Foreword

This second edition European Telecommunication Standard (ETS) has been produced by the Communication, Networks, and Systems Interconnection Technical Committee (TC32) of ECMA on behalf of its members and those of the European Telecommunications Standards Institute (ETSI).

This ETS is one of a series of standards defining services and signalling protocols applicable to Private Integrated Services Networks (PISN). The series uses the Integrated Services Digital Network (ISDN) concepts as developed by ITU-T and conforms to the framework of standards for Open Systems Interconnection (OSI) as defined by ISO/IEC.

This particular ETS specifies the Call Transfer supplementary service.

The previous (first) edition of this ETS contained a "standalone" specification of these supplementary services. This edition endorses an International Standard, ISO/IEC 13865, published since the publication of the first edition of this ETS.

Endorsement notice

The text of International Standard ISO/IEC 13865 (1995) was approved by ETSI as an ETS with agreed modifications as given below.

NOTE: New or modified text is indicated using sidebars. In addition, underlining and/or strike-out are used to highlight detailed modifications where necessary.

Clause 3

Replace the first paragraph by:

This ETS incorporates by dated and undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this ETS only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies.

Insert the following normative references at the end of clause 3:

- [9] ETS 300 171 (1992): "Private Telecommunication Network (PTN); Specification, functional models and information flows; Control aspects of circuit mode basic services".
- [10] prETS 300 173: "Private Integrated Services Network (PISN); Specification, functional models and information flows Identification supplementary services [ISO/IEC 14136 (1995), modified]" 2nd edition.
- [11] prETS 300 237: "Private Integrated Services Network (PISN); Specification, functional models and information flows Name identification supplementary services [ISO/IEC 13864 (1995), modified]" 2nd edition.
- [12] ETS 300 387 (1994): "Private Telecommunication Network (PTN); Method for the specification of basic and supplementary services".
- [13] ETS 300 475-1 (1995): "Private Telecommunication Network (PTN); Reference configuration; Part 1: Reference configuration for PTN eXchanges (PTNX) [ISO/IEC 11579-1 (1994), modified]".

Throughout the text of ISO/IEC 13865

<http://www.iso.org/iso/standards.iso>

Throughout the text of ISO/IEC 13865, replace references as shown in the table below:
