Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to ISO 4950-3:1995 was prepared by Technical Committee ISO/TC 17, *Steel*, Subcommittee SC 3, *Steels for structural purposes*.

Introduction

It appeared during the systematic review, that strip and coils should be deleted from the scope of this International Standard because they are relevant to ISO/TC 17/SC 12, consequently ISO/TC 17/SC 3 decided to prepare an amendment to correct this International Standard accordingly.

High yield strength flat steel products —

Part 3:

Products supplied in the heat-treated (quenched + tempered) condition

AMENDMENT 1

Cover page and page 1, title

Modify the title of ISO 4950-3:1995 as follows:

“High yield strength steel plates and wide flats — Part 1: Plates and wide flats supplied in the heat-treated (quenched + tempered) condition”

Page 1, Clause 1

1st paragraph, 3rd line, replace “... flat steel products ...” by “... steel plates and wide flats ...”.

2nd paragraph, replace the text with the following:

“It is applicable to steel plates hot-rolled on reversing mills and to hot-rolled wide flats having a width equal to or greater than 600 mm, in the thickness range 3 mm to 70 mm, in steel which, after quenching and tempering, has a minimum specified yield strength of 460 N/mm² to 690 N/mm² for thicknesses up to and including 50 mm and 440 N/mm² to 670 N/mm² for thicknesses between 50 mm and 70 mm.”
