope

This European Standard specifies fire safety requirement for cigarettes.

2 Normative references

The following referenced document is indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN ISO 12863:2010, *Standard test method for assessing the ignition propensity of cigarettes (ISO 12863:2010)*

3 Terms and definitions

For the purposes of this document, the terms and definitions given in EN ISO 12863:2010 and the following apply.

SIST EN 16156:2011
<https://standards.iteh.ai/catalog/standards/sist/c3baf704-1a3f-45be-8f89-6b15b03f0a11/sist-en-16156-2011>

3.1 cigarette with reduced ignition propensity

cigarette that self extinguishes when not actively puffed, before it has burnt through its full length

NOTE See (3.2).

3.2 full-length burn

outcome of a determination in which the cigarette continues to burn to or past the front plane of the tipping paper (filter tip cigarettes) or past the tips of the metal pins for non-filter tip cigarettes

[EN ISO 12863:2010]

3.3 batch of cigarettes specimens

set of 40 determinations

NOTE This is a "test" as defined in EN ISO 12863.

4 Requirements

No more than 25 % of a batch of cigarettes specimens to be tested shall burn through their full length. The assessment shall be carried out according to EN ISO 12863. The determination shall be carried out on 10 layers of filter paper as standard substrate specified in EN ISO 12863.
