EUROPEAN STANDARD
NORME EUROPÉENNE
EUROPÄISCHE NORM

EN 15956

September 2011

ICS 65.080

Supersedes CEN/TS 15956:2009

English Version

Fertilizers - Extraction of phosphorus soluble in mineral acids

Engrais - Extraction du phosphore soluble dans les acides
minéraux

Düngemittel - Extraktion des in Mineralsäuren löslichen
Phosphors

This European Standard was approved by CEN on 18 August 2011.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 15956:2011) has been prepared by Technical Committee CEN/TC 260 “Fertilizers and liming materials”, the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by March 2012, and conflicting national standards shall be withdrawn at the latest by March 2012.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document supersedes CEN/TS 15956:2009.

The following changes have been made to the former:

- a) the CEN Technical Specification has been adopted as a European Standard;
- b) the document has been editorially revised.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

EN 15956:2011 (E)**1 Scope**

This document specifies a method for the determination of phosphorus soluble in mineral acids.

The method is applicable exclusively to phosphate fertilizers listed in Regulation (EC) 2003/2003, Annex I (see [2]).

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 1482-2, *Fertilizers and liming materials — Sampling and sample preparation — Part 2: Sample preparation*

EN 12944-1:1999, *Fertilizers and liming materials and soil improvers — Vocabulary — Part 1: General terms*

EN 12944-2:1999, *Fertilizers and liming materials and soil improvers — Vocabulary — Part 2: Terms relating to fertilizers*

3 Terms and definitions

For the purposes of this document, the terms and definitions given in EN 12944-1:1999 and EN 12944-2:1999 apply.

4 Principle

Extraction of the phosphorus in the fertilizer with a mixture of nitric acid and sulfuric acid under the specified conditions.

5 Sampling

Sampling is not part of the method specified in this document. A recommended sampling method is given in EN 1482-1.

Sample preparation shall be carried out in accordance with EN 1482-2. Grinding of the laboratory sample is recommended for homogeneity reasons.

6 Reagents

6.1 Water, distilled or demineralized.

6.2 Sulfuric acid, $\rho = 1,84$ g/ml.

6.3 Nitric acid, $\rho = 1,40$ g/ml.

7 Apparatus

7.1 Standard laboratory equipment.

7.2 Kjeldahl flask, capacity at least 500 ml, or 250 ml round-bottomed flask with a glass tube forming a reflux condenser.

7.3 500 ml graduated flask.

7.4 Dry pleated filter, phosphate free.

8 Procedure

8.1 Test portion

Weigh, to the nearest 0,001 g, 2,5 g of the laboratory sample and place it in a dry Kjeldahl flask (7.2).

8.2 Extraction

Add 15 ml of water (6.1) to the test portion and stir so as to suspend the substance. Add 20 ml of nitric acid (6.3) and carefully add 30 ml of sulfuric acid (6.2).

When the initial violent reaction has ceased, slowly bring the contents of the flask to boiling and boil for 30 min. Allow to cool and then carefully add with mixing about 150 ml of water (6.1). Continue boiling for 15 min.

Cool completely and transfer the liquid quantitatively to a graduated flask (7.3). Make up to volume, mix and filter through a dry pleated filter (7.4), discarding the first portion of the filtrate.

9 Test report

The test report shall contain at least the following information:

- all information necessary for the complete identification of the sample;
- test method used with reference to this document;
- test results obtained;
- date of sampling and sampling procedure (if known);
- date when the analysis was finished;
- whether the requirement of the repeatability limit has been fulfilled;
- all operating details not specified in this document, or regarded as optional, together with details of any incidents occurred when performing the method, which might have influenced the test result(s).
